For release: April 26, 2013

# Capital Power reports solid first quarter 2013 operating performance

**EDMONTON, Alberta** – Capital Power Corporation (Capital Power, or the Company) (TSX: CPX) today released its financial results for the quarter ended March 31, 2013. Funds from operations were \$103 million in the first quarter of 2013, down 11%, on a comparable basis, from \$116 million in the first quarter of 2012. Cash flow per share for the quarter was \$1.04 compared with \$1.19 for the same quarter of the previous year. Net income attributable to shareholders in the first quarter of 2013 was \$34 million, or \$0.44 per share, compared with \$40 million, or \$0.66 per share, in the comparable period of 2012. Normalized earnings attributable to common shareholders in the first quarter of 2013, after adjusting for one-time items and fair value adjustments, were \$25 million, or \$0.36 per share, compared with \$27 million, or \$0.46 per share, in the first quarter of 2012.

"The strong operating performance of our facilities, with average plant availability of 94 per cent, was the highlight of the first quarter," said Brian Vaasjo, President and CEO of Capital Power. "We were particularly pleased to achieve high availability in the 90 per cent range across the fleet, with the exception of the Tiverton facility, which had lower availability due to a planned outage."

"Normalized earnings per share of \$0.36 in the first quarter, which were modestly below Management's expectations, have Capital Power on track to meet its annual financial targets including achieving normalized earnings per share of \$1.20 to \$1.40 per share," said Mr. Vaasjo. "We saw a slight improvement in Alberta power prices in the first quarter, with spot prices averaging \$65 per megawatt hour (MWh) compared to \$60 per MWh for the same period last year. We realized a captured price of \$69 per MWh in the first quarter, higher than spot prices but lower than the exceptional performance of our portfolio optimization team in the first quarter of 2012, when the captured price was \$83 per MWh."

"Capital Power's Port Dover and Nanticoke wind project in Ontario is on track for completion in the fourth quarter of this year and will contribute to our financial performance this year," added Mr. Vaasjo. The project will add 105 megawatts of wind generation to our fleet and provide contracted cash flows from its 20-year power purchase arrangement with the Ontario Power Authority."

Capital

Operational and Financial Highlights <sup>1</sup> (unaudited)	Three months ended March 31			
(millions of dollars except per share and operational amounts)		2013		2012
Electricity generation (excluding acquired Sundance PPA) (GWh)		4,142		4,222
Generation plant availability (excluding acquired Sundance PPA) (%)		94%		97%
Revenues and other income	\$	365	\$	376
Adjusted EBITDA <sup>2</sup>	\$	135	\$	152
Net income attributable to shareholders	\$	34	\$	40
Basic earnings per share	\$	0.44	\$	0.66
Diluted earnings per share	\$	0.44	\$	0.64
Dividends declared per common share	\$	0.315	\$	0.315

Capital expenditures	\$	293	\$	141

- The operational and financial highlights in this press release should be read in conjunction with Management's Discussion and Analysis and the unaudited Condensed Interim Consolidated Financial Statements for the three months ended March 31, 2013.
- Earnings before finance expense, income tax expense, depreciation and amortization, impairments, foreign exchange losses, and gains on disposals (adjusted EBITDA), funds from operations, cash flow per share, discretionary cash flow, normalized earnings attributable to common shareholders, and normalized earnings per share are non-GAAP financial measures and do not have standardized meanings under GAAP and are, therefore, unlikely to be comparable to similar measures used by other enterprises. See Non-GAAP Financial Measures. Reconciliations of these non-GAAP financial measures to net income attributable to shareholders and net cash flows from operating activities are included in the Company's Management's Discussion and Analysis dated April 25, 2013, which is available under the Company's profile on SEDAR at www.SEDAR.com.

## Significant Events

#### \$200 million offering of 4.50% Cumulative Rate Reset Preference Shares

On March 14, 2013, Capital Power Corporation issued 8 million Cumulative Rate Reset Preference Shares, Series 5 (Series 5 Shares) at \$25 per share for aggregate gross proceeds of \$200 million on a bought deal basis with a syndicate of underwriters.

The Series 5 Shares will pay fixed cumulative preferential dividends of \$1.125 per share per annum, yielding 4.50% per annum, payable on the last business day of March, June, September and December each year, as and when declared by the Board of Directors of Capital Power Corporation, for the initial period ending June 30, 2018. The Series 5 Shares are subject to specified redemption, conversion and reset rights.

Standard & Poor's (a division of the McGraw Hill Companies, Inc.) (S&P) has assigned a rating of P-3 and DBRS Limited (DBRS) has assigned a rating of Pfd-3 (low) for these Series 5 Shares.

#### **Purchase of interest in Shepard Energy Centre**

The Company has entered into a series of agreements with ENMAX Corporation (ENMAX) to purchase a 50% interest in the 800 MW natural-gas-fuelled Shepard Energy Centre (Shepard) located on the eastern limits of the City of Calgary. Construction is scheduled for completion in the first quarter of 2015. On February 28, 2013, the purchase of the first tranche of the Company's interest in Shepard closed. Upon close of this transaction, the Company paid \$237 million and acquired a 25% interest in Shepard. The total amount incurred by the Company to the date of close was \$287 million compared with the total anticipated capital cost of \$860 million. The second tranche, expected to close in the first quarter of 2014, will result in the Company's acquisition of an additional 25% interest in Shepard bringing its total ownership interest to 50%. Subsequent to the close of the first tranche, and prior to the close of the second tranche, all decisions related to Shepard will require unanimous approval by the Company and ENMAX. As a result, the Company jointly controls Shepard with ENMAX upon close of the first tranche. Based on the terms of the Shepard agreements, the Company will account for the Shepard joint arrangement, under the new accounting standard for joint arrangements, as a joint operation.

#### **Analyst Conference Call and Webcast**

Capital Power will be hosting a conference call and live webcast with analysts on April 29, 2013 at 11:00 AM (ET) to discuss first quarter results. The conference call dial-in numbers are:

```
(604) 681-8564 (Vancouver)
(403) 532-5601 (Calgary)
(416) 623-0333 (Toronto)
(514) 687-4017 (Montreal)
(855) 353-9183 (toll-free from Canada and USA)
```

Participant access code for the call: 21543#

A replay of the conference call will be available following the call at: (855) 201-2300 (toll-free) and entering conference reference number 956204# followed by participant code 21543#. The replay will be available until midnight on July 29, 2013.

Interested parties may also access the live webcast on the Company's website at <a href="https://www.capitalpower.com">www.capitalpower.com</a> with an archive of the webcast available following the conference call.

#### **Non-GAAP Financial Measures**

The Company uses (i) adjusted EBITDA, (ii) funds from operations, (iii) cash flow per share, (iv) discretionary cash flow, (v) normalized earnings attributable to common shareholders, and (vi) normalized earnings per share as financial performance measures. These terms are not defined financial measures according to GAAP and do not have standardized meanings prescribed by GAAP, and are, therefore, unlikely to be comparable to similar measures used by other enterprises. These measures should not be considered alternatives to gross income, net income, net income attributable of Shareholders of the Company, net cash flows from operating activities or other measures of financial performance calculated in accordance with GAAP. Rather, these measures are provided to complement GAAP measures in the analysis of the Company's results of operations from management's perspective. Reconciliations of adjusted EBITDA to net income, funds from operations to net cash flows from operating activities and normalized earnings attributable to common shareholders to net income attributable to common shareholders are contained in the Company's Management's Discussion and Analysis dated April 25, 2013 for the three months ended March 31, 2013 which is available under the Company's profile on SEDAR at www.SEDAR.com.

## **Forward-looking Information**

Forward-looking information or statements included in this press release are provided to inform the Company's shareholders and potential investors about management's assessment of Capital Power's future plans and operations. This information may not be appropriate for other purposes. The forward-looking information in this press release is generally identified by words such as will, anticipate, believe, plan, intend, target, and expect or similar words that suggest future outcomes.

Material forward-looking information in this press release includes information with respect to (i) expectations regarding future earnings; and (ii) expectations regarding the timing of, funding of, and costs for development projects and acquisitions.

These statements are based on certain assumptions and analyses made by the Company in light of its experience and perception of historical trends, current conditions and expected future developments, and other factors it believes are appropriate. The material factors and assumptions used to develop these forward-looking statements relate to: (i) electricity and other energy prices, (ii) performance, (iii) business prospects and opportunities including expected growth and capital projects, (iv) status and impact of policy, legislation and regulation, and (v) effective tax rates.

Whether actual results, performance or achievements will conform to the Company's expectations and predictions is subject to a number of known and unknown risks and uncertainties which could cause actual results and experience to differ materially from the Company's expectations. Such material risks and uncertainties are: (i) changes in electricity prices in markets in which the Company operates, (ii) changes in commodity prices in markets in which the Company operates and use of derivatives, (iii) regulatory and political environments including changes to environmental, financial reporting and tax legislation, (iv) power plant availability and performance including maintenance expenditures, (v) ability to fund current and future capital and working capital needs, (vi) acquisitions and developments including timing and costs of regulatory approvals and construction, (vii) changes in market prices and availability of fuel, and (vii) changes in general economic and competitive conditions. See Risks and Risk Management in the Company's December 31, 2012 annual Management's Discussion and Analysis for further discussion of these and other risks.

## Management's Discussion and Analysis

This management's discussion and analysis (MD&A), dated April 25, 2013, should be read in conjunction with the unaudited condensed interim consolidated financial statements of Capital Power Corporation and its subsidiaries for the three months ended March 31, 2013, the audited consolidated financial statements and MD&A of Capital Power Corporation for the year ended December 31, 2012, the annual information form of Capital Power Corporation dated March 14, 2013 and the cautionary statements regarding forward-looking information which begin on page 2. In this MD&A, any reference to the Company or Capital Power, except where otherwise noted or the context otherwise indicates, means Capital Power Corporation together with its subsidiaries.

In this MD&A, financial information for the three months ended March 31, 2013 and the three months ended March 31, 2012 is based on the unaudited condensed interim consolidated financial statements of the Company for such periods which were prepared in accordance with Canadian generally accepted accounting principles (GAAP) and are presented in Canadian dollars unless otherwise specified. In accordance with its terms of reference, the Audit Committee of the Company's Board of Directors reviews the contents of the MD&A and recommends its approval by the Board of Directors. The Board of Directors has approved this MD&A as of April 25, 2013.

## The Business and Corporate Structure

Capital Power is a growth-oriented North American independent power producer headquartered in Edmonton. Alberta. The Company develops, acquires, operates and optimizes power generation from a variety of energy sources. Capital Power owns more than 3,600 megawatts (MW) of power generation capacity at 16 facilities across North America and has rights to 371 MW through its interest in the acquired Sundance power purchase arrangement (acquired Sundance PPA). An additional 595 MW of owned generation capacity is under construction or in advanced development in Alberta and Ontario.

The Company's power generation operations and assets are owned by Capital Power L.P. (CPLP), a subsidiary of the Company. As at March 31, 2013, the Company directly and indirectly held approximately 21,750 million general partnership units and 46.699 million common limited partnership units of CPLP which represented approximately 71% of CPLP's total partnership units. EPCOR (in this MD&A, EPCOR refers to EPCOR Utilities Inc. collectively with its subsidiaries) held 28.441 million exchangeable common limited partnership units of CPLP representing approximately 29% of CPLP. CPLP's exchangeable common limited partnership units are exchangeable for common shares of Capital Power Corporation on a one-for-one basis. The general partner of CPLP is wholly-owned by Capital Power Corporation and EPCOR's representation on the Board of Directors does not represent a controlling vote. Accordingly, Capital Power Corporation controls CPLP and the operations of CPLP have been consolidated for financial statement purposes.

## **Corporate Strategy**

The Company's corporate strategy remains unchanged from that disclosed in its 2012 annual MD&A. During the three months ended March 31, 2013, the Company purchased the first tranche of its interest in Shepard Energy Centre (see Significant Events), continued construction and development of the Port Dover & Nanticoke and K2 wind projects, and continued the process of planning for the development of Capital Power Energy Centre. The Company also implemented an Enterprise Resource Planning system to support its strategic objectives.

## **Forward-looking Information**

Forward-looking information or statements included in this MD&A are provided to inform the Company's shareholders and potential investors about management's assessment of Capital Power's future plans and operations. This information may not be appropriate for other purposes. The forward-looking information in this MD&A is generally identified by words such as "will", "anticipate", "believe", "plan", "intend", "target", and "expect" or similar words that suggest future outcomes.

