

Fact Sheet | Willow Creek Wind

Project Details

Location: Iowa, United States

Status: In Development

Fuel Type(s)

Wind

Proposed Capacity

200 MW

Our proposed 200 MW Willow Creek Wind project is currently in planning. The project would be located on 20,000 acres in Cerro Gordo and Hancock Counties, Iowa, with a planned interconnection at the Cerro Gordo – Hancock 161– kV ITC line.

Consultation and Engagement

We value and consider local community interests and priorities. We engage with government, employees, local communities, investors, shareholders, and Indigenous communities. Our goal with every project, every facility and every initiative, internal and external, is to build, operate, and align with the interests and priorities of those closest to and most impacted by our operations.
