PROJECT OPEN HOUSE #2

Thursday, March 8, 2018 • 4:00 p.m. to 8:00 p.m.

Bow Island Legion

202 5 Ave E, Bow Island, Alberta

PROJECT SUMMARY

The Whitla Wind Project (the "Project") is a 300 megawatt ("MW") wind power facility that Capital Power has applied to the Alberta Utility Commission ("AUC") to develop in two phases. The Project is located approximately 15 kilometres south of Bow Island in the County of Forty Mile, Alberta.

Phase 1 of the Project will consist of a 201.6 MW facility, with 56 turbine sites. In December 2017, Capital Power was awarded a 20-year contract for Phase 1 in the first round of Alberta's Renewable Electricity Program ("REP 1"). Phase 2 will be approximately 97.2MW.

REGULATORY PROCESS AND SCHEDULE

Capital Power submitted its facility application to the AUC in October 2017 for approval to construct and operate the wind power facility and associated substation. Pending a successful outcome of the regulatory review, Phase 1 of the Project is anticipated to achieve an in-service date in late 2019.

This Open House is one opportunity to provide input into the Project. Capital Power's Participant Involvement Program incorporates the requirements of AUC Rule 007. If you are unable to participate in the Open House and have questions or feedback please contact us at:
