

**Genesee Generating Station Units 4 and 5 Project
Rule 007 Application for a Power Plant**

PP5. Provide details and outcome of consultation with local jurisdictions (e.g., municipal districts, counties).

Capital Power regularly consults with Leduc County and the Village of Warburg through informal breakfast meetings on a quarterly basis. Capital Power will need a new or amended Development Permit to include the Project in the existing Genesee site from Leduc County. Preliminary discussions between Capital Power and local Leduc and Village of Warburg Council members have taken place throughout 2013. Capital Power intends to meet with Leduc County representatives in early 2014 to confirm requirements, processes and expectations for submitting a Development Permit application for the Project, which Capital Power will subsequently prepare and file.