Material forward-looking information in this MD&A includes information with respect to: (i) expectations related to future earnings and funds from operations, (ii) expectations regarding the future pricing of electricity and market fundamentals in existing and target markets, (iii) expectations regarding fuel supply and pricing, (iv) expectations related to the Company's future cash requirements including interest and principal repayments, capital expenditures and dividends, (v) expectations for the Company's sources of funding, adequacy and availability of committed bank credit facilities and future borrowings, (vi) expectations regarding future growth and emerging opportunities in the Company's target markets including the focus on certain technologies, (vii) expectations regarding the timing of, funding of, and costs for existing, planned and potential development projects and acquisitions, (viii) expectations regarding plant availability, and (ix) expectations regarding capital expenditures for plant maintenance and other.

These statements are based on certain assumptions and analyses made by the Company in light of its experience and perception of historical trends, current conditions and expected future developments, and other factors it believes are appropriate. The material factors and assumptions used to develop these forward-looking statements relate to: (i) electricity and other energy prices, (ii) performance, (iii) business prospects and opportunities including expected growth and capital projects, (iv) status of and impact of policy, legislation and regulations, (v) effective tax rates, and (vi) other matters discussed under the Performance Overview and Outlook sections.

Whether actual results, performance or achievements will conform to the Company's expectations and predictions is subject to a number of known and unknown risks and uncertainties which could cause actual results and experience to differ materially from the Company's expectations. Such material risks and uncertainties are: (i) changes in electricity prices in markets in which the Company operates, (ii) changes in energy commodity market prices and use of derivatives, (iii) regulatory and political environments including changes to environmental, financial reporting and tax legislation, (iv) power plant availability and performance including maintenance expenditures, (v) ability to fund current and future capital and working capital needs, (vi) acquisitions and developments including timing and costs of regulatory approvals and construction, (vii) changes in market prices and availability of fuel, and (viii) changes in general economic and competitive conditions. See Risks and Risk Management in the Company's December 31, 2012 annual MD&A for further discussion of these and other risks.

Readers are cautioned not to place undue reliance on any such forward-looking statements, which speak only as of the date made. The Company does not undertake or accept any obligation or undertaking to release publicly any updates or revisions to any forward-looking statements to reflect any change in the Company's expectations or any change in events, conditions or circumstances on which any such statement is based, except as required by law.

#### **Performance Overview**

The Company measures its performance in relation to its corporate strategy through financial and non-financial targets that are approved by the Board of Directors. The measurement categories include corporate measures and core measures. The corporate measures are company-wide and include funds from operations and safety. The core measures are specific to certain groups of the Company and include plant operating margin and other operations measures, committed capital, construction and maintenance capital on budget and on schedule, and plant site safety.

#### Operational excellence

Performance measure	2013 full year target	Actual results for the three months ended March 31, 2013
Plant availability average	93% or greater	94%
Capital expenditures for plant maintenance, Genesee mine		
extension and other	\$105 million or lower	\$17 million
Maintenance and operating expenses	\$225 million to \$245 million	\$45 million

The Company's plant availability averaged 94% which reflected the relatively strong performance of all plants with the exception of Tiverton in the North East U.S. which experienced an outage in the first part of the quarter when the maintenance work that was originally scheduled to be performed in the last half of the year was completed.

Capital expenditures for maintenance of the plants and other for the three months ended March 31, 2013 were consistent with the 2013 full year target.

The maintenance and operating expenses target includes other raw materials and operating charges, staff costs and employee benefits expense and other administrative expenses for the Company's plants. The actual results for the three months ended March 31, 2013 were consistent with the target range for full year 2013.

#### Financial stability and strength

Performance measure	2013 full year target	Actual results for the three months ended March 31, 2013
Normalized earnings per share 1	\$1.20 to \$1.40	\$0.36
Funds from operations <sup>1</sup>	\$385 million to \$415 million	\$103 million
Cash flow per share 1	\$3.80 to \$4.20	\$1.04

Normalized earnings per share, funds from operations, and cash flow per share are non-GAAP measures. See Non-GAAP Financial Measures.

Actual financial results achieved in the three months ended March 31, 2013 were slightly below management expectations for the quarter but are on track to meet the 2013 financial targets.

#### Enhancing shareholders' value

Performance measure	2013 full year target	Status at March 31, 2013
Port Dover & Nanticoke wind project	Continue on budget of \$340 million and on time with commercial operation date in the fourth quarter of 2013	On track with target
K2 wind project	Environmental approvals received in 2013	On track with target
Shepard Energy Centre	Continue on budget of \$860 million	On track with target

These growth projects are all on track with target. Full notice to proceed on the Port Dover & Nanticoke wind project was received in April 2013.

## Outlook

The following discussion should be read in conjunction with the Forward-looking Information section of this MD&A which identifies the material factors and assumptions used to develop forward-looking information and their material associated risk factors.

The Company's forecast for average Alberta power prices in 2013 is lower than the average of \$65 per megawatt hour (MWh) experienced in 2012. Normalized earnings per share, as reflected in the 2013 targets and based on forecast power prices and spark spreads, was expected to be in the range of \$1.20 to \$1.40 for the full year. Based on the actual results for the first quarter of 2013 and the Company's forecast for the future three quarters, that expectation remains unchanged.

As at March 31, 2013, the forecast hedged positions and contracted prices from the baseload plants and acquired Sundance PPA in the Alberta commercial portfolio were:

Alberta commercial portfolio positions and power prices	April to December 2013	Full year 2014	Full year 2015
Percentage sold forward	52%	73%	48%
Contracted price 1	Mid-\$60 per MWh	High-\$50 per MWh	Mid-\$50 per MWh

The forecast average contracted prices may differ significantly from the future average realized prices as the hedged and unhedged positions have a varying mix of differently priced blocks of power. This impact is accentuated in 2014 which includes one contract-for-differences for 300 MW for the full year that is sold forward for peak periods only.

The 2013 results will include a full year of operations from the Quality Wind and Halkirk wind facilities which commenced operations in the fourth guarter of 2012.

The plant availability target for 2013 of 93% reflected scheduled maintenance outages at Genesee 1 and at Keephills 3. The outages at both Genesee 1 and Keephills 3 are scheduled for second quarter 2013.

The 2013 targets and forecasts are based on numerous assumptions including power and natural gas price forecasts. However, they do not include the effects of potential future acquisitions or development activities, or potential impacts from unplanned plant outages including outages at facilities of other market participants, and the related impacts on market power prices.

The Company's estimated 2013 capital expenditures in the following table only include expenditures for previously identified growth projects and exclude the cost of potential new development projects:

(unaudited, \$millions)		Year ended December
Capital expenditures – growth	Target completion date	31, 2013 estimated
Halkirk and Quality Wind post-commercial operations date	Completed 4 <sup>th</sup> quarter	
completion	2012	7
Port Dover & Nanticoke	4 <sup>th</sup> quarter 2013	272
K2 <sup>1</sup>	2015	30
Shepard Energy Centre	2015	335
		644

Capital Power entered into a partnership agreement to develop K2 which is expected to be in operation by 2015. The 2013 capital expenditures estimated for the K2 project consist primarily of the Company's estimated contribution towards the partnership's equity.

The most recent estimate for 2013 capital expenditures for growth projects has increased to \$644 million from \$635 million as was disclosed in the Company's December 31, 2012 MD&A. This increase is attributed primarily to timing changes on development funding for the K2 wind project. The total project estimated costs to completion date remain unchanged.

(unaudited, \$millions)  Capital expenditures – sustaining	Year ended December 31, 2013 estimated
Plant maintenance	75
Genesee mine maintenance <sup>1</sup>	7
Other	11
	93
Genesee mine lands	9
	102

Capital expenditures for Genesee mine maintenance represent only those capital expenditures funded by the Company for the Genesee mine operation.

Based on the actual expenditures for the three months ended March 31, 2013 and the current forecast for the last three guarters, estimated 2013 sustaining capital expenditures remain at \$102 million which is unchanged from the estimate included in the Company's December 31, 2012 MD&A.

As a result of revised Federal government coal regulations, the useful life of existing coal plants was effectively set at up to 50 years. Effective January 1, 2013, Capital Power has revised the useful lives of its coal plants in accordance with these regulations resulting in lower depreciation expense.

The Company is continuing to review its alternatives to provide funds to finance its growth projects. Those possible alternatives include the sale of a partial or whole interest in bundled wind assets, the Halkirk wind facility, the North East U.S assets, or other combinations of assets.

On April 2, 2013, a single-turbine fire occurred at Capital Power's Kingsbridge 1 wind-energy facility located in Ontario. There were no injuries or damages to public property and the fire was contained to a single turbine. Capital Power and the turbine manufacturer are currently investigating the cause of the fire and assessing future remedial or other actions including potential insurance recoveries.

## **Non-GAAP Financial Measures**

The Company uses (i) earnings before finance expense, income tax expense, depreciation and amortization. impairments, foreign exchange losses, and gains on disposals (adjusted EBITDA), (ii) funds from operations, (iii) cash flow per share, (iv) discretionary cash flow, (v) normalized earnings attributable to common shareholders, and (vi) normalized earnings per share as financial performance measures.

These terms are not defined financial measures according to GAAP and do not have standardized meanings prescribed by GAAP, and are therefore unlikely to be comparable to similar measures used by other enterprises. These measures should not be considered alternatives to operating income, net income, net income attributable to Shareholders of the Company, net cash flows from operating activities or other measures of financial performance calculated in accordance with GAAP. Rather, these measures are provided to complement GAAP measures in the analysis of the Company's results of operations from management's perspective.

## **Adjusted EBITDA**

Capital Power uses adjusted EBITDA to measure the operating performance of plants and categories of plants from period to period. For previously reported periods prior to the three months ended December 31, 2011, the Company defined EBITDA as earnings before finance expense, income tax expense and depreciation and amortization. Commencing with the Company's December 31, 2011 year-end, adjusted EBITDA was defined to also exclude impairments, foreign exchange losses and gains on disposals. Management believes that EBITDA, as a measure of plant operating performance, is more meaningful if results not related to plant operations such as impairments, foreign exchange losses and gains on disposals are excluded from the adjusted EBITDA measure. All comparative EBITDA amounts for quarters prior to those ended on December 31, 2011 were revised to reflect this change. A reconciliation of adjusted EBITDA to net income is as follows:

(unaudited, \$millions)			7	Three mon	ths ended			
	Mar 31 2013	Dec 31 2012	Sep 30 2012	Jun 30 2012	Mar 31 2012	Dec 31 2011	Sep 30 2011	Jun 30 2011
Revenues and other income	365	296	394	261	376	407	433	472
Energy purchases and fuel, other raw materials and operating charges, staff costs and employee benefits expense, and other administrative expenses	(230)	(223)	(243)	(196)	(224)	(257)	(294)	(360)
Adjusted EBITDA	135	73	151	65	152	150	139	112
Depreciation and amortization	(58)	(62)	(52)	(53)	(54)	(62)	(45)	(64)
Impairments	-	-	-	(74)	-	-	-	(43)
Foreign exchange losses	-	-	-	-	-	-	(7)	(4)
Operating income (loss)	77	11	99	(62)	98	88	87	1
Gains on disposals	-	15	-	-	-	93	-	-
Finance expense	(22)	(21)	(18)	(18)	(18)	(29)	(32)	(35)
Income tax recovery (expense)	(7)	14	(18)	22	(14)	-	(11)	12
Net income (loss)	48	19	63	(58)	66	152	44	(22)
Net income (loss) attributable to:								
Non-controlling interests	14	4	24	(26)	26	68	29	3
Shareholders of the Company	34	15	39	(32)	40	84	15	(25)
Net income (loss)	48	19	63	(58)	66	152	44	(22)

## **Funds from operations**

Capital Power uses funds from operations as a measure of the Company's ability to generate cash from its current operating activities to fund capital expenditures, debt repayments, dividends to the Company's shareholders and distributions to non-controlling interests. Funds from operations are net cash flows from operating activities, including finance and current income tax expenses, and excluding changes in working capital. The Company includes interest and current income tax expenses recorded during the period rather than interest and income taxes paid. The timing of cash receipts and payments of interest and income taxes and the resulting cash basis amounts are not comparable from period to period. The timing of cash receipts and payments also affects the period-to-period comparability of changes in operating working capital which are also excluded from funds from operations.

A reconciliation of net cash flows from operating activities to funds from operations is as follows:

(unaudited, \$millions)	Three months ended	d March 31
	2013	2012
Net cash flows from operating activities per Consolidated Statements of Cash		
Flows	146	99
Add (deduct) items included in calculation of net cash flows from operating activities per Consolidated Statements of Cash Flows:		
Interest paid	15	6
Miscellaneous financing charges paid and realized loss on the settlement of forward		
bond contracts included in other items	1	9
Income taxes paid	1	3
Change in non-cash operating working capital	(38)	26
	(21)	44
Finance expense excluding unrealized changes on interest rate derivative contracts and		
amortization and accretion charges	(21)	(26)
Current income tax expense	(1)	(1)
Funds from operations	103	116

#### Cash flow per share

Cash flow per share is calculated using the weighted average common shares of Capital Power Corporation and exchangeable common limited partnership units of CPLP that were outstanding during the period. The CPLP exchangeable common limited partnership units are exchangeable for common shares of Capital Power Corporation on a one-for-one basis.

(unaudited)	Three months ended	Three months ended March 31		
	2013	2012		
Funds from operations (\$millions)	103	116		
Weighted average common shares outstanding (millions)	70.15	59.18		
Weighted average exchangeable common limited partnership units of CPLP				
outstanding (millions)	28.44	38.22		
Weighted average shares and partnership units outstanding (millions)	98.59	97.40		
Cash flow per share (\$)	1.04	1.19		

## Discretionary cash flow

Capital Power uses discretionary cash flow as a measure of the Company's ability to pay dividends to its shareholders and distributions to CPLP's exchangeable common limited partnership unitholders from funds it generates from operations. The measure is calculated as funds from operations less sustaining capital expenditures.

(unaudited, \$millions)	Three months ended March 31		
	2013	2012	
Funds from operations	103	116	
Less sustaining capital expenditures	17	17	
Adjusted funds from operations	86	99	
Common share dividends declared	22	19	
Distributions to exchangeable common limited partnership unitholders of CPLP declared	9	12	
Preferred share dividends declared	3	1	
Total dividends and distributions declared	34	32	
Discretionary cash flow	52	67	

## Normalized earnings attributable to common shareholders and normalized earnings per share

The Company uses normalized earnings per share to measure performance by period on a comparable basis. Normalized earnings per share is based on earnings used in the calculation of earnings per share according to GAAP adjusted for items that are not reflective of performance in the period such as fair value changes, impairment charges, unusual tax adjustments, gains and losses on disposal of assets or unusual contracts, and foreign exchange loss on the translation of U.S. dollar denominated debt. A reconciliation of net income (loss) attributable to shareholders to normalized earnings attributable to common shareholders, and basic earnings (loss) per share to normalized earnings per share is as follows:

(unaudited, \$millions except basic				Three mon	ths ended			
earnings (loss) per share and number of common shares and normalized earnings per share)	Mar 31 2013	Dec 31 2012	Sep 30 2012	Jun 30 2012	Mar 31 2012	Dec 31 2011	Sep 30 2011	Jun 30 2011
Basic earnings (loss) per share	0.44	0.19	0.55	(0.50)	0.66	1.47	\$0.29	(0.67)
Net income (loss) attributable to shareholders of the Company per Consolidated Statements	24	45	20	(20)	40	0.4	45	(25)
of Income Preferred share dividends	34	15	39	(32)	40	84	15	(25)
	(3)	(2)	(1)	(2)	(1)	(2)	(1)	(2)
Earnings (loss) attributable to common shareholders	31	13	38	(34)	39	82	14	(27)
Unrealized changes in fair value of CPLP's derivative instruments	(6)	12	(4)	4	(12)	2	2	2
Unrealized changes in fair value of Capital Power Income L.P.'s (CPILP) derivative instruments	-	-	<u>-</u>	<u>-</u>	-	(1)	2	-

The consolidated financial highlights, except for adjusted EBITDA, normalized earnings attributable to common shareholders, normalized earnings per share, funds from operations, cash flow per share, and discretionary cash flow, were prepared in accordance with GAAP. See Non-GAAP Financial Measures.

#### Normalized earnings and normalized earnings per share

Refer to Results by Plant Category and Other and Consolidated Other Expenses and Non-Controlling Interests for detailed discussion of the results for the quarter on a comparative basis.

Normalized earnings per share reflects the period-over-period change in normalized earnings and the changes from period to period as the weighted average number of common shares outstanding increases and the net income attributable to non-controlling interests decreases.

#### **Funds from operations**

Funds from operations for the three months ended March 31, 2013 decreased in comparison to funds from operations for the three months ended March 31, 2012 consistent with the decrease in net income attributable to shareholders of the Company.

Diluted earnings per share was calculated after giving effect to share purchase options and the exchange of common limited partnership units of CPLP held by EPCOR which are exchangeable for common shares of Capital Power on a onefor-one basis.

## Significant Events

## \$200 million offering of 4.50% Cumulative Rate Reset Preference Shares

On March 14, 2013, Capital Power Corporation issued 8 million Cumulative Rate Reset Preference Shares. Series 5 (Series 5 Shares) at \$25 per share for aggregate gross proceeds of \$200 million on a bought deal basis with a syndicate of underwriters.

The Series 5 Shares will pay fixed cumulative preferential dividends of \$1.125 per share per annum, yielding 4.50% per annum, payable on the last business day of March, June, September and December each year, as and when declared by the Board of Directors of Capital Power Corporation, for the initial period ending June 30, 2018. The Series 5 Shares are subject to specified redemption, conversion and reset rights.

Standard & Poor's (a division of the McGraw Hill Companies, Inc.) (S&P) has assigned a rating of P-3 and DBRS Limited (DBRS) has assigned a rating of Pfd-3 (low) for these Series 5 Shares.

#### Purchase of interest in Shepard Energy Centre

The Company has entered into a series of agreements with ENMAX Corporation (ENMAX) to purchase a 50% interest in the 800 MW natural-gas-fuelled Shepard Energy Centre (Shepard) located on the eastern limits of the City of Calgary. Construction is scheduled for completion in the first quarter of 2015. On February 28, 2013, the purchase of the first tranche of the Company's interest in Shepard closed. Upon close of this transaction, the Company paid \$237 million and acquired a 25% interest in Shepard. The total amount incurred by the Company to the date of close was \$287 million compared with the total anticipated capital cost of \$860 million. The second tranche, expected to close in the first quarter of 2014, will result in the Company's acquisition of an additional 25% interest in Shepard bringing its total ownership interest to 50%. Subsequent to the close of the first tranche, and prior to the close of the second tranche, all decisions related to Shepard will require unanimous approval by the Company and ENMAX. As a result, the Company jointly controls Shepard with ENMAX upon close of the first tranche. Based on the terms of the Shepard agreements, the Company will account for the Shepard joint arrangement, under the new accounting standard for joint arrangements, as a joint operation.

Electricity generation reflects the Company's share of plant output.

Plant availability represents the percentage of time in the period that the plant was available to generate power regardless of whether it was running, and therefore is reduced by planned and unplanned outages.

<sup>3</sup> In this summary, plant revenue represents revenue generated directly from plant activity and does not include portfolio or mark-to-market generated revenue.

<sup>4</sup> Genesee 3 returned to service on January 15, 2012 after an unscheduled outage which commenced on November 11,

<sup>5</sup> Halkirk and Quality Wind include pre-commissioning output until commissioning dates of December 1, 2012 and November 6, 2012 respectively. Revenues and expenses related to commissioning activities were capitalized as part of the cost of the facility in property, plant and equipment.

Brown Lake and Miller Creek were disposed of on October 12, 2012.

The energy sources for the Roxboro and Southport plants are wood waste, tire-derived fuel and coal.

## **Portfolio Optimization**

The significant positions and results of portfolio optimization activities were as follows:

		Three months ended March 31		Year ended
	Unit	2013	2012	December 31, 2012
Alberta portfolio				
Hedged position <sup>1</sup>	Percentage sold forward at beginning of period (%)	49	48	48
Realized power price <sup>2</sup>	\$/MWh	69	83	72
Spot power price averages	\$/MWh	65	60	64
North East U.S portfolio				
Hedged position	Approximate average percentage hedged at the beginning of the period (%)	72	46	46

Hedged position is for the Alberta baseload plants and acquired Sundance PPA.

## **Consolidated Net Income**

The primary factors contributing to the change in net income for the three months ended March 31, 2013 compared with the three months ended March 31, 2012 are presented below; detailed analysis of these items can be found in the Results by Plant Category and Other and the Consolidated Other Expenses and Noncontrolling Interests sections.

(unaudited, \$ millions)	
Consolidated net income for the three months ended March 31, 2012	66
Increase in adjusted EBITDA for Ontario and British Columbia contracted plants	10
Decrease in adjusted EBITDA for North East U.S. commercial plants and portfolio optimization	(9)
Decrease in adjusted EBITDA for other portfolio activities	(9)
Decrease in net unrealized gains on forward bond contracts included in finance expense	(9)
Decrease in realized losses on settled forward bond contracts included in finance expense	8
Decrease in adjusted EBITDA for Alberta commercial plants and portfolio optimization	(6)
Increase in depreciation and amortization expense	(4)
Increase in finance expense excluding bond forward contracts	(3)
Other	(3)
Decrease in income before tax	(25)
Decrease in income tax expense	7
Decrease in net income	(18)
Consolidated net income for the three months ended March 31, 2013	48

Realized power price is the average price realized on the Company's commercial contracted sales and portfolio optimization activities.

## Results by Plant Category and Other

The Company reports results of operations in the following categories: (i) Alberta commercial plants, acquired Sundance PPA and portfolio optimization, (ii) Alberta contracted plants, (iii) Ontario and British Columbia contracted plants, (iv) North East U.S. commercial plants and portfolio optimization, (v) North Carolina U.S. contracted plants, (vi) Other portfolio activities, and (vii) Corporate.

Alberta commercial plants, acquired Sundance PPA and portfolio optimization includes Halkirk as of its date of commissioning of December 1, 2012. Revenues and expenses related to commissioning activities, prior to the dates of commissioning, were capitalized as part of the cost of the facility.

The results by plant category and other, except for adjusted EBITDA, were prepared in accordance with GAAP. See Non-GAAP Financial Measures.

	Three months ende	Three months ended March 31		
Spot price averages	2013	2012		
Alberta power (\$/MWh)	65	60		
New England mass hub (US\$/MWh)	86	33		
Alberta natural gas (AECO) (\$/gigajoule (Gj)) 1	3.03	2.06		

AECO means a historical virtual trading hub located in Alberta and known as the Nova Inventory Transfer System operated by TransCanada Pipelines Limited.

Ontario and British Columbia contracted plants include Quality Wind as of its date of commissioning of November 6, 2012. Revenues and expenses related to commissioning activities, prior to the dates of commissioning, were capitalized as part of the cost of the facility.

#### Alberta commercial plants, acquired Sundance PPA and portfolio optimization

	Three months ended March 31	
Alberta commercial plants, acquired Sundance PPA and portfolio optimization <sup>1</sup>	2013	2012
Electricity generation (GWh)	1,911	1,651
Availability (%)	97	93
Revenues and other income (unaudited, \$ millions)	150	179
Adjusted EBITDA (unaudited, \$ millions) 2	81	87

Alberta commercial plants, acquired Sundance PPA and portfolio optimization includes the Company's interest in the acquired Sundance PPA.

For the three months ended March 31, 2013, production increased 260 GWh compared with the corresponding period of 2012 primarily due to the addition of Halkirk and higher production at all the Company-owned Alberta commercial plants. The increased production was consistent with the increased availability and also reflected the quarter-over-quarter increase due to the 2012 first quarter Genesee 3 outage that started in late 2011 and continued to January 15, 2012.

The average Alberta spot power price was \$65/MWh for the three months ended March 31, 2013 which reflected slightly higher spot prices compared with the corresponding period of 2012 which had an average spot price of \$60/MWh. Prices were relatively low in January and February 2013 but significantly increased in March 2013.

Lower revenues for the three months ended March 31, 2013 compared with the same period in 2012 reflected the impact of lower realized power prices based on portfolio optimization activities.

The decrease in adjusted EBITDA for the three months ended March 31, 2013 compared with the corresponding period in 2012 was primarily driven by the portfolio optimization strategies employed by the Company for the three months ended March 31, 2012. The addition of Halkirk increased adjusted EBITDA on a quarter-over-quarter basis and partly offset the decreased adjusted EBITDA from portfolio optimization activities.

#### Alberta contracted plants

	Three months ended March 31	
Alberta contracted plants	2013	2012
Electricity generation (GWh)	1,595	1,657
Availability (%)	95	98
Revenues and other income (unaudited, \$ millions)	69	75
Adjusted EBITDA (unaudited, \$ millions) 1	44	45

The financial results by plant category, except for adjusted EBITDA, were prepared in accordance with GAAP. See Non-GAAP Financial Measures.

For the three months ended March 31, 2013, the operational and financial results for the Alberta contracted plants were relatively consistent with the results for the same period in 2012 as no significant changes in operations were experienced.

## **Ontario and British Columbia contracted plants**

	Three months ende	Three months ended March 31		
Ontario and British Columbia contracted plants	2013	2012		
Electricity generation (GWh)	145	122		
Availability (%)	99	100		
Revenues and other income (unaudited, \$ millions)	25	14		
Adjusted EBITDA (unaudited, \$ millions) 1	20	10		

The financial results by plant category, except for adjusted EBITDA, were prepared in accordance with GAAP. See Non-GAAP Financial Measures.

For the three months ended March 31, 2013 compared with the same period in 2012, increased generation, revenues and adjusted EBITDA reflected the addition of Quality Wind which commenced commercial operations in the fourth quarter of 2012. Wind volumes at Quality Wind were in line with expectations. Although Island Generation did not run during the first quarter of 2013, the plant availability was 100% which resulted in revenues and adjusted EBITDA being based on strong deemed generation consistent with the first quarter of 2012.

The financial results by plant category, except for adjusted EBITDA, were prepared in accordance with GAAP. See Non-GAAP Financial Measures.

#### North East U.S. commercial plants and portfolio optimization

	Three months ended March 31		
North East U.S. commercial plants	2013	2012	
Electricity generation (GWh)	993	1,329	
Availability (%)	86	98	
Revenues and other income (unaudited, \$ millions)	78	59	
Adjusted EBITDA (unaudited, \$ millions) 1	4	13	

The financial results by plant category, except for adjusted EBITDA, were prepared in accordance with GAAP. See Non-**GAAP** Financial Measures.

For the three months ended March 31, 2013, the three New England plants and related portfolio optimization contributed \$4 million to the Company's adjusted EBITDA. The Bridgeport plant experienced higher generation and higher realized prices resulting in improved results for the first quarter of 2013 compared with 2012 dampened by the impact of the February 2013 major winter storm. The Tiverton plant experienced an outage in the first part of the quarter when the maintenance work that was originally scheduled to be performed in the last half of the year was completed.

#### North Carolina U.S. contracted plants

	Three months ended March 31		
North Carolina U.S contracted plants	2013	2012	
Electricity generation (GWh)	147	158	
Availability (%)	96	96	
Revenues and other income (unaudited, \$ millions)	15	18	
Adjusted EBITDA (unaudited, \$ millions) 1	1	2	

The financial results by plant category, except for adjusted EBITDA, were prepared in accordance with GAAP. See Non-GAAP Financial Measures.

For the three months ended March 31, 2013, the performance of the North Carolina U.S. contracted plants was overall consistent with the results for the comparable guarter of 2012 with a slight decrease due to decreased availability of wood fuel for the Southport plant and lower renewable energy credits (REC) pricing. The REC pricing will be lower throughout 2013 and 2014 with increased pricing in 2015.

#### Other portfolio activities

	Three months end	led March 31
Other portfolio activities	2013	2012
Revenues and other income (unaudited, \$ millions)	19	12
Adjusted EBITDA (unaudited, \$ millions) 1	(2)	7

The financial results by plant category, except for adjusted EBITDA, were prepared in accordance with GAAP. See Non-GAAP Financial Measures.

Adjusted EBITDA for the three months ended March 31, 2013 reflected natural gas trading losses partly offset by the impact of a reduction in the provision for estimated future losses on certain natural gas contracts. During the three months ended March 31, 2012, the increase to adjusted EBITDA of a similar reduction in this provision was greater and natural gas trading gains were experienced.

#### Corporate

	Three months ende	d March 31
Corporate	2013	2012
Revenues and other income (unaudited, \$ millions)	-	6
Adjusted EBITDA (unaudited, \$ millions) 1	(26)	(25)

The financial results by plant category, except for adjusted EBITDA, were prepared in accordance with GAAP. See Non-GAAP Financial Measures.

Corporate includes revenues for cost recoveries, the cost of support services such as treasury, finance, internal audit, legal, human resources, corporate risk management, asset management, and environment, health and safety as well as business development expenses. The cost recovery revenues are primarily intercompany revenues which are offset by interplant category transactions in the consolidated results.

Adjusted EBITDA was consistent for first quarter 2013 compared with first quarter 2012.

#### Unrealized changes in fair value of energy derivative instruments and Atlantic Power shares

Unrealized changes in fair value of energy derivative instruments and Atlantic	Three months ended March 31		
Power shares	2013	2012	
Revenues and other income (unaudited, \$ millions)	11	14	
Adjusted EBITDA (unaudited, \$ millions) 1	13	13	

The financial results by plant category, except for adjusted EBITDA, were prepared in accordance with GAAP. See Non-GAAP Financial Measures.

The Company's financial results relating to its Alberta commercial plants and portfolio optimization, North East U.S. commercial plants and portfolio optimization, and other activities include unrealized changes in the fair value of energy derivative instruments and, until its disposal in February 2012, the Company's investment in Atlantic Power.

When a derivative instrument contract settles, the unrealized fair value changes recorded in prior periods for that contract are reversed and included in this category. The gain or loss realized upon settlement is reflected in adjusted EBITDA for the appropriate plant portfolio optimization or Corporate category.

(\$ millions)	Three	months er	nths ended March 31				
	2013	2012	2013	2012			
Unrealized changes in fair value of energy derivative instruments and Atlantic Power shares	Revenues and other income		Adjusted E	BITDA			
Unrealized gains (losses) on Alberta energy derivatives	(2)	11	1	8			
Unrealized gains on Bridgeport heat rate option	9	5	9	5			
Unrealized gains on natural gas derivatives	4	2	3	4			
(Reversal) of unrealized gain on Atlantic Power shares	-	(5)	-	(5)			
Other	-	1	-	1			
	11	14	13	13			

Alberta desk electricity portfolio activity in the three months ended March 31, 2013 accounted for an unrealized net gain of \$1 million. The gain was primarily attributable to the reversal of previously recognized unrealized net losses, partly offset by the impact of increasing Alberta forward power prices on the portfolio position. During the three months ended March 31, 2012, the Company recognized an unrealized net gain of \$8 million, which reflected decreasing Alberta forward prices on the portfolio position.

Upon acquisition of the New England plants in the second quarter of 2011, the Company acquired heat rate options related to the Bridgeport facility. During the three months ended March 31, 2013, the Company recognized an unrealized net gain of \$9 million on the Bridgeport heat rate options. This gain primarily reflected the reversal of the 2012 unrealized loss. In the first quarter of 2012, the Company recognized an unrealized net gain of \$5 million which primarily resulted from the decreases in the underlying forward power prices.

Natural gas portfolio activities during the first quarter of 2013 accounted for an unrealized net gain of \$3 million and a net gain of \$4 million in 2012. This primarily reflected the impact of fluctuating forward natural gas prices on changes in the portfolio position during each of the quarters.

In the first quarter of 2012, the Company sold its investment in Atlantic Power shares resulting in an unrealized loss of \$5 million representing the reversal of the unrealized gain which was recorded in the fourth quarter of 2011. The sale resulted in a realized gain of \$4 million which was included in the Corporate category.

## **Consolidated Other Expenses and Non-controlling Interests**

(unaudited, \$ millions)	Three months ended March 31		
	2013	2012	
Interest on borrowings less capitalized interest	(20)	(16)	
Realized losses on the settlement of forward bond contracts	=	(8)	
Other finance expense – sundry interest and guarantee and other fees	(1)	(2)	
	(21)	(26)	
Reversal of previously recognized unrealized losses representing changes in the fair value of forward bond contracts	-	9	
Other finance expense – amortization and accretion charges	(1)	(1)	
Total finance expense	(22)	(18)	
Depreciation and amortization	(58)	(54)	
Income tax expense	(7)	(14)	
Net income attributable to non-controlling interests	(14)	(26)	

#### Finance expense

Higher finance expense for the three months ended March 31, 2013 compared with the three months ended March 31, 2012 was primarily due to increased borrowings related to capital projects and the varying levels of capitalized interest as certain projects have been completed and other projects have commenced.

#### Depreciation and amortization

Depreciation and amortization for the three months ended March 31, 2013 increased \$4 million compared with the same period in the prior year primarily due to the addition of depreciation on the Halkirk facility which commenced operations in the fourth quarter of 2012 partly offset by decreases due to the revised useful lives of coal plants in accordance with the federal regulations.

#### Income tax expense

Income tax expense for the three months ended March 31, 2013 decreased \$7 million compared with the same period in the prior year primarily due to lower pre-tax income.

#### Non-controlling interests

For the three months ended March 31, 2013, approximately 29% (three months ended March 31, 2012 - 39%) of CPLP's net income was attributable to EPCOR which is reported as net income attributable to non-controlling interests by the Company. EPCOR's April 5, 2012 exchange of exchangeable common limited partnership units for common shares of Capital Power reduced its interest in CPLP from 39% to 29% which reduces the proportion of net income attributable to non-controlling interests reported by the Company in future periods. Net income attributable to non-controlling interests also included the Genesee coal mine partner's share of the consolidated depreciation of coal costs.

## **Other Comprehensive Income**

(\$ millions)	Three months ended March 31			
	201	3	2012	
Other comprehensive income	Before tax	After tax	Before tax	After tax
Net unrealized gains (losses) on derivatives designated as cash flow hedges	(5)	(4)	28	24
Net realized (gains) losses and ineffective portion of unrealized (gains) losses on cash flow hedges reclassified to revenues and/or energy				
purchases and fuel	(6)	(5)	(10)	(9)
	(11)	(9)	18	15
Unrealized foreign exchange gains (losses) on the translation of				
foreign operations	9	9	(10)	(10)
	(2)	-	8	5
Income taxes on above items	2	n/a	(3)	n/a
	-	-	5	5

For the three months ended March 31, 2013, net unrealized losses (after income taxes) on derivative instruments designated as cash flow hedges (for the effective portion) of \$4 million compared with net unrealized gains of \$24 million for the same period in 2012 were recorded in other comprehensive income. Net realized gains (after income taxes) of \$5 million for the three months ended March 31, 2013 and \$9 million for the three month's ended March 31, 2012 were reclassified to revenues and energy purchases and fuel, as appropriate. For the three months ended March 31, 2013, net unrealized gains (after income taxes) of \$9 million and, for the three months ended March 31, 2012, net unrealized losses (after income taxes) of \$10 million representing foreign exchange losses on the translation of foreign operations were also recorded in other comprehensive income.

## **Financial Position**

The significant changes in the Consolidated Statements of Financial Position from December 31, 2012 to March 31, 2013 were as follows:

(unaudited, \$ millions)	March 31, 2013	December 31, 2012	Increase (decrease)	Explanation of increase (decrease)
Trade and other receivables	287	354	(67)	Primarily due to reclassification of Shepard deposit to property, plant and equipment, the timing of the settlement of sales receivables, and the accrued refund from the Quality Wind turbine manufacturer partly offset by higher sales receivables from the Alberta Electric System Operator resulting from higher realized power prices.
Other financial assets – non- current	67	60	7	Payment of K2 cash call.
Intangible assets	338	316	22	Primarily due to purchase of emission credits.
Property, plant and equipment	3,894	3,628	266	Primarily due to capital additions (most significantly, Shepard) net of the refund related to Quality Wind partly offset by depreciation and amortization.
Trade and other payables	240	210	30	Primarily due to increase in capital trade payables related to the Shepard project and increased accruals resulting from the Tiverton plant outage.
Loans and borrowings (including current portion)	1,635	1,659	(24)	Primarily due to repayment of credit facilities.
Provisions (including current portion)	226	238	(12)	Primarily due to the settlement of accruals for 2012 short-term incentive.
Share capital	2,106	1,903	203	Preferred shares issued.

## **Liquidity and Capital Resources**

(unaudited, \$ millions)	Three months ended Mar	ch 31	
Cash inflows (outflows)	2013	2012	Increase (decrease)
Operating activities	146	99	47
Investing activities	(295)	(86)	(209)
Financing activities	134	53	81

#### Operating activities

Cash flows from operating activities increased on a quarter-over-quarter basis primarily due to operating working capital changes particularly changes in trade and other receivables and trade and other payables balances.

#### Investing activities

The cash flows used in investing activities for the three months ended March 31, 2013 included \$293 million for capital expenditures.

#### Capital expenditures

(unaudited, \$ millions)	Pre-	Three months ended March	Actual or Projected <sup>1,</sup>		
	2013	31, 2013	3	Budget	Timing
Quality Wind	419	(8)	405 to 415	455	Completed 4 <sup>th</sup> quarter 2012
Halkirk	314	6	325 to 335	357	Completed 4 <sup>th</sup> quarter 2012
Port Dover & Nanticoke	68	17	340	340	Projected completion 4 <sup>th</sup> quarter 2013
K2	3	8	291	291	Projected completion 2015
Shepard Energy Centre	50	232	860	860	Projected completion 2015
Subtotal growth projects		255			
Sustaining – plant maintenance and other		14			
Sustaining – Genesee mine lands		3			
Total capital expenditures <sup>2</sup>		272			
Emission credits		23			
Capitalized interest		(2)			
Net payments to acquire property, plant and equipment and other					
assets		293			

Capital expenditures to be incurred over the life of the project are based on management's estimates.

Sustaining capital expenditures include spending on plant maintenance, the Genesee mine, and information technology.

<sup>2</sup> Capital expenditures include capitalized interest. Capital expenditures excluding capitalized interest are presented on the Statement of Cash Flows as payments to acquire property, plant and equipment and other assets.

Costs for projects completed in 2012 include certain costs that are expected to be incurred subsequent to the date of commercial operations such as site remediation, vendor optimization, project clean-up and project close-out costs.

#### Financing activities

The cash flows from financing activities during the three months ended March 31, 2013 primarily reflected the \$200 million proceeds on the March 2013 preferred share issue partly offset by debt repayments of \$31 million and distributions and dividends paid of \$19 million.

The Company's credit facilities consisted of:

(\$ millions)	•	As	at March 31,	2013	As at	As at December 31, 2012		
	Maturity timing	Total facilities	Credit facility utilization	Available	Total facilities	Credit facility utilization	Available	
CPLP committed credit facility	2017	1,200	289	911	1,200	341	859	
CPLP demand facility	n/a	20	_	20	20	-	20	
Capital Power Corporation demand facility	n/a	5	-	5	5	-	5	
		1,225	289	936	1,225	341	884	

As at March 31, 2013, the committed credit facility utilization consisted of \$184 million in letters of credit outstanding, \$48 million in bankers' acceptances outstanding and \$57 million in U.S. dollar bank loans. This reflects a decrease of \$23 million in letters of credit outstanding, a reduction of \$56 million in bankers' acceptances and an increase of \$27 million in U.S. dollar bank loans since December 31, 2012. In July 2012, the committed credit facilities were amended to include an accordion feature to increase the facility size by \$300 million in the future, subject to certain conditions including lender approval.

The available credit facilities will provide the Company with adequate funding for ongoing development projects.

The loan and credit agreements require CPLP to meet certain financial covenants, including maintaining a consolidated senior debt to consolidated capitalization ratio of not more than 0.75 to 1.0 as at the end of any fiscal quarter. In addition, in the event that CPLP is assigned a credit rating by S&P that is less than BBB- or by DBRS that is less than BBB(low) (in each case with a stable outlook), then CPLP must also maintain a ratio of consolidated EBITDA to consolidated interest expense (each as defined in the credit agreements) of not less than 2.5 to 1.0 as at the end of each fiscal quarter.

On November 16, 2012, S&P revised CPLP's corporate credit rating from BBB to BBB- with a stable outlook, The BBB- rating assigned by S&P is an investment grade credit rating. According to S&P, a BBB- corporate credit rating exhibits adequate capacity to meet financial commitments. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitments.

CPLP has received a long-term debt credit rating of BBB from DBRS. The BBB rating assigned by DBRS is the fourth highest rating of DBRS' ten rating categories for long-term debt obligations. According to DBRS, long-term debt rated BBB is of adequate credit quality. The capacity of the payment of financial obligations is considered acceptable but the entity is vulnerable to future events. A BBB rating is an investment grade credit rating, which enhances CPLP's ability to re-finance existing debt as it matures and to access cost competitive capital for future arowth.

#### **Future cash requirements**

The following estimates of future cash requirements are subject to variable factors including those discussed in Forward-looking Information. Capital Power's estimated cash requirements for 2013 are expected to include approximately \$746 million for capital expenditures, approximately \$36 million for CPLP distributions to EPCOR (subject to approval by the Board of Directors of CPLP's general partner), approximately \$85 million for Capital Power's common share dividends, and approximately \$20 million for quarterly preferred share dividends (subject to approval by Capital Power Corporation's Board of Directors). Effective January 1, 2012, the Company launched a Dividend Re-investment Plan where shareholders may elect to reinvest their quarterly cash dividends for additional shares of Capital Power as an alternative to receiving cash dividends. The participation rate in the Dividend Re-investment Plan was approximately 28% for 2012 dividend and depending on the participation rate for 2013, cash requirements for common share dividends may differ from the above expectations.

The current portion of loans and borrowings on the statement of financial position of \$19 million consists primarily of \$14 million payable to EPCOR in 2013.

The Company expects to fund the construction of the Port Dover & Nanticoke, Shepard Energy Centre and K2 projects using existing bank credit facilities, cash flows from operating activities, and proceeds from any asset disposals. When construction is complete, the Company expects to put long-term financing in place. The Company's other cash requirements identified above are expected to be funded with cash on hand, cash flows from operating activities, and use of existing bank credit facilities.

The Company's two short form base shelf prospectuses provide, market conditions permitting, the Company with the ability to obtain new debt and equity capital from external markets when required for a major investment. Under the short form base shelf prospectuses, Capital Power may raise up to \$2 billion by issuing common shares, preferred shares, or subscription receipts exchangeable for common shares or other securities of the Company, and up to \$1 billion by issuing medium-term notes with maturities of not less than one year. As of the date of this MD&A, Capital Power has approximately \$1.4 billion of equity and \$1.0 billion of debt available under these short form base shelf prospectuses.

Financial market stability remains an issue. If instability reoccurs in the Canadian and U.S. financial markets. CPLP's ability to raise new capital, to meet its financial requirements, and to refinance indebtedness under existing credit facilities and debt agreements may be adversely affected. CPLP has credit exposure relating to various agreements, particularly with respect to its PPA, trading and supplier counterparties. While CPLP continues to monitor its exposure to its significant counterparties, there can be no assurance that all counterparties will be able to meet their commitments.

#### Off-statement of financial position arrangements

The Company has off-statement of financial position arrangements including operating leases and \$184 million of outstanding letters of credit for collateral support for trading operations, conditions of certain service agreements and to satisfy legislated reclamation requirements. If the Company were to terminate these offbalance sheet arrangements, the penalties or obligations would not have a material impact on the Company's financial condition, results of operations, liquidity, capital expenditures or resources.

### Capital resources

(unaudited, \$ millions)	As at	
	March 31, 2013	December 31, 2012

Retained earnings and other reserves	31	20
Total equity	2,973	2,752
Total capital	4,569	4,358

#### Shareholder Rights Plan

On November 21, 2012, Capital Power announced that its Board of Directors approved a Shareholder Rights Plan (Rights Plan) effective November 20, 2012. The objective of the Rights Plan is to ensure, to the extent possible, the fair treatment of all shareholders in connection with any take-over bid for the securities of the Company, and to provide the Board with sufficient time to evaluate unsolicited take-over bids and to explore and develop alternatives to maximize shareholder value. The Rights Plan will be presented to shareholders for ratification at Capital Power's annual meeting on April 26, 2013 and, if ratified, will continue in force until the end of the annual meeting of shareholders in 2016 subject to any changes in securities requirements. The Rights Plan will expire at the termination of the April 26, 2013 annual meeting of shareholders if not ratified by the shareholders.

## **Contractual Obligations and Contingent Liabilities**

There were no changes to the Company's purchase obligations and commitments since December 31, 2012 that would be material to the Company's business or financial position. For further information on contractual obligations, refer to the Company's December 31, 2012 MD&A.

#### **Contingent liabilities**

Capital Power is participating in a proceeding underway before the Alberta Utilities Commission (AUC) regarding factors that form the basis for certain transmission charges paid by Alberta generators including Capital Power. On April 16, 2012, the AUC issued its decision that the factors utilized from 2006 to the present time were noncompliant with the applicable legislation and regulations. Capital Power and other Alberta generators subsequently submitted applications to review and vary that decision. On April 23, 2013, the AUC issued its subsequent decision that there is substantial doubt regarding the correctness of the previous decision. The AUC has advised that a future proceeding will determine whether the initial decision should be varied and, if so, how, This includes the potential application of alternative factors on a prospective or retrospective basis. Capital Power may incur additional payments for transmission charges on a retrospective and go-forward basis but a provision has not been recorded in the Company's financial statements since the outcome of the proceeding is not known. It is anticipated that the AUC's decision may be issued no sooner than the first quarter of 2014.

In July 2012, the Sundance plant owner made a force majeure claim for \$39 million with respect to the 2011 third quarter outage of Unit 6 due to a transformer failure. The Company has a 52% interest in the Sundance PPA for Units 5 and 6 and thus is contractually responsible for paying its share of the claimed amount in advance of final determination of whether or not a force majeure situation, as specified in the PPA, occurred. Accordingly, Capital Power paid its share of the claimed amount and, based on the Company's view that the claim will not meet the PPA specified force majeure tests, recorded it as an amount receivable until final resolution of the claim. The claim currently is under arbitration and an arbitration decision is not expected until 2014. The Company currently has recorded \$20 million as accounts receivable on its March 31, 2013 statement of financial position. In the event that the arbitration decision results in an adverse impact to the Company, the \$20 million account receivable amount may not be fully realized. If not realized, the resulting loss would be reduced by estimated insurance recoveries of up to \$3 million.

Upon close of the sale of the Company's hydro facilities, \$10 million of the gross proceeds were paid to a third party escrow agent. These funds have been held in escrow pending the issuance of a new lease. by the Province of British Columbia to the purchaser, Innergex Renewable Energy Inc. (Innergex), in respect of certain lands included in the hydro assets. As long as the new lease does not contain variations from the previous lease that significantly impact the economic value of the hydro assets, the escrow amount will be released to the Company. In April 2013, the revised new lease was received and Capital Power believes that the terms of the new lease substantially align with the previous lease. Thus, the Company expects to receive substantially all the escrow payment pending acceptance of the new lease by Innergex.

In the normal course of Capital Power's operations, it may become involved in various legal proceedings including arbitration of the interpretation of any contract. The outcome with respect to outstanding, pending or future proceedings cannot be predicted with certainty. However, the Company does not believe that the outcome of any claims or potential claims of which it is aware will have a material adverse effect on Capital Power's financial condition and results of operations.

## **Transactions with Related Parties**

Trade and other payables	(b)	14	17		
Provision for future maintenance costs associated with EPCOR's Rossdale plant	(d)	4	4		
Loans and borrowings	(c)	357	357		
The City of Edmonton (sole shareholder of EPCOR)					
Trade and other receivables	(b)	3	7		

- (a) As at March 31, 2013 and December 31, 2012, EPCOR owned 28.441 million exchangeable common limited partnership units of CPLP (representing approximately 29% of CPLP), and 28.441 million accompanying special voting shares and one special limited voting share of Capital Power Corporation. In connection with EPCOR's unitholdings, CPLP paid distributions to EPCOR for the three months ended March 31, 2013 and 2012.
- (b) The power sales and purchase of other services transactions with EPCOR and the City of Edmonton were in the normal course of operations and were recorded at the exchange amounts which were based on normal commercial rates. The Company has a lease agreement with EPCOR for office space that requires payment to EPCOR of \$4 million per year through 2031.
- (c) The Company's unsecured senior debt payable to EPCOR, at interest rates ranging from 5.80% to 9.00% per annum, matures between 2013 and 2018. If EPCOR no longer owns, directly or indirectly, at least 20% of the outstanding common limited partnership units of CPLP, then EPCOR may, by written notice, require repayment of all or any portion of the outstanding principal amount of this debt and accrued interest thereon. If the principal amount specified in such repayment is less than \$200 million, then it and the accrued interest thereon shall be payable 180 days after delivery of notice, and if it is \$200 million or more, then it and the accrued interest thereon shall be payable 365 days after delivery of notice.
- (d) The Rossdale plant, which is owned by EPCOR, was taken out of service in January 2009 and was decommissioned. Certain structures at the plant site were designated as Provincial Historical Resources by the Province of Alberta and are thereby legally protected from demolition. These structures, and additional structures at the plant site, are also on the City of Edmonton's Register of Historic Resources. CPLP has an obligation to EPCOR to share in some of the costs for ongoing operations and maintenance of the Rossdale plant and related assets until 2019.

## **Risks and Risk Management**

There have been no material changes in the three months ended March 31, 2013 to the Company's business and operational risks as described in the Company's December 31, 2012 MD&A.

#### **Environmental Matters**

The Company has recorded decommissioning provisions of \$177 million as at March 31, 2013 (\$173 million as at December 31, 2012) for its generation plants and the Genesee coal mine as it is obliged to remove the facilities at the end of their useful lives and restore the plant and mine sites to their original condition. Decommissioning provisions for the coal mine are incurred over time as new areas are mined, and a portion of the liability is settled over time as areas are reclaimed prior to final pit reclamation.

The Company is obligated to purchase environmental credits totaling approximately \$56 million in future years and expects to use these credits to comply with certain environmental regulations.

## **Critical Accounting Estimates and Accounting Judgments**

The preparation of the Company's consolidated financial statements in accordance with GAAP requires that management makes estimates, judgments and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses in the consolidated financial statements and the disclosure of contingent assets and liabilities at the date of the consolidated financial statements. The Company reviews its estimates and assumptions on an ongoing basis and uses the most current information available and exercises careful judgments in making these estimates and assumptions.

Effective January 1, 2013, the Company revised the estimated useful lives of its coal plants corresponding to the revised Federal government regulations for coal plants. On an overall basis, the impact was to reduce depreciation expense.

There have been no other significant changes to the Company's critical accounting estimates and accounting judgments as described in the Company's December 31, 2012 MD&A.

## **Accounting Changes**

#### Effective January 1, 2013

The Company adopted a number of new accounting standards, together with the consequential amendments to other International Financial Reporting Standards (IFRS), These standards, along with the impacts of the changes to the Company's financial statements, are as follows:

#### International Accounting Standard (IAS) 1 Presentation of Financial Statements

The amendments to IAS 1 require entities to group items within other comprehensive income on the basis of whether or not they will be reclassified to income or loss in a future period. The Company's presentation within its statement of other comprehensive income has been amended to present items within other comprehensive income on this basis.

#### IFRS 7 Financial Instruments: Disclosures

The amendments to IFRS 7 include minimum disclosure requirements for financial instruments that are offset in the statement of financial position or are subject to enforceable master netting arrangements or similar agreements. The adoption of the amendments to IFRS 7 resulted in additional disclosures regarding the offsetting of financial assets and financial liabilities.

#### IFRS 10 Consolidated Financial Statements

The adoption of IFRS 10 did not result in the consolidation of new subsidiaries or other entities that were not previously consolidated or a change in the treatment of subsidiaries that were previously consolidated.

## IFRS 11 Joint Arrangements

The adoption of IFRS 11 did not change the accounting for any of the Company's joint arrangements as the previous treatment applied by the Company was aligned with the new standard.

#### IFRS 12 Disclosures of Interests in Other Entities

This new and comprehensive standard on disclosure requirements for all forms of interests in other entities, including subsidiaries, joint arrangements, associates and unconsolidated structured entities will result in additional financial statement disclosures relating to interests in subsidiaries and joint arrangements in the Company's annual financial statements for 2013.

#### IFRS 13 Fair Value Measurement

IFRS 13 defines fair value, sets out in a single IFRS a framework for measuring fair value, and enhances disclosures about fair value measurements. IFRS 13 applies to fair value measurements required or permitted by other IFRSs but does not (a) introduce any new requirements to measure an asset or a liability at fair value, (b) change what is measured at fair value in IFRSs, or (c) address how to present changes in fair value. The adoption of this new standard resulted in changes to the Company's fair value disclosures including the requirement to include such disclosures within the notes to the Company's condensed interim consolidated financial statements.

#### IAS 32 Financial Instruments: Presentation

In December 2011, the IASB issued amendments to IAS 32 that clarify the criteria for offsetting financial assets and financial liabilities. Capital Power does not expect that the adoption of the amendments will have a material effect on the consolidated financial statements since the Company's current accounting policies are substantially aligned with the amendments. The amendments to IAS 32 are effective for annual periods beginning on or after January 1, 2014, and are to be applied retrospectively. Earlier application is permitted.

#### IFRS 9 Financial Instruments

In November 2009, the IASB issued IFRS 9 which addresses the classification and measurement requirements of financial assets. The standard was amended in October 2010 to include the requirements for the classification and measurement of financial liabilities. The changes are effective for annual periods beginning on or after January 1, 2015 and are to be applied retrospectively. Earlier application is permitted.

#### **Financial Instruments**

The classification, carrying amounts and fair values of financial instruments held at March 31, 2013 and December 31, 2012 were as follows:

(\$millions)		Fair	As at					
		value	March 31	, 2013	December	31, 2012		
		hierarchy	Carrying	Fair	Carrying	Fair

#### Risk management and hedging activities

There have been no material changes in the three months ended March 31, 2013 to the Company's risk management and hedging activities as described in the Company's December 31, 2012 MD&A.

The derivative instruments assets and liabilities held at March 31, 2013 compared with December 31, 2012 and used for risk management purposes were measured at fair value and consisted of the following:

(\$millions)	As at March 31, 2013								
	Fair value hierarchy level	Commodity cash flow hedges	Commodity non-hedges	Total					
Derivative financial instruments assets	Level 1	-	59	59					
	Level 2	31	28	59					
	Level 3	-	1	1					
		31	88	119					
Derivative financial instruments liabilities	Level 1	-	(62)	(62)					
	Level 2	(13)	(21)	(34)					
	Level 3	-	(8)	(8)					
		(13)	(91)	(104)					
Net derivative financial instruments assets (liabilities)		18	(3)	15					

(\$millions)	As at December 31, 2012							
	Fair value hierarchy level	Commodity cash flow hedges	Commodity non-hedges	Total				
Derivative financial instruments assets	Level 1	-	25	25				
	Level 2	35	17	52				
	Level 3	-	-	-				
		35	42	77				
Derivative financial instruments liabilities	Level 1	-	(30)	(30)				
	Level 2	(6)	(12)	(18)				
	Level 3	-	(16)	(16)				
		(6)	(58)	(64)				
Net derivative financial instruments assets (liabilities)		29	(16)	13				

#### Commodity derivatives designated as accounting hedges

As at March 31, 2013, the fair value of the commodity derivatives designated and qualifying for hedge accounting was a net asset of \$18 million, a decrease from the net asset of \$29 million at December 31, 2012. Unrealized gains and losses for fair value changes on commodity derivatives that qualify for hedge accounting are recorded in other comprehensive income and reclassified to net income as revenues or energy purchases and fuel, as appropriate, when realized.

#### Derivatives not designated as accounting hedges

As at March 31, 2013, the fair value of commodity derivatives not designated as hedges for accounting purposes was a net liability of \$3 million compared with a net liability of \$16 million at December 31, 2012. The difference primarily reflected the impact of changes in the forward Alberta power prices on the Alberta power portfolio. Unrealized and realized gains and losses for fair value changes on commodity derivatives that do not qualify for hedge accounting are recorded in revenues or energy purchases and fuel as appropriate.

As at March 31, 2013 and December 31, 2012, the Company did not have any forward foreign currency contracts outstanding. Unrealized and realized losses on foreign exchange derivatives that are not designated as hedges for accounting purposes are recorded in energy revenues or foreign exchange gains and losses.

As at March 31, 2013, the Company did not have any forward bond sale contracts.

#### Level 3 financial assets and liabilities

The determination of fair value for Level 3 financial assets and liabilities is performed by the Company's commodity risk group and reviewed by management. These fair values are based partly on the key unobservable inputs of volatilities and correlations of the relative price changes in underlying prices. These volatilities and correlations are estimated using an exponentially-weighted moving average based on historical forward prices. Sensitivity analysis for significant Level 3 financial instruments is performed. The sensitivity analyses as at March 31, 2013 and December 31, 2012 reflected negligible differences compared with their recorded fair values.

## Disclosure Controls and Procedures and Internal Control over Financial Reporting

During the quarter ended March 31, 2013, the Company implemented a new Enterprise Resource Planning (ERP) system to provide enhanced financial and other information that will support its strategic plans and business operations. The implementation of the ERP system has affected Capital Power's disclosure controls and internal controls over financial reporting. The evaluation of the changes to the design of the disclosure controls and internal controls over financial reporting concluded that there is reasonable assurance that material and required disclosure information is appropriately identified and reported and that financial reporting is reliable and in accordance with GAAP. The operation of the revised or new controls related to ERP implementation including internal controls over financial reporting will be tested and evaluated as the implementation is completed and, in full, prior to the Company's December 31, 2013 year-end.

There were no other changes in the Company's disclosure controls and procedures and internal controls over financial reporting that occurred during the three months ended March 31, 2013 that have materially affected or are reasonably likely to materially affect the Company's disclosures of required information and internal control over financial reporting.

Quarterly revenues, net income and funds provided by operating activities are affected by seasonal weather conditions, fluctuations in U.S. dollar exchange rates relative to the Canadian dollar, power and natural gas prices, and planned and unplanned plant outages as well as items outside the normal course of operations. Net income is also affected by changes in the fair value of the Company's derivative power, natural gas, foreign exchange and forward bond sale contracts, and natural gas held for trading.

#### Factors impacting results for the previous guarters

Significant events and items which affected results for the previous guarters were as follows:

In the fourth guarter of 2012, commercial operations of the Quality Wind and Halkirk wind projects commenced adding total capacity of 292 MW to the Company's generation portfolio. A pre-tax gain of \$15 million was recorded on the sale of the Brown Lake and Miller Creek facilities. Results were negatively impacted by realized losses on the Bridgeport heat rate option and the pricing of physical gas purchases for the Bridgeport plant. These losses were partly offset by gains realized on a financial hedge executed to reduce the natural gas locational basis risk associated with the heat rate option. The net impact of these transactions was a pre-tax loss of \$10 million. Planned outages occurred at Genesee 3 and Sundance. Adjusted EBITDA was positively impacted by approximately \$9 million due to a change in the estimate of coal inventory for Genesee 1, 2 and 3,

In the third quarter of 2012, Alberta commercial plants experienced strong performance which was dampened by an unscheduled outage at Genesee 1 resulting from a trial project intended to increase the marketability of fly ash by-product.

In the second guarter of 2012, a pre-tax impairment loss of \$74 million on Capital Power's North East U.S. plants based on reduced expected operating margins for the Bridgeport, Rumford and Tiverton plants largely as a result of weaker spark spreads in the Northeast U.S. power market was recognized. Results for the North East U.S commercial plants were impacted by lower than expected market spark spreads and an unplanned outage at the Bridgeport facility.

The 2012 first guarter reflected strong results for Alberta commercial plants and portfolio optimization largely due to the movement of Alberta power prices and their impact on portfolio position selling forward length at prices higher than the spot market. The production and contributions from Alberta commercial plants was strong with the inclusion of Keephills 3 since its commercial operations commenced in September 2011. The Company recognized significant unrealized net gains on its energy derivatives due to the reversal of unrealized losses accrued at the previous year-end on contracts which settled in the first quarter of 2012 and the impact of decreasing Alberta forward power prices on its portfolio position.

In the fourth quarter of 2011, the Company sold its limited partnership units of CPILP to Atlantic Power effective November 5, 2011 resulting in the recognition of a pre-tax gain on disposal of \$89 million after deducting legal and other disposal costs of \$10 million. From that point forward, the Company's operations and corporate structure were simplified as there was a decrease in the number of plants and legal entities and CPILP's results were no longer consolidated with the Company's results. Absent other changes, the disposal decreased revenues, net income and net income attributable to non-controlling interests for the fourth quarter of 2011 and future guarters relative to past guarters. Capital Power's Genesee 3 plant experienced an unplanned outage which reduced its generation volumes but this was partly offset by increased generation from the Company's CBEC facility. This and other Alberta portfolio optimization activities given the higher power prices experienced due to plant outages and higher demand helped offset a portion of the loss of earnings from Genesee 3 being

In the third quarter of 2011, the average Alberta power price increased significantly due to warmer temperatures, reduced supply resulting from several plant outages in the area, and Saskatchewan tie-line restrictions. Higher Alberta power prices had a favourable impact on the Company's Alberta portfolio position. Sundance Unit 6 went offline on August 18, 2011 due to a transformer failure and remained offline until October 14, 2011 to also perform planned maintenance. The penalty revenues received for this outage were based on high rolling average power prices partly offset the loss of margin from the facility being unavailable on the Alberta commercial plant and portfolio optimization results. The high rolling average power prices also had a favourable impact on availability incentive income for the Alberta contracted plants which had 100% availability in the quarter. Corporate results included a \$6 million foreign exchange losses related to the translation of U.S. denominated debt.

In the second quarter of 2011, North East U.S. commercial plants and portfolio optimization results reflected contributions from the Bridgeport, Rumford and Tiverton facilities and trading in the North East U.S. power market since the acquisition of these plants in April 2011. Alberta contracted plants results included \$5 million of availability incentive penalties relating to a scheduled maintenance outage at Genesee 1. An impairment loss of \$43 million on Capital Power's management and operations contracts with CPILP was recorded. Finance expense included a \$12 million loss related to the settlement of forward bond contracts. Income taxes included the reversal of a provision recorded in the second quarter of 2010 for deferred income taxes associated with the possible sale of the Company's interest in CPILP.

