

CAPITAL POWER

Investor Meetings

August, 2014

Bryan DeNeve

SVP, Corporate Development & Commercial Services

Tony Scozzafava

VP Taxation & Treasury

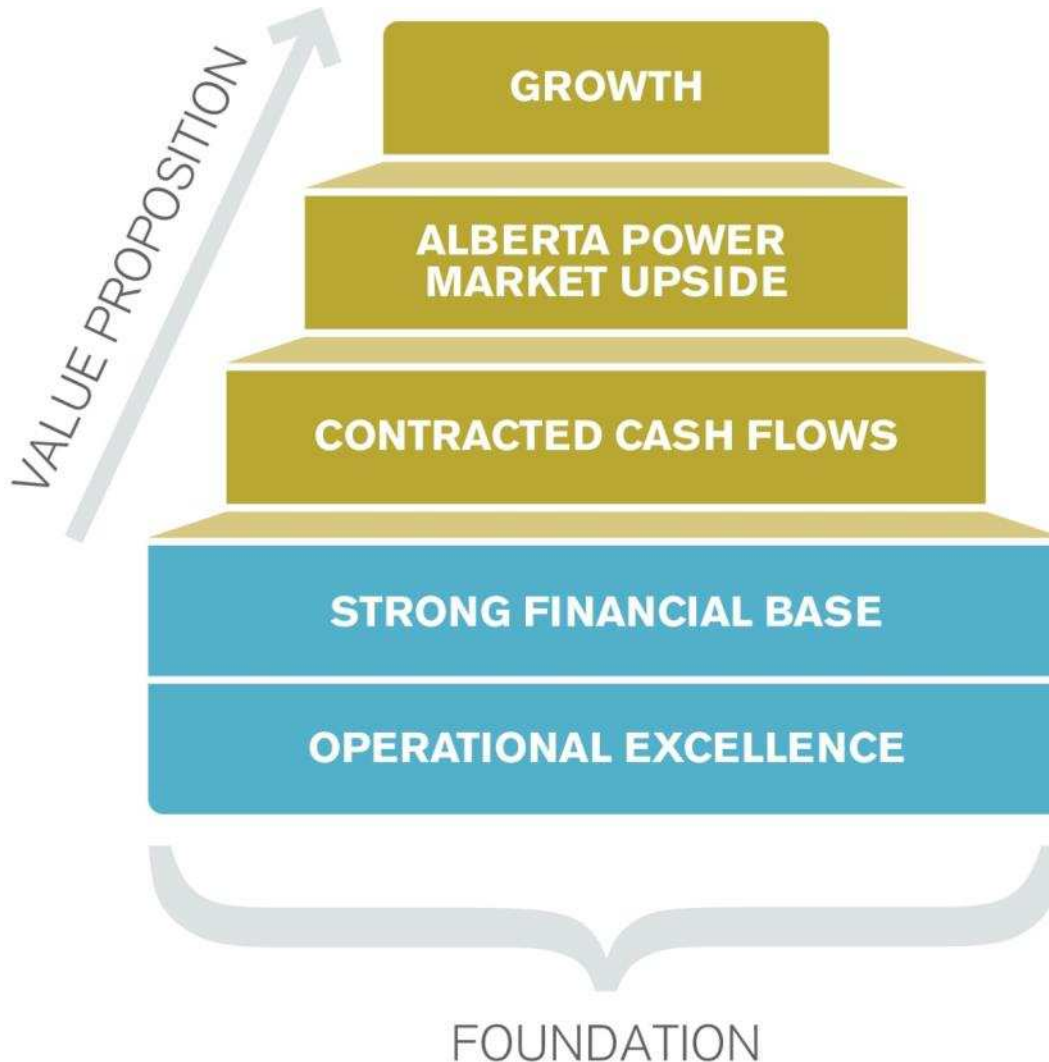

Capital Power

- Independent power producer with ownership interest in 13 facilities in Canada and the US totaling more than 2,600 MW⁽¹⁾ with 490 MW coming on-line in 2015
- Capital Power builds, owns and operates power plants
- Significant contracted cash flow base and merchant investments in Alberta - the most attractive power market in North America
- Trading on TSX (CPX); market cap of \$2.7B
- Average TSX daily trading volume of ~235K shares in last 12 months
- Increased annual dividend by 7.9% effective for the Q3/14 quarterly dividend; new dividend of \$1.36/year reflects ~5.0% yield

(1) Based on MW owned capacity as of Apr 30/14; excludes Sundance PPA (371 MW) and Clover Bar Landfill Gas (4.8 MW).

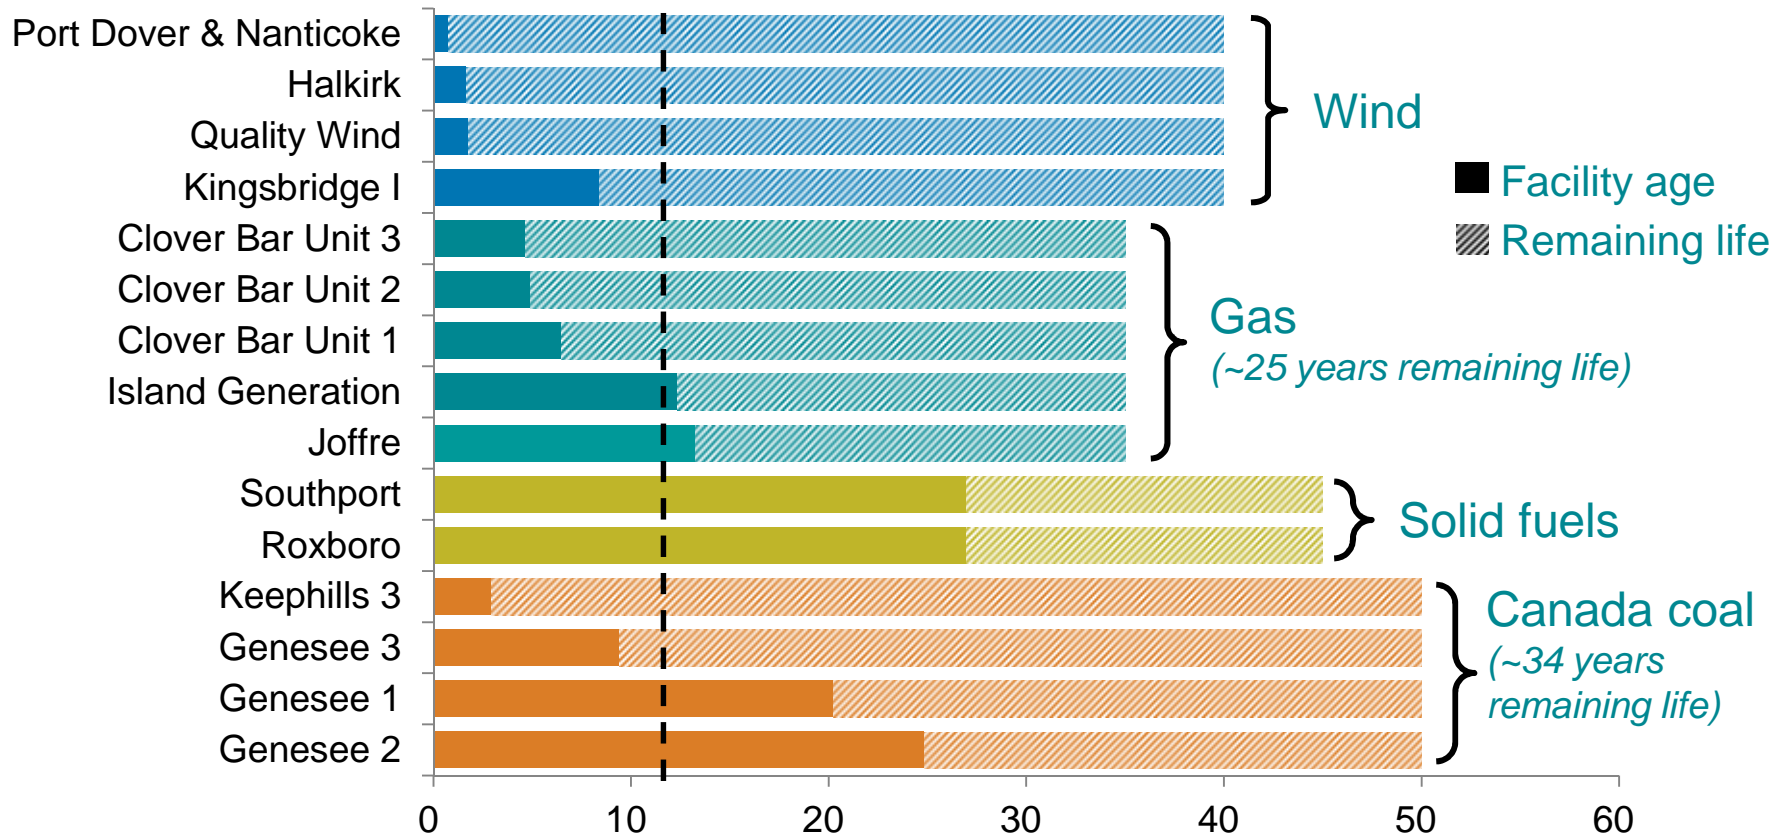

Capital Power value proposition

Modern fleet

Helps keep availability high and reduces risk of unplanned outages

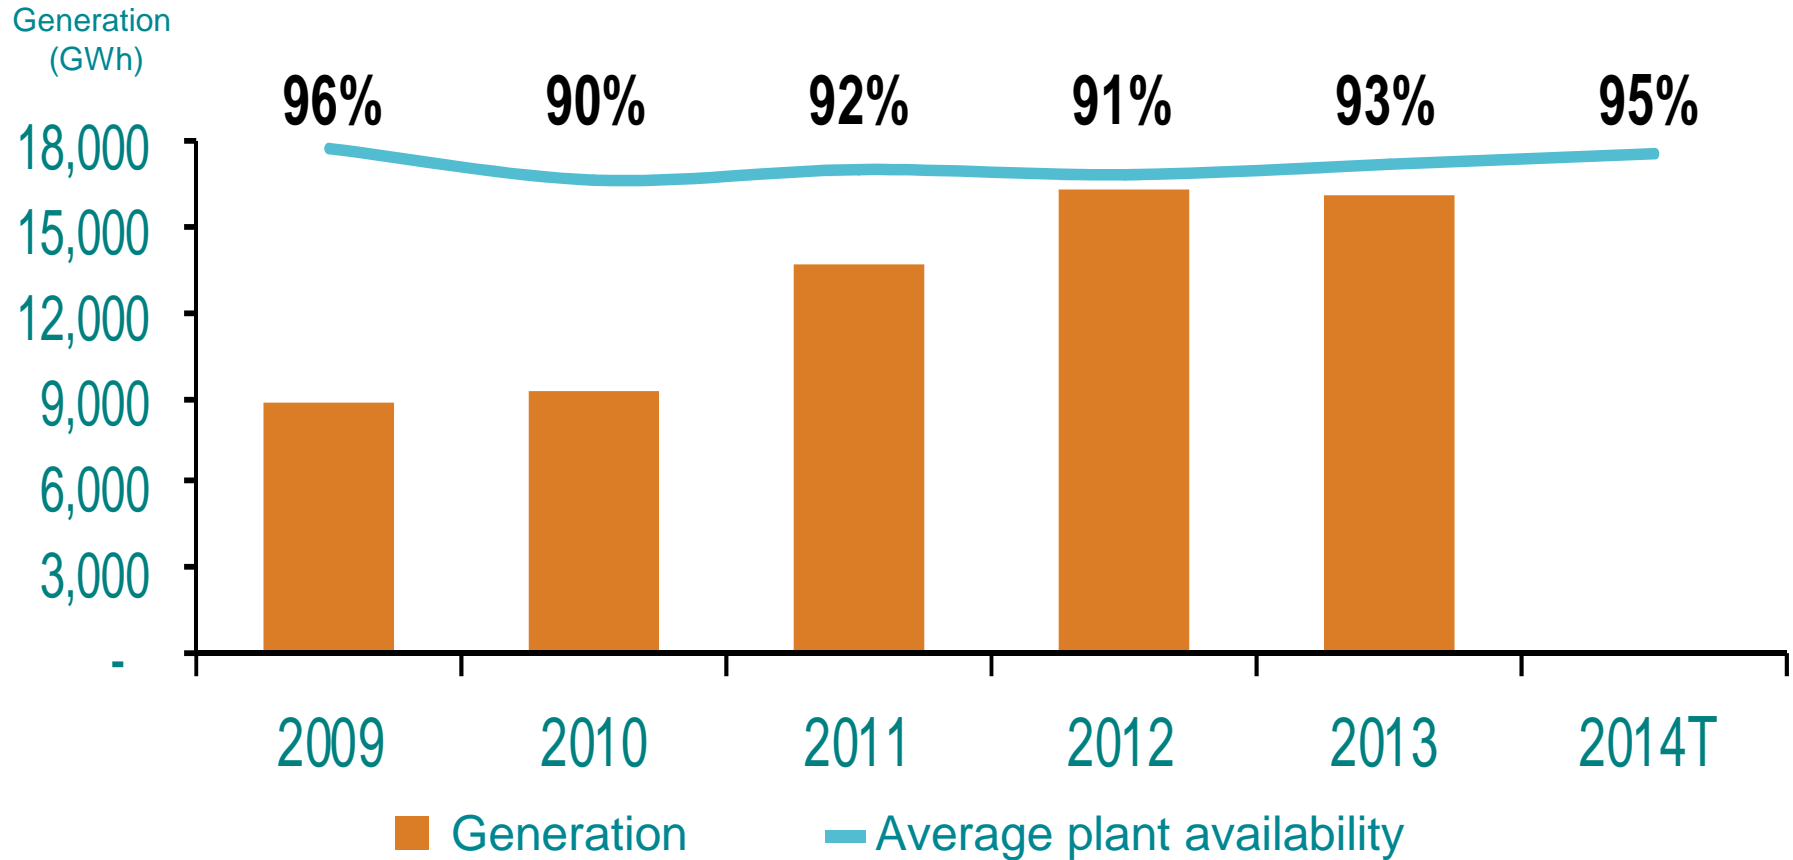

- Average weighted facility age of the current fleet is 12.9 years⁽¹⁾
- COD for Shepard in early 2015 and K2 Wind in latter half of 2015

(1) Average facility age and remaining life weighted by owned capacity as of Jul 31/14.

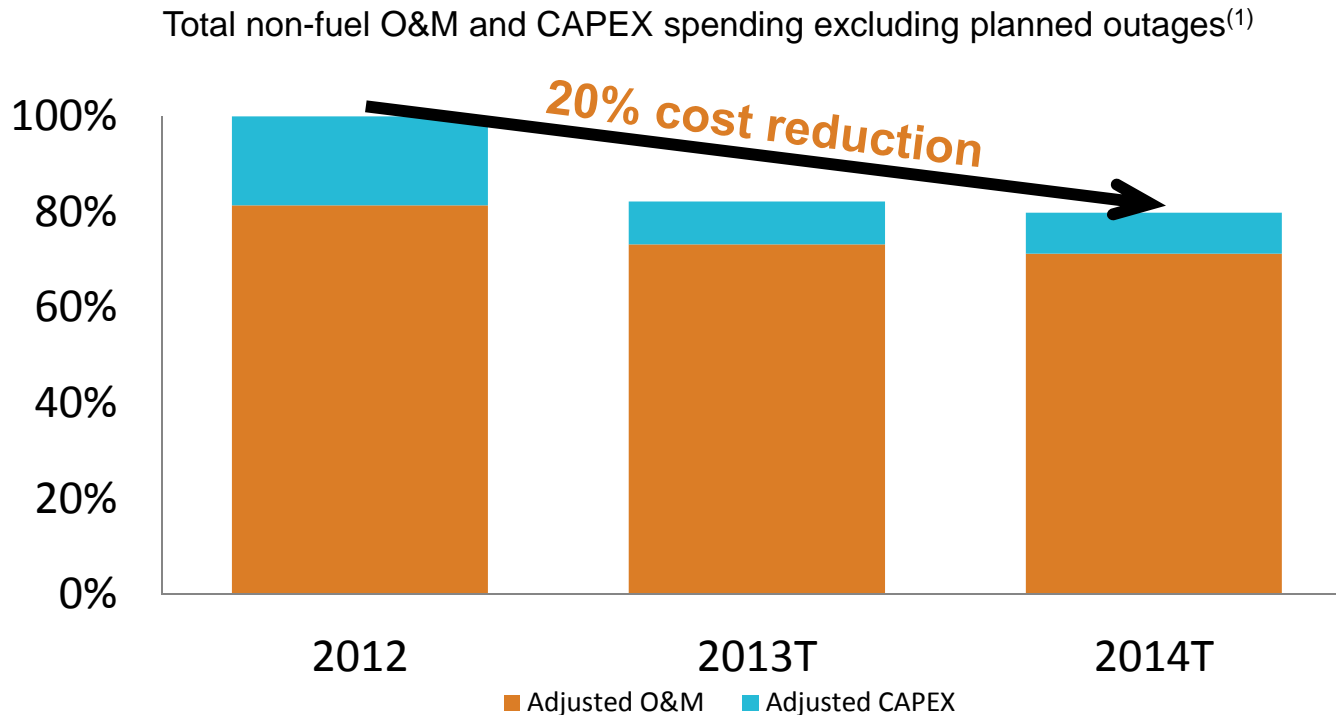

High fleet availability

Operating availability averaging 92% since IPO in 2009

Favourable cost trend

- In 2013, reduced annual G&A by \$22 million
- Significant cost improvements made in 2013 without negatively impacting high operating & maintenance (O&M) standards

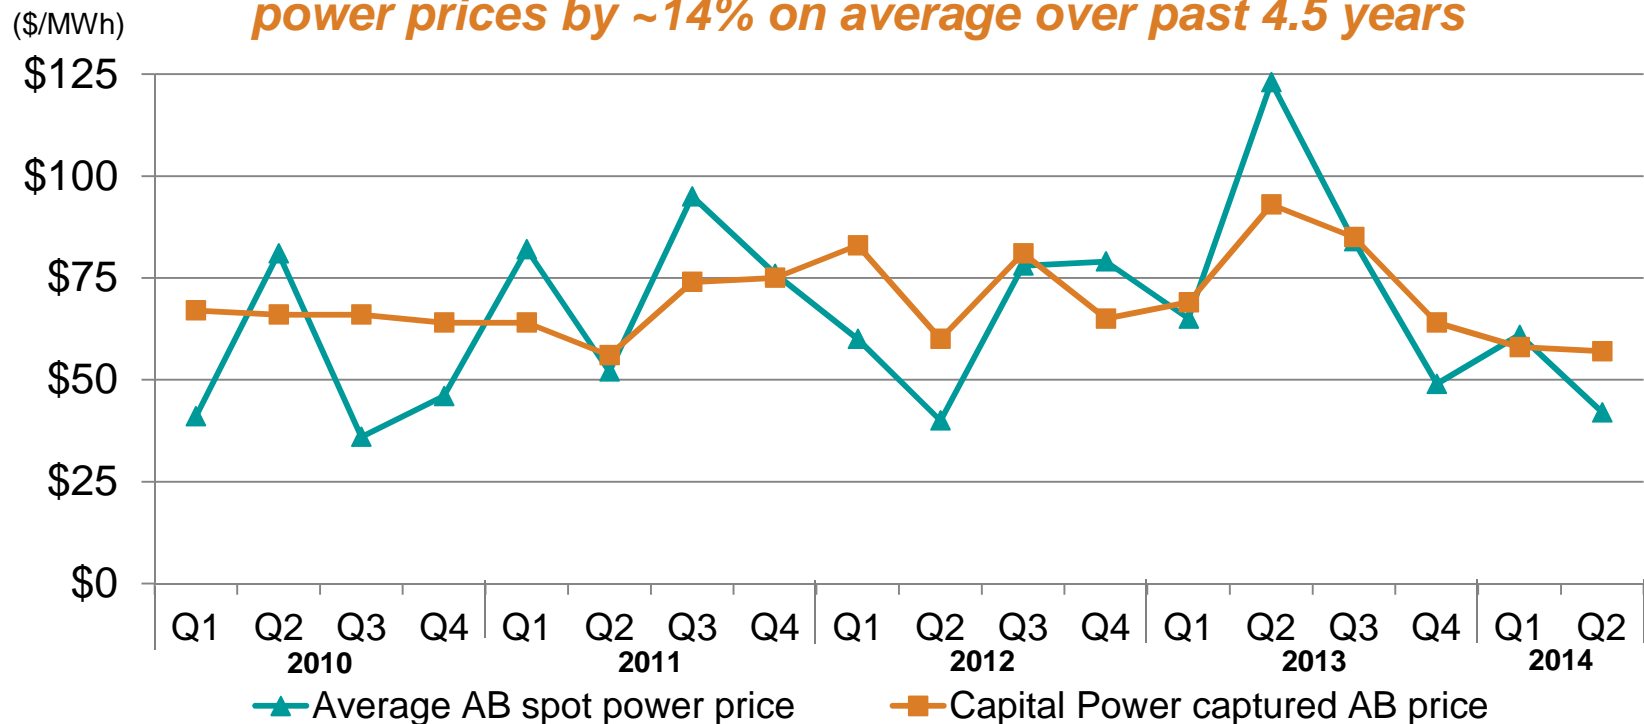

(1) Adjusted for current fleet including Port Dover & Nanticoke, and adjusted to 2013 dollars.

Alberta power market trading

- Hedging positions based primarily on generation from Genesee 3 and Keephills 3 baseload coal plants and output from the Sundance PPA
- Actively trading throughout various time periods to minimize portfolio risks, create incremental value, and reduce volatility

CPX's average realized power price has exceeded spot power prices by ~14% on average over past 4.5 years

Excellent track record of development

Outstanding track record of completing 7 construction projects (supercritical coal, natural gas, wind) totaling 1,691 MW

Asset	Capacity / fuel	On-time	On-budget	In-Service
Genesee 3 ⁽¹⁾ (AB)	516 MW / coal	√	+	2005
Kingsbridge 1 (ON)	40 MW / wind	√	√	2006
Clover Bar Energy Centre (AB)	243 MW / gas	+	√	2009
Keephills 3 ⁽¹⁾ (AB)	495 MW / coal	-	-	2011
Halkirk (AB)	150 MW / wind	√	+	2012
Quality Wind (BC)	142 MW / wind	√	+	2012
Port Dover & Nanticoke (ON)	105 MW / wind	√	+	2013

- √ Met expectations at full notice to proceed
- + Better than expected
- Worse than expected

(1) Joint venture with TransAlta Corporation; each party has a 50% ownership interest.

Financial performance – Q2 2014 YTD

\$M, except per share amounts	2014 YTD	2013 YTD	Change
Revenues	\$548	\$686	(20%)
Adjusted EBITDA (before mark-to-market) ⁽¹⁾	\$197	\$231	(15%)
Basic earnings per share	\$0.50	\$0.64	(22%)
Normalized earnings per share	\$0.39	\$0.63	(38%)
Funds from operations	\$177	\$191	(7%)

2014 YTD results reflect low AB power prices that averaged \$51/MWh, lower availability and generation from AB commercial plants and acquired Sundance PPA, and divestiture of New England assets in Nov/13

(1) Before unrealized changes in fair value of commodity derivatives for Q2/14 and Q2/13 of (\$6M) and \$8M, respectively.

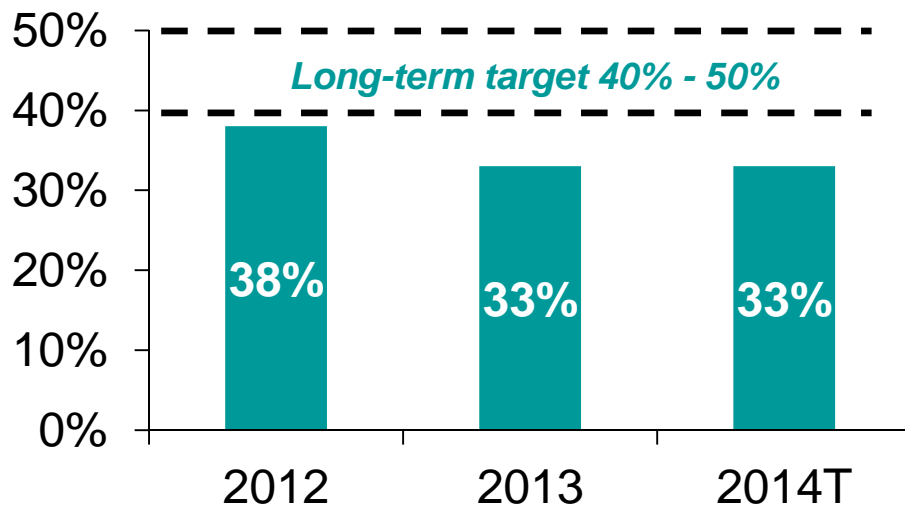

Financial strength

Strong balance sheet and investment grade credit rating

- Investment grade credit ratings
- Debt-to-capital ratio of ~33% expected at 2014 year-end remains below long-term target of 40% - 50%

Agency	Ratings	Outlook
S&P	BBB- / P-3	Stable
DBRS	BBB / Pfd-3 (low)	Stable

Debt to total capitalization

Corporate Liquidity

Credit metrics⁽¹⁾

Above DBRS financial criteria for current rating

Adj. Cash flow/Adj. Debt

Above S&P financial criteria for investment grade rating

Adj. FFO/Adj. Debt⁽²⁾

Adj. Debt/Adj. EBITDA⁽²⁾

(1) Metrics applicable to Capital Power L.P.

(2) Based on S&P's weighted average ratings methodology.

Development projects – CAPEX

(\$M)	Prior to 2014	2014E	Project total
Port Dover & Nanticoke	\$276	\$24	\$300
K2 Wind ⁽¹⁾	\$16	\$30	\$310
Shepard Energy Centre ⁽²⁾	\$684	\$130	\$821
	\$976	\$184	\$1,431

Continue strong execution of CAPEX program

Port Dover & Nanticoke

Shepard Energy Centre

(1) Represents Capital Power's 1/3 share of project cost, including project financing.

(2) Represents Capital Power's 50% share of project cost.

Cash flow and financing outlook

Sufficient FFO to meet dividends, development projects and sustaining CAPEX

Sources of cash flow (\$M)	2014E
Funds from operations ⁽¹⁾	~\$380
Uses of cash flow	
Dividends (net of DRIP) & distributions to NCI	\$103
Dividends (Preferred shares)	\$22
Development projects	\$184
Sustaining capex	\$85
Net change in cash	~(\$14)

No primary common share equity required in 2014 other than via DRIP

(1) Funds from operations in 2014 represents mid-point of guidance range.

Continued strong cash flow generation

Funds from operations (FFO)

- 2014 FFO target range of \$360M-\$400M is lower than 2013 due to lower average AB power price forecast
- Generating significant discretionary cash flow⁽²⁾ with 3-year average of 39% and similar expectation for 2014
- 2014 FFO expected to cover dividends, development projects, and sustaining capex for the year

■ Gross dividends (common & preferred shares)
■ Sustaining capex
■ Discretionary cash flow

(1) 2014 FFO target represents the mid-point of \$360M to \$400M guidance range.

(2) Discretionary cash flow (DCF) is a non-GAAP financial measure. DCF = FFO – sustaining capex – total common and preferred share dividends and CPLP distributions.

Improving contracted cash flow^(1,2)

Substantial expansion of contracted operating margin from \$225M to ~\$375M from 2012 to 2015 (66% increase)

(1) Margins have been averaged over the periods except in the year of commissioning.

(2) Only includes contracted portions of Halkirk and Shepard plants.

Dividends

- With addition of Shepard and K2 Wind in 2015, forecasting substantial expansion in our contracted operating margin
- Dividend increased 7.9% (annual dividend from \$1.26 to \$1.36/share) effective for Q3/14 dividend
- Relative to peers who use total free cash flow for financial obligations and dividends, Capital Power has upside with additional cash flow from merchant assets

Contracted operating margin to financial obligations⁽¹⁾ and dividends

Well positioned for consistent dividend growth

(1) Based on existing plants plus committed development projects. Financial obligations include interest payments (including interest during construction), sustaining capital expenditure and general & administration expenses.

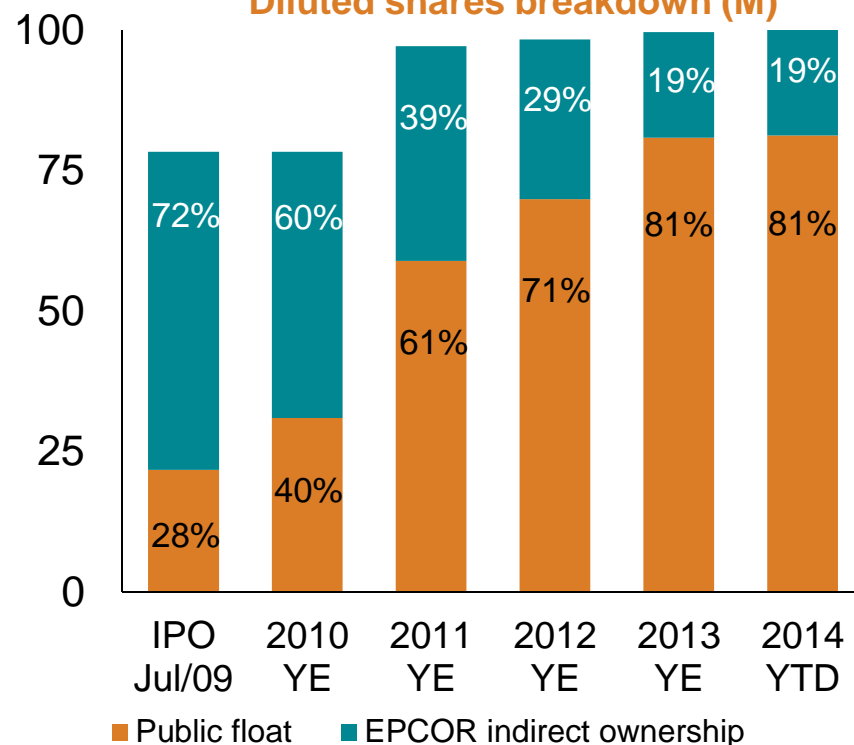

Capital allocation

- Well positioned to fund or partially fund any new significant growth opportunities in the near term with discretionary cash flow
- Growing contracted cash flow base supports dividend growth
- Consider debt reduction or share buyback given improvements in trading liquidity and public float

Average daily trading volume (000s)

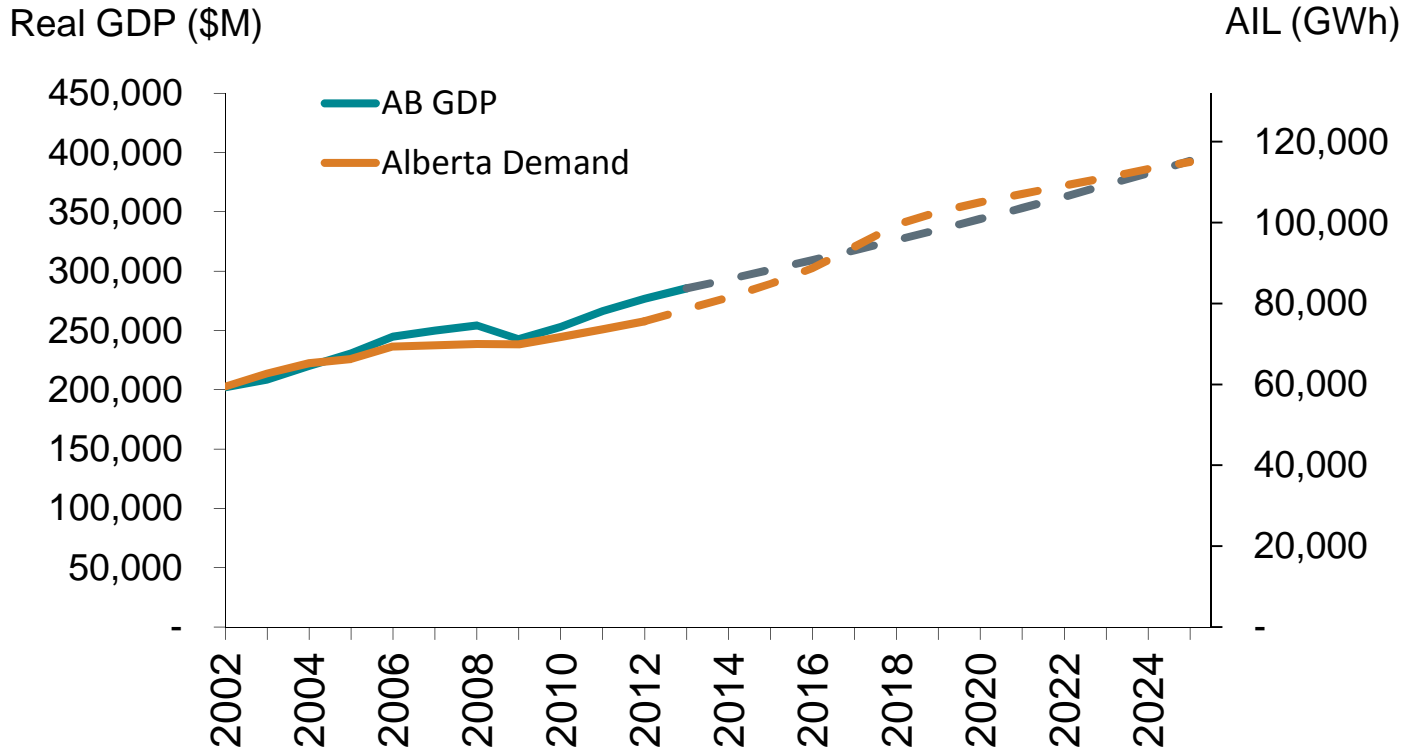

Diluted shares breakdown (M)

Alberta market

Alberta demand and Alberta GDP⁽¹⁾

Expected coal unit retirements - CST

Retirements under the federal Capital Stock Turnover (CST) regulations

Alberta coal generation (MW)

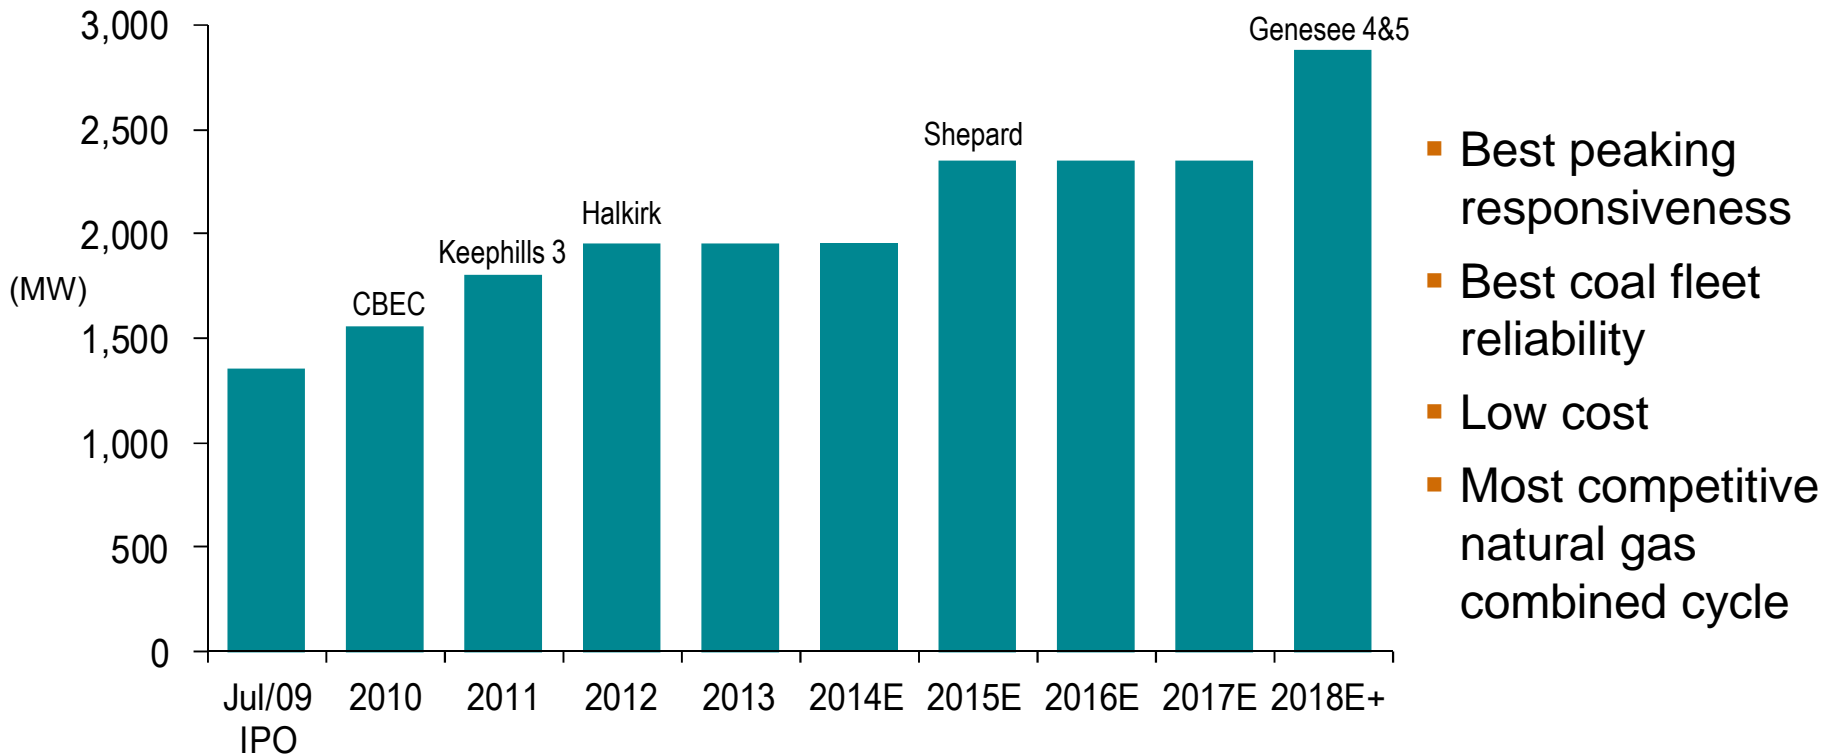

Facility	Generation Capacity (MW)	End of Life (Final Regulations)
Battle River 3	149	2019
Sundance 1	288	2019
H.R. Milner	144	2019
Sundance 2	288	2019
Battle River 4	155	2025
Sundance 3	362	2026
Sundance 4	406	2027
Sundance 5 ⁽¹⁾	406	2028
Sundance 6 ⁽¹⁾	401	2029
Battle River 5	385	2029
Keephills 1	387	2029
Keephills 2	406	2029
Sheerness 1	390	2036
Genesee 2 ⁽²⁾	430	2039
Sheerness 2	390	2040
Genesee 1 ⁽²⁾	430	2044
Genesee 3 ⁽²⁾	516	2055
Keephills 3 ⁽²⁾	466	2061

(1) Capital Power holds the PPA (371 MW) for Sundance Units 5 & 6.
 (2) Represents units that Capital Power has ownership in.

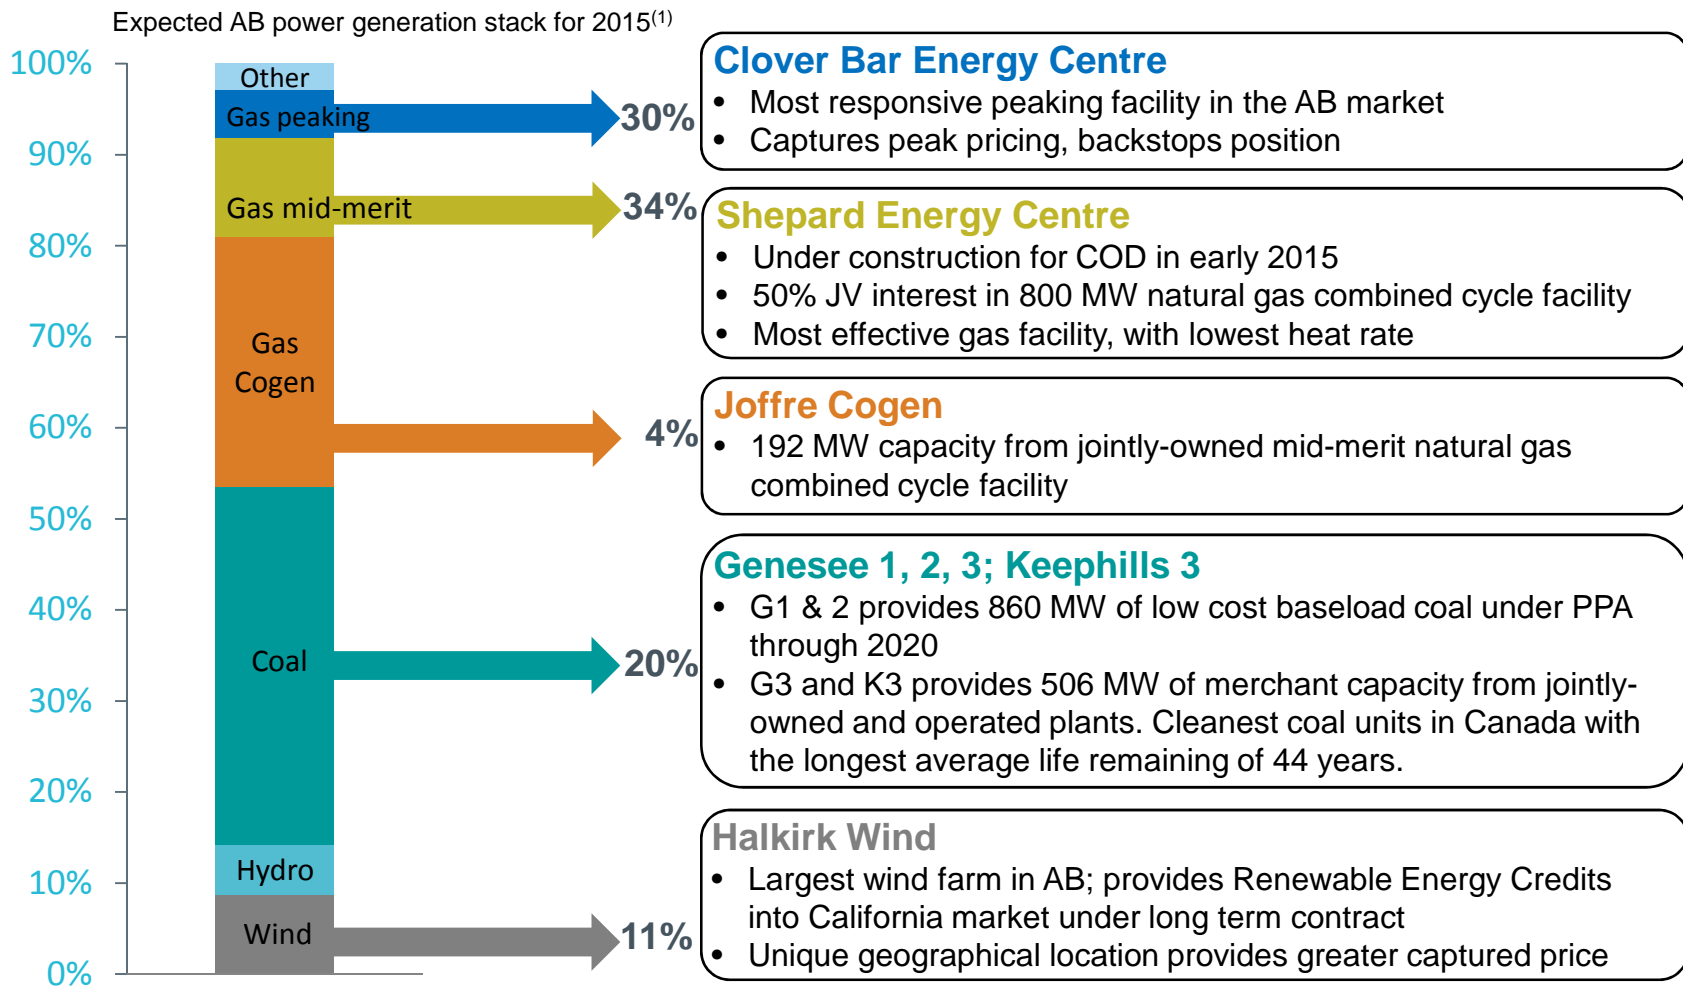

Best fleet in the best merchant market in North America

With investments in Shepard and Genesee 4&5 facilities, Capital Power will own high-quality baseload, mid-merit, renewable and peaking generation in Alberta providing more flexibility than any other power portfolio in the province.

Diverse generation fleet in Alberta

Well positioned to capture value in Alberta's merchant market

(1) Capital Power's expected percentages reflect ownership interest and excludes Sundance PPA. Source: AESO

AB commercial portfolio positions

- Alberta portfolio hedged positions (% sold forward)

	Jul-Dec, 2014	2015	2016
Percentage sold forward ⁽¹⁾	100%	86%	46%
Average contracted prices ⁽²⁾ (\$/MWh)	Mid-\$50	Mid-\$50	Mid-\$50
Forward prices (\$/MWh) (as of Jun 30/14)	\$63	\$49	\$50

- Although baseload positions from the coal assets are 100% hedged in 2014, we have ability to capture upside from higher power prices or price volatility through
 - natural gas assets (Clover Bar peaking facility, Joffre Cogen)
 - Halkirk Wind
 - availability incentive revenues for Genesee 1 & 2

(1) Based on baseload plants and the acquired Sundance PPA plus a portion of Joffre and the uncontracted portion of Shepard Energy Centre baseload.

(2) The forecast average contracted prices may differ significantly from the future average realized prices as the hedged and unhedged positions have a varying mix of differently priced blocks of power. This impact is accentuated in 2014 which includes one contract-for-differences for 300 MW for the full year that is sold forward for peak periods only.

Merchant position in AB provides upside

Operating margin⁽¹⁾ to financial obligations⁽²⁾ and dividends

(1) Merchant margin is calculated using \$50/MWh and \$80/MWh and is based on hedge position as at December 31, 2013.

(2) Based on existing plants plus committed development projects. Financial obligations include interest payments (including interest during construction), sustaining capital expenditures and general & administration expenses.

Shepard Energy Centre

- Shepard is a natural gas combined cycle facility located on the southeast edge of Calgary, Alberta
- 50% joint venture agreement with ENMAX for the 800 MW facility
- Construction is ~97% completed; first fire scheduled for early August
- Construction expected to be completed by the end of 2014 and COD targeted in early 2015

Contracted profile (MW)	2014	2015	2016	2017	2018-35
Shepard - total capacity	-	800	800	800	800
Capital Power - owned capacity	-	400	400	400	400
Contracted output:					
Tolling agreement (20 years)	-	200	200	200	200
Additional contracted output	-	100	100	100	-
Contracts for differences	300	100	-	-	-
% of output contracted	-	100%	75%	75%	50%

K2 Wind

- 270 MW (Siemens turbines) wind project located in southern Ontario with 20-year PPA with the Ontario Power Authority
- Equal one-third partnerships with Samsung and Pattern Renewable Holdings
- \$850M project financing completed in Mar/14
- Total estimated project cost revised to \$930M from \$900M due to F/X changes on USD contract deliverables; Capital Power's share is \$310M
- With higher portion of the project financed with project debt than originally forecast; expect higher equity returns on the project
- Construction has commenced, commercial operations targeted for second half of 2015

Genesee 4&5

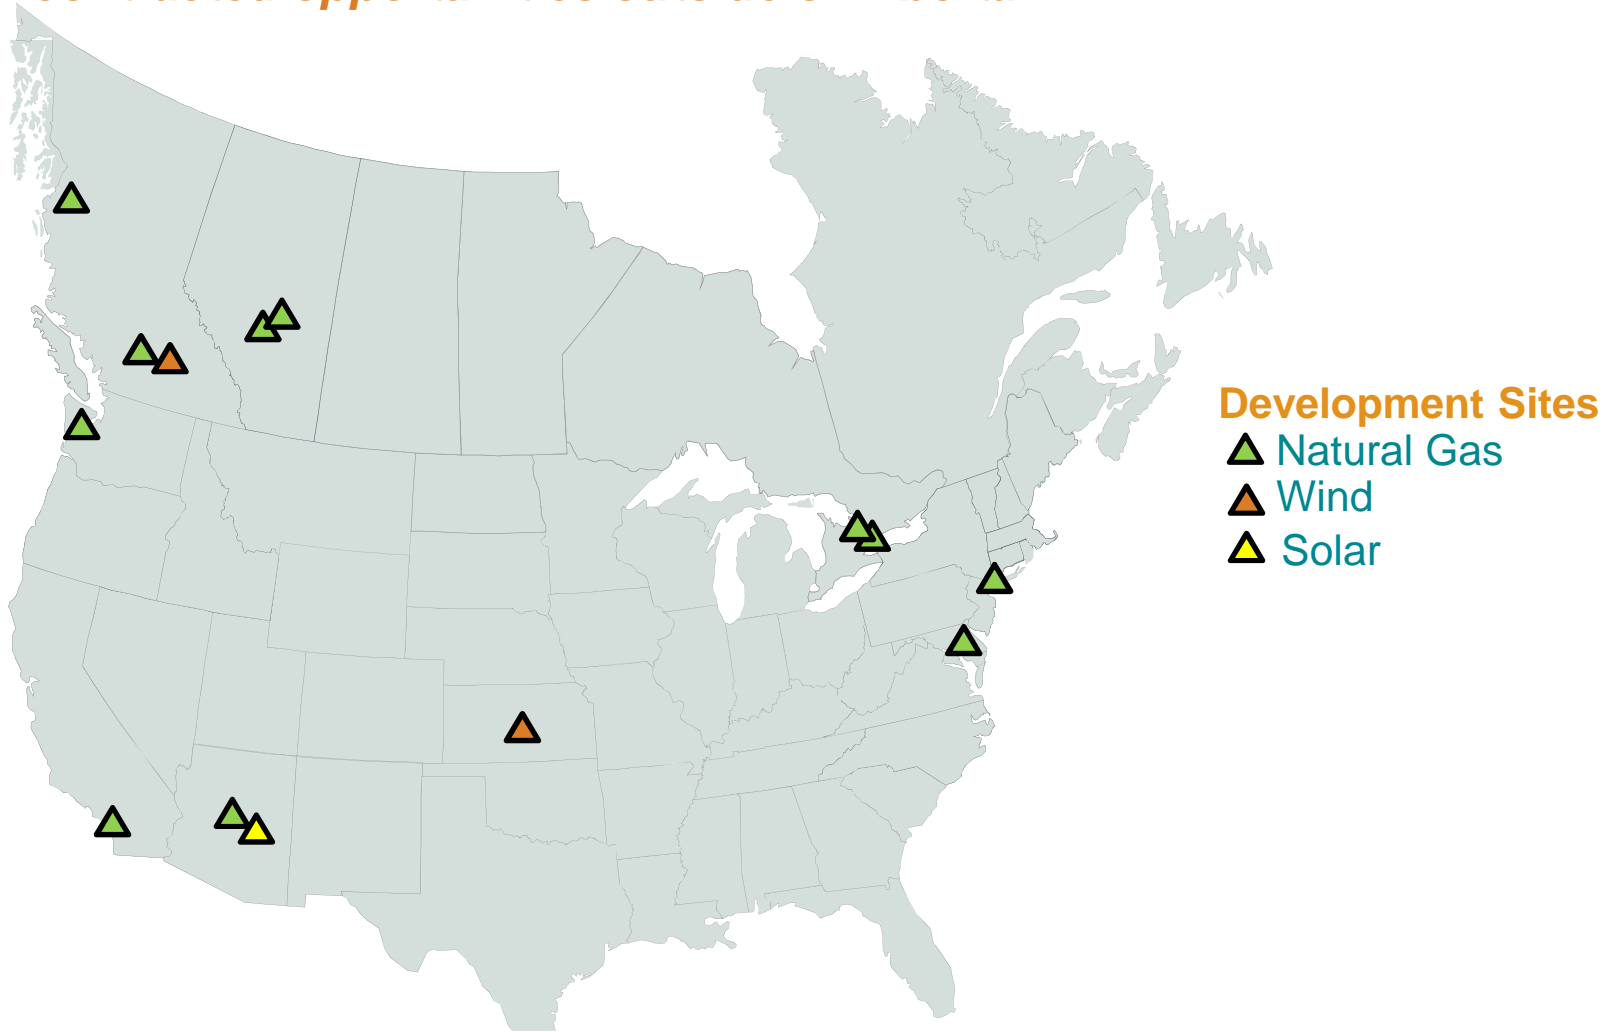

- Joint arrangement agreements finalized with ENMAX in July 2014 to develop, construct, own, and operate the Genesee 4 & 5 facilities
- Capital Power will lead the development and construction of the project and will be the operator of the natural gas-fired facility
- Up to 1,050 MW using the latest state-of-the-art high efficiency gas turbine technology in a two train one-on-one configuration
- Agreement includes an 8-year tolling arrangement under which ENMAX will purchase 50% of Capital Power's share of the output for 8 years
- Construction will be completed in 2018-20 timeframe depending on load growth in the province

Genesee 4 & 5 to be built on existing Genesee site west of Edmonton, Alberta

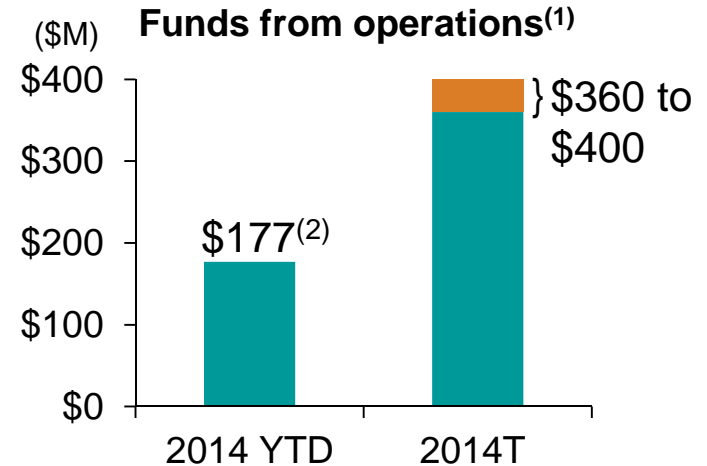

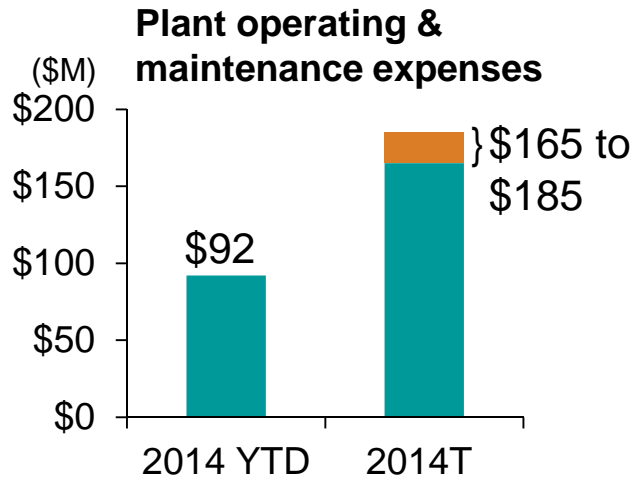

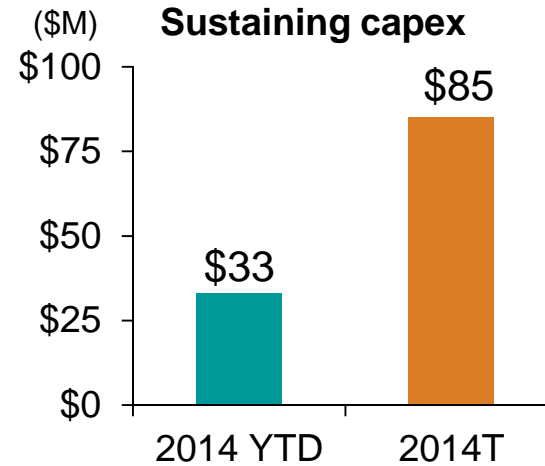

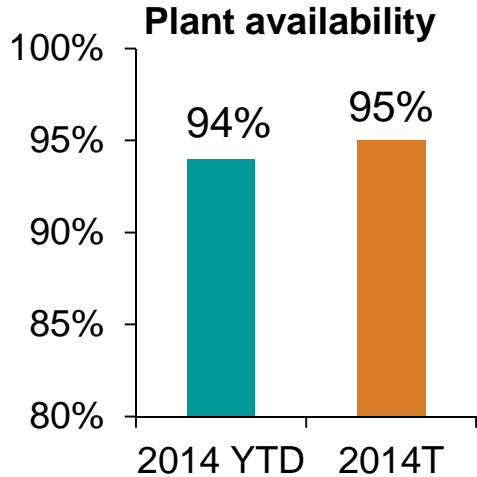

Growth opportunities

All contracted opportunities outside of Alberta

2014 Corporate priorities

Operational and financial targets

(1) Funds from operations target is based on a forecasted average Alberta power price of \$57/MWh. FFO is a non-GAAP financial measure, see slide 49.

(2) 2014 YTD FFO of \$177M includes \$20M received in Q2/14 arising from the amendments to the Genesee Coal Mine Agreements.

2014 Corporate priorities

Development and construction targets

	2014 Targets	Status
K2 Wind	Commence construction and complete project financing	Construction commenced following completion of the \$850M project financing in Q1/14
Shepard Energy Centre	Complete construction with COD in early 2015	Construction on track for completion by end of 2014 with COD in early 2015
Genesee 4 & 5	Continue on track for Q1/15 permitting approval	On track with target

Continue building on strong track record for successful development projects

Why invest in Capital Power

Operational excellence

Excellent assets in good markets
Very good operating and trading performance
Recent reductions in risk, financial volatility & operating cost base

Strong financial base

Near term growth funded from internal cash flow & DRIP
Decreasing EPCOR overhang and greater contracted asset visibility should improve valuation multiples

Compelling value proposition

Well-positioned to grow cash flows to reinvest in growth opportunities and support consistent dividend growth
Best fleet in Alberta, the best merchant market in North America

Alberta power market

- Alberta (AB) has a competitive wholesale energy and ancillary services market operated by the Alberta Electric System Operator (AESO); market has an installed generation capacity of ~14,000 MW
- No capacity market – power generators must recover all costs through revenue earned in AB’s energy and ancillary services market
- Entire province is a single zone where power prices are determined by the bid price of the incremental power generator (i.e. one with the highest accepted bid sets hourly price) that is dispatched to balance demand and supply in real-time
- AB’s economy expected to grow above national average rate due to the impact of continued oil sands development activities that is a fundamental driver to increasing power demand
- AESO forecasts average annual demand to grow by 4.3% for the next five years⁽¹⁾
- AB Government announced in Jan/13, that it will continue with the Regulated Rate Option (RRO) and extend the procurement window to 120 days

(1) AESO 24-Month Reliability Outlook for 2013-2014, http://www.aeso.ca/downloads/AESO_24-Month_Reliability_Outlook_2013-2014_FINAL.pdf

Alberta demand outlook

Growth in total electricity sales (%)
2013 to 2020⁽¹⁾

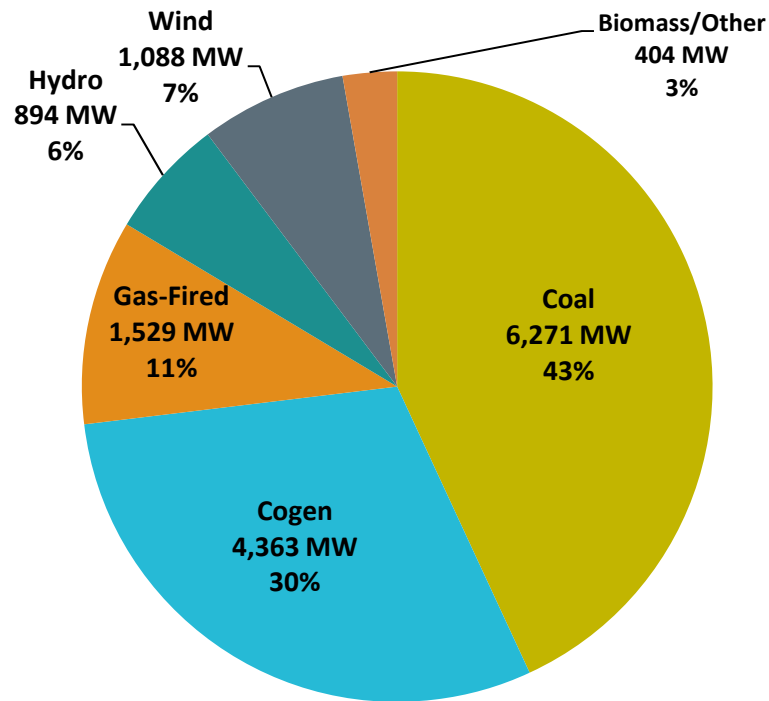

“Alberta’s future power demand outlook is also fairly robust, especially compared with that of most other jurisdictions in North America, because of a strong provincial economy; a growing population from inward migration; and anticipated high growth in the energy sector, especially for shale gas, tight oil, and oil sands production.”

– IHS CERA, Sept/12

Alberta power market summary

Alberta's market design framework

- Has attracted continued investment by various parties for different fuel types
- Ensures investment risk is borne by investors and not ratepayers/taxpayers
- Provides participants with options and choices for managing their commodity price risk

Capital Power believes Alberta's market design is sustainable and will continue to attract investment

- No major market reforms required
- Effective implementation of existing policy directives, particularly new transmission development

“...analysis confirms that, from a resource adequacy and generation investment perspective, the Alberta electricity market is generally well functioning based on current market conditions and policies. The current market design should be able to address the identified resource adequacy challenges and there is no compelling or immediate need for major design changes to address these challenges.” *(The Brattle Group, Inc., Mar/13)*

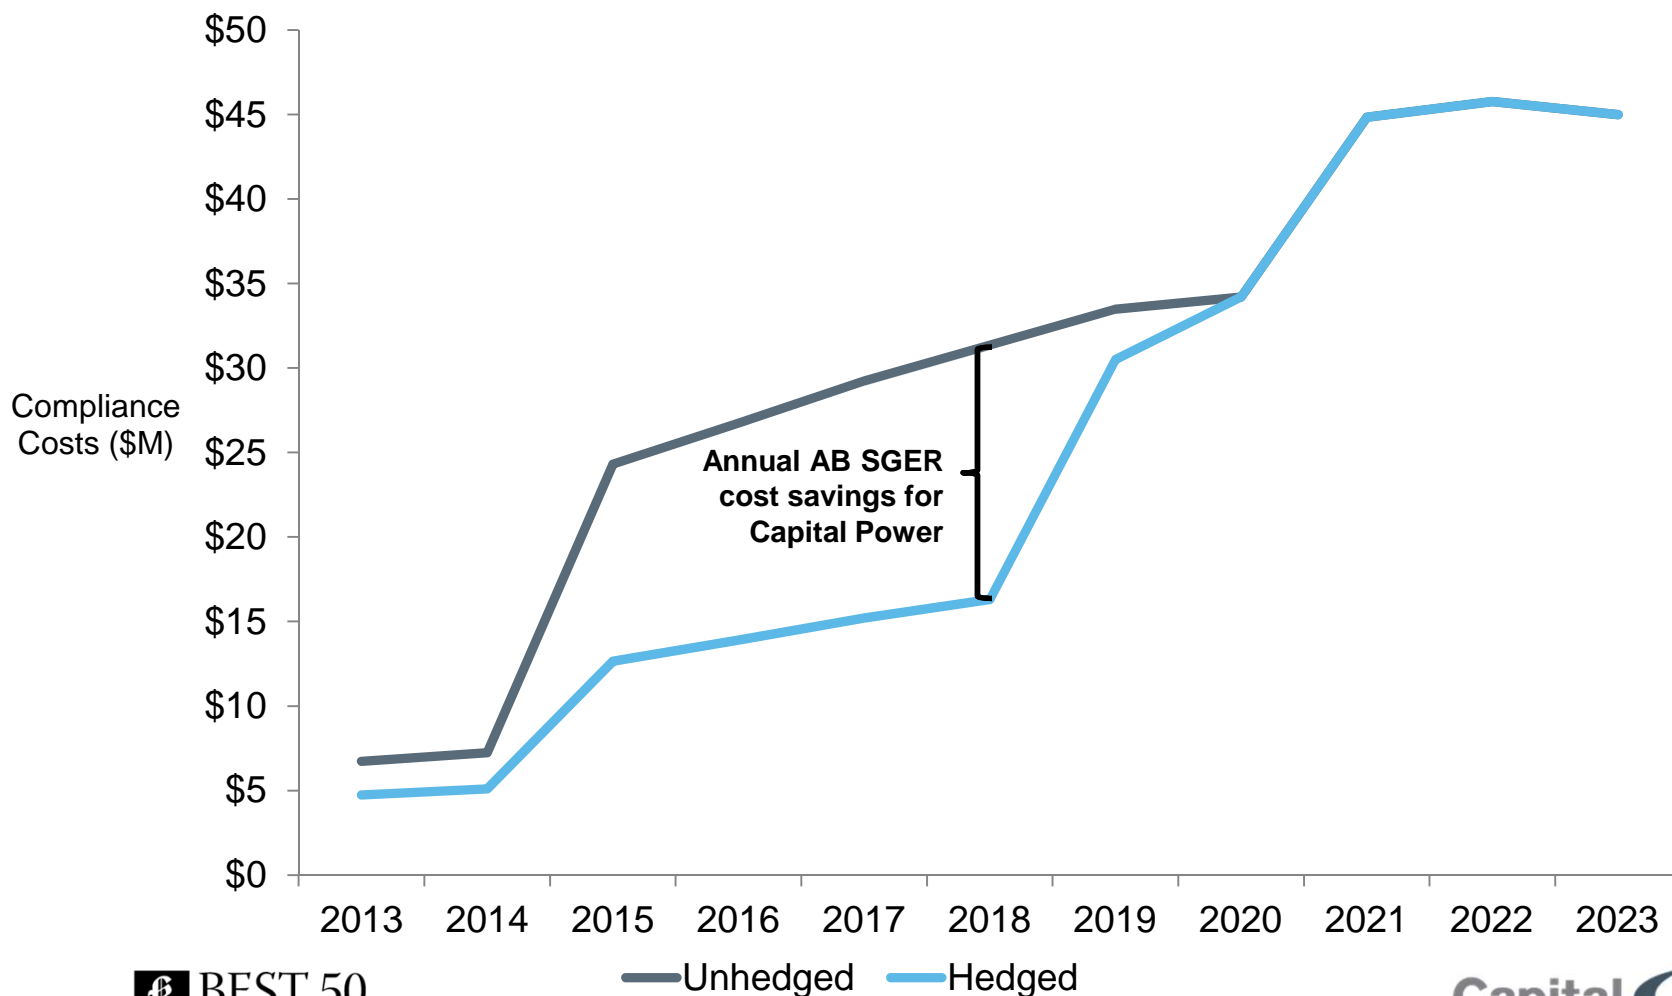

Proven ability to manage environmental commodity exposure

- Dedicated team of five focused on transforming environmental commodity risk into an opportunity – success in doing this has created a competitive advantage through lower compliance costs in Alberta
- This competitive advantage will be strengthened if the Alberta Specified Gas Emitters Regulation (SGER) becomes more stringent, as expected in 2015
- Over \$100M has been committed to or invested in environmental commodities (e.g. GHG offsets and allowances, RECs, etc.)
- Capital Power has neutralized its exposure to GHG regulations in Alberta in the near-term and continues to procure GHG offsets

Capital Power has been actively involved in environmental markets for over a decade and continues to be an industry leader in managing environmental commodity exposure

Renewables and emissions portfolio

Unhedged vs. hedged Capital Power Alberta SGER compliance costs 2013-2017

CST and CASA framework

Capital Stock Turnover (CST) (CO₂)

- Limits unscrubbed coal-fired plant life to 45-50 years
- Unit Commercial Operation Date (COD) year
 - End of Life COD prior to 1975 = earlier of 50 years or 2019
 - COD in or after 1975 but before 1986 = earlier of 50 years or 2029
 - COD in or after 1986 = 50 year life or end of PPA
- All Capital Power coal assets given 50 year-life
- Keephills 2 and Keephills 1 only received 45, 46 year-life

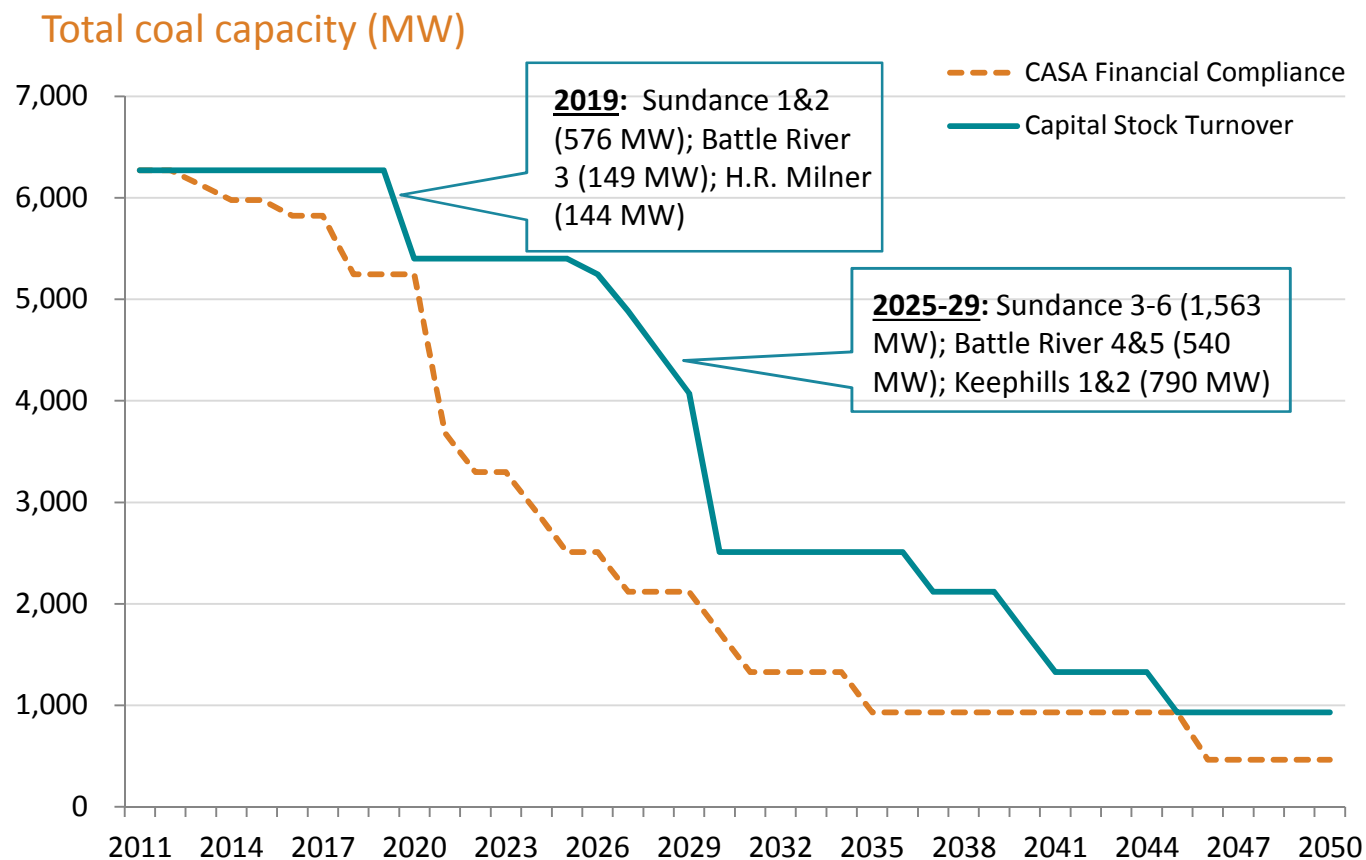

Clean Air Strategic Alliance (CASA) (NO_x and SO₂)

- Compliance through meeting physical BATEA⁽¹⁾ or use of credits to financially comply 41st to 50th years
- BATEA limit
 - SO₂ = 0.65 kg/MWh
 - NO_x = 0.47 kg/MWh
- Credits must be sourced from same sector
- Current emission levels from sub-critical units
 - SO₂ = 1.7 to 6.8 kg/MWh
 - NO_x = 1.6 to 2.5 kg/MWh

(1) BATEA: Best available technology economically achievable

Expected coal unit retirements - CASA

Clean Air Strategic Alliance (CASA) regulations may result in coal units retiring sooner

Note: CASA Financial Compliance assumes coal-fired capacity retirements at the end of design life as per the Alberta Air Emissions Standards for Electricity Generation CASA framework.

Debt maturity schedule⁽¹⁾

- \$1.2B in credit facilities with 5-year tenor maturing 2018, of which \$1.1B available

Well spread-out debt maturities are supported by long asset lives

(1) As of Dec. 31, 2013.

(2) Callable debt, however does not mature until 2016 (\$130M) and 2018 (\$163M).

Non-GAAP financial measures

The Company uses (i) earnings before finance expense, income tax expense, depreciation and amortization, impairments, foreign exchange gains or losses, and gains on disposals (adjusted EBITDA), (ii) funds from operations (FFO), (iii) normalized earnings attributable to common shareholders, and (iv) normalized earnings per share as financial performance measures.

These terms are not defined financial measures according to GAAP and do not have standardized meanings prescribed by GAAP and are, therefore, unlikely to be comparable to similar measures used by other enterprises. These measures should not be considered alternatives to net income, net income attributable to shareholders of the Company, net cash flows from operating activities or other measures of financial performance calculated in accordance with GAAP. Rather, these measures are provided to complement GAAP measures in the analysis of the Company's results of operations from management's perspective.

Reconciliations of these Non-GAAP financial measures are contained in the Company's Management's Discussion and Analysis dated July 25, 2014 for the quarter ended June 30, 2014 which is available under the Company's profile on SEDAR at www.SEDAR.com and on the Company's website at www.capitalpower.com.

Forward-looking information

Forward-looking information or statements included in this presentation are provided to inform the Company's shareholders and potential investors about management's assessment of Capital Power's future plans and operations. This information may not be appropriate for other purposes. The forward-looking information in this presentation is generally identified by words such as "will", "anticipate", "believe", "plan", "intend", "target", and "expect" or similar words that suggest future outcomes.

Material forward-looking information in this presentation includes information with respect to: (i) expectations related to future revenues, expenses, earnings and funds from operations, (ii) expectations regarding the future pricing of electricity and market fundamentals in existing and target markets, (iii) expectations related to the Company's future cash requirements including interest and principal repayments, capital expenditures, dividends and distributions, (iv) expectations regarding the Company's sources of funding, adequacy and availability of committed bank credit facilities and future borrowings, (v) expectations regarding future growth and emerging opportunities in the Company's target markets including the focus on certain technologies, (vi) expectations regarding the timing of, funding of, and costs for existing, planned and potential development projects and acquisitions, (vii) expectations regarding plant availability, and (viii) expectations regarding capital expenditures for plant maintenance and other.

These statements are based on certain assumptions and analyses made by the Company in light of its experience and perception of historical trends, current conditions and expected future developments, and other factors it believes are appropriate. The material factors and assumptions used to develop these forward-looking statements relate to: (i) electricity and other energy prices, (ii) performance, (iii) business prospects and opportunities including expected growth and capital projects, (iv) status of and impact of policy, legislation and regulations, and (v) effective tax rates.

Whether actual results, performance or achievements will conform to the Company's expectations and predictions is subject to a number of known and unknown risks and uncertainties which could cause actual results and experience to differ materially from the Company's expectations. Such material risks and uncertainties are: (i) changes in electricity prices in markets in which the Company operates, (ii) changes in energy commodity market prices and use of derivatives, (iii) regulatory and political environments including changes to environmental, financial reporting and tax legislation, (iv) power plant availability and performance including maintenance expenditures, (v) ability to fund current and future capital and working capital needs, (vi) acquisitions and developments including timing and costs of regulatory approvals and construction, (vii) changes in market prices and availability of fuel, and (viii) changes in general economic and competitive conditions. See Risks and Risk Management in the Company's December 31, 2013 annual MD&A for further discussion of these and other risks.

Readers are cautioned not to place undue reliance on any such forward-looking statements, which speak only as of the date made. The Company does not undertake or accept any obligation or undertaking to release publicly any updates or revisions to any forward-looking statements to reflect any change in the Company's expectations or any change in events, conditions or circumstances on which any such statement is based, except as required by law.
