200 MW

The proposed 200 MW Salt Springs Wind project is currently in planning. The project would be located on 25,500 acres in Ford and Hodgeman Counties, Kansas, with a planned interconnection at the Spearville 345 – kV substation.

Consultation and Engagement

We value and consider local community interests and priorities. We engage government, employees, local communities, investors, shareholders, and Indigenous communities. Our goal for every project, every facility and every initiative, internal and external, is to build, operate, and align with the interests and priorities of those closest to, and most impacted by, our operations.