### **Share and Partnership Unit Information**

### Quarterly common share trading information

The Company's common shares trade on the Toronto Stock Exchange under the symbol CPX and began trading on June 26, 2009.

### Outstanding share and partnership unit data

As at April 22, 2013, the Company had 70.257 million common shares outstanding, 28.441 million special voting shares outstanding, 5 million Cumulative Rate Reset Preference Shares, Series 1 outstanding, 6 million Cumulative Rate Reset Preference Shares, Series 3, 8 million Cumulative Rate Reset Preference Shares, Series 5, and one special limited voting share outstanding. Assuming full conversion of the outstanding and issuable share purchase options and the outstanding special voting shares to common shares and ignoring exercise prices, the outstanding and issuable common shares as at April 22, 2013 were 102.933 million. All of the outstanding special voting shares and the outstanding special limited voting share are held by EPCOR.

As at April 22, 2013, CPLP had 21.750 million general partnership units outstanding, 46.699 million common limited partnership units outstanding and 28.441 million exchangeable common limited partnership units outstanding, which are exchangeable for 28.441 million common shares of the Company. All of the outstanding general partnership units and the outstanding common limited partnership units are held, indirectly, by the Company. All of the outstanding exchangeable common limited partnership units are held by EPCOR.

Notes to the Condensed Interim Consolidated Financial Statements March 31, 2013 and 2012

(Unaudited, tabular amounts in millions of Canadian dollars, except share and per share amounts)

#### 1. Reporting entity:

Capital Power Corporation (the Company or Capital Power) builds, owns and operates power plants and manages its related electricity and natural gas portfolios by undertaking trading and marketing activities.

The registered and head office of the Company is located at 10423 101 Street, Edmonton, Alberta, Canada, T5H 0E9. The common shares of the Company are traded on the Toronto Stock Exchange under the symbol "CPX".

Interim results will fluctuate due to plant maintenance schedules, the seasonal demands for electricity and changes in energy prices. Consequently, interim results are not necessarily indicative of annual results.

### 2. Basis of presentation:

These condensed interim consolidated financial statements have been prepared by Management in accordance with International Accounting Standards (IAS) 34, Interim Financial Reporting. The condensed interim consolidated financial statements do not include all of the information required for full annual financial statements and should be read in conjunction with the Company's 2012 annual financial statements prepared in accordance with International Financial Reporting Standards (IFRS).

These condensed interim consolidated financial statements have been prepared following the same accounting policies and methods as those used in preparing the most recent consolidated financial statements for the year ended December 31, 2012, except as described in note 3, and have been prepared under the historical cost basis, except for the Company's derivative instruments, defined benefit pension assets and cash-settled share based payments, which are stated at fair value.

These condensed interim consolidated financial statements were approved and authorized for issue by the Board of Directors on April 25, 2013.

### 3. Changes in accounting policies:

Effective January 1, 2013, the Company has adopted a number of new accounting standards, together with the consequential amendments to other IFRSs. These standards, along with the impacts of the changes to the Company's financial statements are as follows:

IAS 1 – Presentation of Financial Statements – The amendments to IAS 1 require entities to group items within other comprehensive income on the basis of whether or not they will be reclassified to income or loss in a future period. The Company's presentation within its statement of other comprehensive income has been amended to present items within other comprehensive income on this basis.

IFRS 7 – Financial Instruments: Disclosures – The amendments to IFRS 7 establish enhanced disclosure requirements for the actual and potential effects of netting arrangements on the Company's statements of financial position. The adoption of the amendments to IFRS 7 has resulted in the additional disclosures regarding offsetting of financial assets and liabilities in note 8.

IFRS 12 – Disclosures of Interests in Other Entities – This new and comprehensive standard on disclosure requirements for all forms of interests in other entities, including subsidiaries, joint arrangements, associates and unconsolidated structured entities will result in additional financial statement disclosures relating to interests in subsidiaries and joint arrangements in the Company's annual financial statements for 2013.

IFRS 13 – Fair Value Measurement – IFRS 13 defines fair value, sets out in a single IFRS a framework for measuring fair value and enhances disclosures about fair value measurements. IFRS 13 applies to fair value measurements required or permitted by other IFRSs, but does not (a) introduce any new requirements to measure an asset or a liability at fair value, (b) change what is measured at fair value in IFRSs, or (c) address how to present changes in fair value. The adoption of this new standard resulted in changes to the Company's fair value disclosures in note 8, including the requirement to include such disclosures within the notes to the Company's interim consolidated financial statements.

Notes to the Condensed Interim Consolidated Financial Statements March 31, 2013 and 2012

(Unaudited, tabular amounts in millions of Canadian dollars, except share and per share amounts)

### 3. Changes in accounting policies, continued:

The Company also adopted the following standards effective January 1, 2013 that did not have a significant impact on the Company's financial statements and note disclosures thereto:

- IFRS 10 Consolidated Financial Statements The adoption of IFRS 10 did not result in the consolidation of new subsidiaries or other entities that were not previously consolidated or a change in the treatment to subsidiaries that were previously consolidated.
- IFRS 11 Joint Arrangements The adoption of IFRS 11 did not change the accounting for any of the Company's joint arrangements as the previous treatment applied by the Company was aligned with the new standard.
- IAS 19 Employee Benefits
- International Financial Reporting Standards Interpretations Committee (IFRIC) 20 Stripping Costs in the Production Phase of a Surface Mine

#### 4. Income tax:

Income taxes differ from the amount that would be computed by applying the federal and provincial income tax rates as follows:

	ee months e 2013	ch 31, 2012
Income before tax	\$ 55	\$ 80
Income tax at the statutory rates of 25.0%	14	20
Increase (decrease) resulting from:		
Amounts attributable to non-controlling interests	(3)	(6)
Non-taxable amounts	(2)	(1)
Statutory and other rate differences	(2)	-
Other	-	1
Income tax expense	\$ 7	\$ 14

### 5. Earnings per share:

#### Basic earnings per share

The earnings and weighted average number of common shares used in the calculation of basic earnings per share are as follows:

	Three months ended March 31						
	;	2013	;	2012			
Income for the period attributable to shareholders of the Company	\$	34	\$	40			
Preferred share dividends of the Company 1		(3)		(1)			
Earnings used in the calculation of basic earnings per share	\$	31	\$	39			

<sup>&</sup>lt;sup>1</sup> Includes preferred share dividends in respect of the current periods only.

	Three months	ended March 31,
	2013	2012
Weighted average number of common shares used in the		
calculation of basic earnings per share	70,152,548	59,184,367

Notes to the Condensed Interim Consolidated Financial Statements March 31, 2013 and 2012

(Unaudited, tabular amounts in millions of Canadian dollars, except share and per share amounts)

### 5. Earnings per share, continued:

### Diluted earnings per share

The earnings used in the calculation of diluted earnings per share are as follows:

	Thre	ee months e	ended Mai	rch 31,
		2013		2012
Earnings used in the calculation of basic earnings per share	\$	31	\$	39
Effect of exchangeable limited partnership units issued to				
EPCOR for common shares <sup>1</sup>		12		23
Earnings used in the calculation of diluted earnings per share	\$	43	\$	62

The exchangeable limited partnership units issued to EPCOR Utilities Inc. (EPCOR) may be exchanged for common shares of Capital Power on a one-for-one basis. For the three months ended March 31, 2013, the potential exchange of such units for common shares of the Company had a neutral impact as the potential exchange would remove the attribution of net income to non-controlling interests related to CPLP of \$17 million. Additionally, the income tax provision of the Company would need to be adjusted to reflect the non-controlling interest's share of Capital Power L.P. (CPLP) income taxes of \$5 million. For the three months ended March 31, 2012 the potential exchange of such units for common shares of the Company had a dilutive impact as the potential exchange would remove the attribution of net income to non-controlling interests related to CPLP of \$29 million. Additionally, the income tax provision of the Company would need to be adjusted to reflect the non-controlling interest's share of CPLP income taxes of \$6 million.

The weighted average number of common shares for the purposes of diluted earnings per share reconciles to the weighted average number of common shares used in the calculation of basic earnings per share as follows:

	Three months ended March		
	2013	2012	
Weighted average number of common shares used in the		_	
calculation of basic earnings per share	70,152,548	59,184,367	
Effect of dilutive share purchase options <sup>2</sup>	-	154,483	
Effect of exchangeable limited partnership units issued to			
EPCOR for common shares	28,441,000	38,216,000	
Weighted average number of common shares used in the			
calculation of diluted earnings per share	98,593,548	97,554,850	

<sup>&</sup>lt;sup>2</sup> For the three months ended March 31, 2013 the average market price of the Company's common shares was below the exercise price of all granted share purchase options and as a result none of the share purchase options had a dilutive effect on earnings per share. For the three months ended March 31, 2012, the average market price of the Company's common shares exceeded the exercise price of certain of the granted share purchase options and as a result had a dilutive effect on earnings per share.

Notes to the Condensed Interim Consolidated Financial Statements March 31, 2013 and 2012

(Unaudited, tabular amounts in millions of Canadian dollars, except share and per share amounts)

### 6. Derivative financial instruments and hedge accounting:

Derivative financial and non-financial instruments are held for the purpose of energy purchases, merchant trading or financial risk management.

The derivative instruments assets and liabilities used for risk management purposes consist of the following:

	Ene		
	Cash flow		
	hedges	Non-hedges	Total

Range of contract terms in years	0.1 to 5.0	0.1 to 5.0	

Notes to the Condensed Interim Consolidated Financial Statements March 31, 2013 and 2012

(Unaudited, tabular amounts in millions of Canadian dollars, except share and per share amounts)

### 6. Derivative financial instruments and hedge accounting, continued:

Fair values of derivative instruments are determined, when possible, using exchange or over-the-counter price quotations by reference to quoted bid, ask or closing market prices dependent on which is most representative of fair value in the circumstances, in the principal market for that instrument. The extent to which fair values of derivative instruments are based on observable market data is determined by the extent to which the market for the underlying commodity is judged to be active. When traded markets are not considered to be sufficiently active or do not exist, the Company uses appropriate valuation and price modeling techniques commonly used by market participants to estimate fair value. The Company may also rely on price forecasts prepared by third party market experts to estimate fair value when there are limited observable prices available. Fair values determined using valuation models require the use of assumptions concerning the amounts and timing of future cash flows. Fair value amounts reflect management's best estimates and maximize, when available, the use of external readily observable market data including future prices, interest rate yield curves, foreign exchange rates, quoted Canadian dollar swap rates, counterparty credit risk, the Company's own credit risk and volatility. When a valuation technique utilizes unobservable inputs, no inception gains or losses are recognized, until inputs become observable. It is possible that the assumptions used in establishing fair value amounts will differ from future outcomes and the impact of such variations could be material.

Unrealized and realized pre-tax gains and losses on derivative instruments recognized in other comprehensive income and net income were:

	Three m	Three months ended March 31, 2013			Three r		ended March )12	31,
	Unrea gains (lo		Rea gains (lo		Unre	alized gains	Realized (lo	gains sses)
Energy cash flow hedges	\$	(11)	\$	6	\$	18	\$	10
Energy non-hedges		13		(15)		17		29
Interest rate non-hedges		-		-		9		(8)

Realized gains and losses relate only to derivative financial instruments. The following gains and (losses) are included in the Company's statement of income for the three months ended March 31, 2013 and 2012.

	Thre	Three months ended March 31,				
		2013	:	2012		
Revenues	\$	10	\$	64		
Energy purchases and fuel		(6)		(8)		
Finance expense		-		1		

The Company has elected to apply hedge accounting on certain derivatives it uses to manage commodity price risk relating to electricity and natural gas prices. For the three months ended March 31, 2013, the changes in the fair value of the ineffective portion of hedging derivatives required to be recognized as losses in the statement of income were nil (three months ended March 31, 2012 – nil).

Net after tax gains related to derivative instruments designated as cash flow hedges are expected to settle and be reclassified to net income in the following periods:

	March 31, 2013
Within one year	\$ -
Between 1 – 5 years	14
After more than 5 years	-
	\$ 14

The Company's cash flow hedges extend up to 2017.

Notes to the Condensed Interim Consolidated Financial Statements March 31, 2013 and 2012

(Unaudited, tabular amounts in millions of Canadian dollars, except share and per share amounts)

### 7. Share capital:

On March 14, 2013 the Company issued 8 million Cumulative Rate Reset Preference Shares, series 5 (Series 5 Shares) priced at \$25.00 per share for gross proceeds of \$200 million less issue costs of \$6 million. Deferred tax assets of \$2 million related to the share issue costs were recorded in the preferred share balance. The preferred shares pay fixed cumulative dividends of \$1.125 per share per annum, yielding 4.50% per annum, payable on the last business day of March, June, September and December of each year, as and when declared by the board of directors of Capital Power, for the initial period ending June 30, 2018. The dividend rate will be reset on June 30, 2018 and every five years thereafter at a rate equal to the sum of the then five-year Government of Canada bond yield and 3.15%. The Series 5 Shares are redeemable by Capital Power, at its option, on June 30, 2018 and on June 30 of every fifth year thereafter.

Holders of Series 5 Shares will have the right to convert all or any part of their shares into Cumulative Floating Rate Preference Shares, Series 6 (Series 6 Shares), subject to certain conditions, on June 30, 2018 and on June 30 of every fifth year thereafter. Holders of Series 6 Shares will be entitled to receive a cumulative quarterly floating dividend at a rate equal to the sum of the then 90-day Government of Canada Treasury Bill yield plus 3.15%, as and when declared by the board of directors of Capital Power.

The common and preferred share dividends declared and paid by the Company for the three months ended March 31, 2013 are summarized as follows:

	Dividends declared			paid
Type of share	Per share	Total	Per share	Total 1
Common	\$ 0.3150	\$ 22	\$ 0.3150	\$ 22
Preference, Series 1	0.2875	1	0.2875	1
Preference, Series 3	0.3151	2	0.3151	2

Dividends paid on common shares consists of \$15 million paid in cash and \$7 million paid through the Company's dividend reinvestment plan as common shares issued.

The common and preferred share dividends declared and paid by the Company for the three months ended March 31, 2012 are summarized as follows:

	Dividends de	clared	Dividends p	aid
Type of share	Per share	Total	Total Per share	
Common	\$ 0.3150	\$ 19	\$ 0.3150	\$ 19
Preference, Series 1	0.2875	1	0.2875	1

<sup>&</sup>lt;sup>2</sup> Dividends paid on common shares were all paid in cash.

#### 8. Financial instruments:

### Fair values

Details of the fair values of the Company's derivative instruments are described in note 6.

The Company classifies its cash and cash equivalents as loans and receivables and measures them at amortized cost which approximates their fair values.

Trade and other receivables are classified as loans and receivables; trade and other payables are classified as other financial liabilities; all of which are measured at amortized cost and their fair values are not materially different from their carrying amounts due to their short-term nature.

Notes to the Condensed Interim Consolidated Financial Statements March 31, 2013 and 2012

(Unaudited, tabular amounts in millions of Canadian dollars, except share and per share amounts)

### 8. Financial instruments, continued:

### Fair values, continued

The classification, carrying amount and fair value of the Company's other financial instruments are summarized as follows:

		March 3	31, 2013	Decembe	er 31, 2012
	Fair value	Carrying		Carrying

(includes current portion)	Level 2	1,635	1,744	1,659	1,736

#### Loans and receivables

The fair values of the Company's finance lease receivables and other loans and receivables are estimated by discounting the expected future cash flows of these instruments at current market interest rates for comparable instruments with similar terms, plus an estimated credit spread based on the counterparty credit risk as at March 31, 2013 and December 31, 2012.

#### Loans and borrowings

The fair value of the Company's loans and borrowings is based on determining a current yield for the Company's loans and borrowings as at March 31, 2013 and December 31, 2012. This yield is based on an estimated credit spread for the Company over the yields of long-term Government of Canada and U.S. Government bonds that have similar maturities to the Company's loans and borrowings. The estimated credit spread is based on the Company's indicative spread as published by independent financial institutions.

### Fair value hierarchy

Fair value represents the Company's estimate of the price at which a financial instrument could be exchanged between knowledgeable and willing parties in an orderly arm's length transaction under no compulsion to act. Fair value measurements recognized in the consolidated statements of financial position are categorized into levels within a fair value hierarchy based on the nature of the valuation inputs and precedence is given to those fair value measurements calculated using observable inputs over those using unobservable inputs. The determination of fair value requires judgment and is based on market information where available and appropriate. The following levels were established for each input:

Level 1: Fair value is based on quoted prices (unadjusted) in active markets for identical instruments.
 Financial instruments classified in Level 1 include highly liquid short-term investments, and traded commodities obtained from active exchanges such as the New York Mercantile Exchange (NYMEX) whereby the Company can obtain quoted prices for identically traded commodities.

Notes to the Condensed Interim Consolidated Financial Statements March 31, 2013 and 2012

(Unaudited, tabular amounts in millions of Canadian dollars, except share and per share amounts)

### 8. Financial instruments, continued:

#### Fair value hierarchy, continued

- Level 2: Fair value is based on other than unadjusted quoted prices included in Level 1, which are either directly or indirectly observable at the reporting date. Level 2 includes those financial instruments that are valued using commonly used valuation techniques, such as the discounted cash flow model or the Black-Scholes option pricing models. Valuation models use inputs such as quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active but observable, and other observable inputs that are principally derived from or corroborated by observable market data for substantially the full term of the instrument. Financial instruments classified in Level 2 may include commodity and foreign exchange derivatives whose values are determined based on broker quotes, observable trading activity for similar, but not identical instruments, and prices published on information platforms and exchanges.
- Level 3: Fair value is based on unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the instrument. Level 3 includes financial instruments that are also valued using commonly used valuation techniques described in Level 2, however some inputs used in the models may not be based on observable market data, but rather are based on the Company's best estimate from the perspective of a market participant. Financial instruments classified in Level 3 may include long-dated commodity derivatives, commodity contracts involving non-standard features, transmission and commodity based options, and credit derivatives whose values are in part determined based on historical data such as plant operation costs, credit default probabilities, transmission congestion, demand profiles, volatilities and correlations between products derived from historical prices.

The fair value measurement of a financial instrument is included in only one of the three levels, the determination of which is based upon the lowest level input that is significant to the derivation of the fair value. The Company's assessment of the significance of a particular input to the fair value measurement requires judgment which will affect the placement within the fair value hierarchy levels.

The following tables present the Company's financial instruments measured at fair value on a recurring basis in the consolidated statements of financial position, classified using the fair value hierarchy described above:

	March 31, 2013							
	Le	vel 1	Le	evel 2	Le	vel 3		Total
Derivative financial instruments assets Commodity derivatives	\$	59	\$	59	\$	1	\$	119
Derivative financial instruments liabilities Commodity derivatives		(62)		(34)		(8)		(104)

December 31, 2012							
Lev	/el 1	Le	vel 2	Le	vel 3		Total
<b>B</b>	25	\$	52	\$	-	\$	77
	(00)		(4.0)		(4.0)		(64)
		25 (30)	5 25 \$	5 25 \$ 52	5 25 \$ 52 \$	5 25 \$ 52 \$ -	5 25 \$ 52 \$ - \$

The Company's policy is to recognize transfers between levels as of the date of the event of change in circumstances that caused the transfer. There were no significant transfers between levels in the fair value hierarchy for the three months ended March 31, 2013 and the year ended December 31, 2012.

Notes to the Condensed Interim Consolidated Financial Statements March 31, 2013 and 2012

(Unaudited, tabular amounts in millions of Canadian dollars, except share and per share amounts)

### 8. Financial instruments, continued:

### Fair value hierarchy, continued

Valuation techniques used in determination of fair values within Levels 2 and 3

The fair values of the Company's commodity derivatives included within Levels 2 and 3 are determined by applying the Spread Option Pricing Model. The valuation model is based on underlying forward prices, heat rates based on contract details, strike price of the options based on contract details, risk-free interest rates estimated based on market interest rate swap quotes as well as time to expiration calculated based on parameters within the contracts.

The key unobservable inputs used in the determination of the Level 3 fair values are volatilities and correlations of the relative price changes in underlying prices. The volatilities and correlations are estimated using an exponentially-weighted moving average calculated on historical forward prices. The range of volatilities used is 0.13 to 0.32 and 0.15 to 1.53 as at March 31, 2013 and December 31, 2012, respectively. The range of correlations between gas and power points is 0.14 to 0.83 and (0.03) to 0.85 as at March 31, 2013 and December 31, 2012, respectively.

### Valuation process applied to Level 3

The calculations of the fair value of derivative financial instruments assets and liabilities within level 3 are performed by the Company's commodity risk group and reviewed by management. The valuation technique and the associated inputs are assessed on a regular basis for ongoing reasonability.

For the significant financial instruments, the Company performs a sensitivity analysis for fair value measurements classified as Level 3, substituting the unobservable inputs with one or more reasonably possible alternative assumptions, if available, to the valuation models. The sensitivity analyses for the periods ended March 31, 2013 and December 31, 2012 reflected negligible differences compared with the fair value used to record financial instruments classified in Level 3.

#### Continuity of level 3 balances

The Company classifies financial instruments in Level 3 of the fair value hierarchy when there is reliance on at least one significant unobservable input to the valuation model used to determine fair value. In addition to these unobservable inputs, the valuation model for Level 3 instruments also relies on a number of inputs that are observable either directly or indirectly. Accordingly, the unrealized gains and losses shown below include changes in the fair value related to both observable and unobservable inputs. The following table summarizes the changes in the fair value of financial instruments classified in Level 3:

	Three months e		Year ended		
	March 31,	2013	December 31,	2012	
As at January 1 <sup>1</sup>	\$	(16)	\$	(1)	
Unrealized and realized losses included in net income <sup>2</sup>		(3)		(23)	
Settlements <sup>3</sup>		12		8	
As at end of period	\$	(7)	\$	(16)	
Total unrealized gains (losses) for the period included in net					
income	\$	9	\$	(15)	

<sup>&</sup>lt;sup>1</sup> The fair value of derivative instruments is presented on a net basis.

All instruments classified as Level 3 are derivative type instruments. Gains and losses associated with Level 3 balances may not necessarily reflect the underlying exposures of the Company. As a result, unrealized gains and losses from Level 3 financial instruments are often offset by unrealized gains and losses on financial instruments that are classified in Levels 1 or 2.

<sup>&</sup>lt;sup>2</sup> Gains and losses are recorded in revenues or energy purchases and fuel, as appropriate.

<sup>&</sup>lt;sup>3</sup> Relates to settlement of financial derivative instruments.

Notes to the Condensed Interim Consolidated Financial Statements March 31, 2013 and 2012

### Offsetting of financial assets and liabilities

The Company's commodity trading transactions are typically transacted on an exchange or under International Swap Dealers Association (ISDA) Master Agreements or similar master agreements. In general, under the Company's trading agreements the amounts owed by each counterparty that are due on a single day in respect of all transactions outstanding in the same currency under the agreement are aggregated into a single net amount being payable by one party to the other. Such amounts meet the criteria for offsetting and are presented as such on the Company's statements of financial position. In certain circumstances, including when a credit event such as a default occurs, generally all outstanding transactions under the agreement are terminated, the termination value is assessed and only a single net amount is payable by one party to the other in settlement of all transactions. Amounts that may only be offset in these circumstances do not meet the criteria for offsetting on the Company's statements of financial position.

The Company also has an agreement in place with one of its energy trading counterparties that conveys to the counterparty the right to set-off amounts receivable and amounts payable between the Company and the counterparty in certain circumstances, including when a credit event such as a default occurs on the part of the Company. Such amounts do not meet the criteria for offsetting on the Company's statements of financial position.

The Company issues and accepts collateral in the form of cash and letters of credit in respect of its commodity trading transactions. Such collateral is generally subject to standard industry terms. The terms generally also give each counterparty the right to terminate the related transactions upon the other counterparty's failure to post collateral.

### 9. Interest in joint arrangement:

During 2012, the Company has entered into a series of agreements with a third party to purchase a 50% interest in the 800 megawatt Shepard Energy Centre (Shepard) in southern Alberta. On February 28, 2013, the purchase of the first tranche of the Company's interest in Shepard closed. Upon close of this transaction, the Company paid \$237 million and acquired a 25% interest in Shepard. The total amount incurred by the Company to the date of close was \$287 million compared to the total anticipated capital cost of \$860 million. The second tranche, expected to close in the first quarter of 2014, will result in the Company's acquisition of an additional 25% interest in Shepard, bringing its total ownership interest to 50%. As of the close of the first tranche, all decisions related to Shepard will require unanimous approval by the Company and the third party. As a result, the Company jointly controls Shepard with the third party upon close of the first tranche. Based on the terms of the Shepard agreements, the Company will account for the Shepard joint arrangement as a joint operation.

Collateral pledged against the net financial liabilities disclosed above consists of \$6 million in cash collateral and \$18 million in letters of credit issued.

### 10. Segment information:

The Company operates in one reportable business segment involved in the operation of electrical generation plants within Canada (Alberta, British Columbia and Ontario), and in the U.S. (Connecticut, Maine, North Carolina and Rhode Island) as this is how management assesses performance and determines resource allocations.

The Company's results from operations within each geographic area are:
