Investor Presentation June 2020

Brian Vaasjo, President & CEO Bryan DeNeve, SVP Finance & CFO

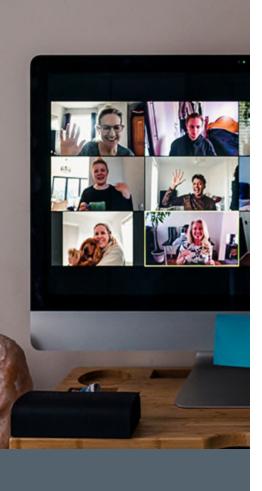

RESPONSIBLE ENERGY FOR TOMORROW

Growth-oriented North American power producer

- 6,500 MWs of owned capacity including one wind project in advanced development
- Strong pipeline of contracted growth opportunities
- Highly-contracted, young and diversified portfolio
- Committed to investment grade credit rating
- History of 7% annual dividend growth including guidance to 2021 with revised growth of 5% in 2022

Managing effectively during COVID-19

- Implemented business continuity and risk management plans
- Commitment to health and safety of our employees
 - Working from home for office and all non-essential plant employees
 - Numerous hygiene and social distancing protocols adopted in the plants
 - Company functioning very well
- Managing our operational risk by continuing planned outages at facilities where safe to do so while modifying and deferring other outages to manage risk
- Strong financial position and liquidity

Our business is evolving to cleaner energy

Investing in emission free renewables

Investing in critical natural gas generation

- **Today**
- Building new facilities in Canada and U.S.

Tomorrow

- Integration of storage technologies
- Acquiring key facilities
 in Canada and U.S.
 - Reduce emissions profile through carbon utilization

Transitioning heritage coal generation to natural gas

- Complete 12% emission reduction program
- Move to 100% natural
 gas capability
- Reduce emission through 100% natural gas
- Reduce emissions profile through carbon utilization

Aspire to be net carbon neutral on or before 2050

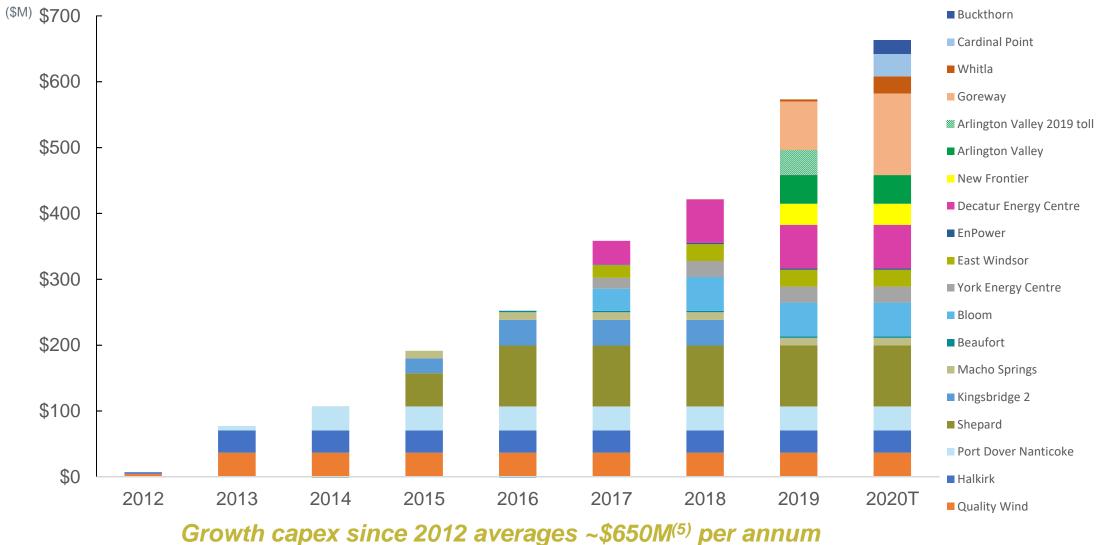

Ç

Strategically evolving our portfolio

		— × —		
	Generation technology ^(1,2)	Contracted capacity ^(1,2)	North American footprint ^(1,2)	AFFO per share ⁽²⁾
2014	33% Gas and renewables	58% Contracted	76% Alberta	\$2.51
2020T	71% Gas and renewables	79% Contracted	50% Alberta	\$4.98 ⁽³⁾
	Renewables and gas growth	Greater visibility	Geographic diversification	Increased cash flow per share

Based on Adjusted EBITDA excluding G&A expenses and including off-coal compensation and finance lease principal payments.
 Adjusted EBITDA and AFFO per share are non-GAAP financial measures.
 Based on midpoint of the \$500M - \$550M guidance range.

Continued EBITDA growth from new assets⁽¹⁻⁵⁾

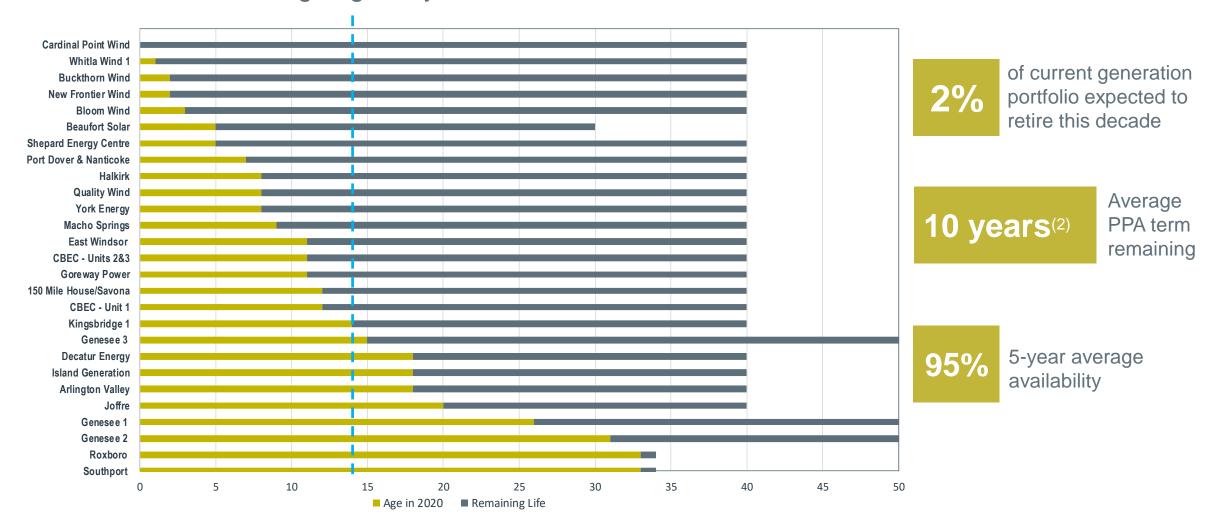

1) Margins have been averaged over the periods except in the year of commissioning/acquisition. 2) Capital Power's share of adjusted EBITDA for all assets. 3) Includes both merchant and contracted components of Shepard and Halkirk. The merchant components include contributions from trading activity attributable to the plants' production. 4) Includes finance lease principal payments for 2012-2018. 5) Includes gross capex from tax-equity investments.

$\boldsymbol{\phi}$

6

Young fleet with long asset lives

Average age 14 years⁽¹⁾

1) Megawatt-weighted average.

2) As of June 2020 based on targeted Adjusted EBITDA. Adjusted EBITDA-weighted average, includes Off-Coal Agreement with the Province of Alberta and excludes Genesee 1&2, Southport and Roxboro PPAs.

6

Recent growth and renewable highlights

Added 251 MWs in renewables

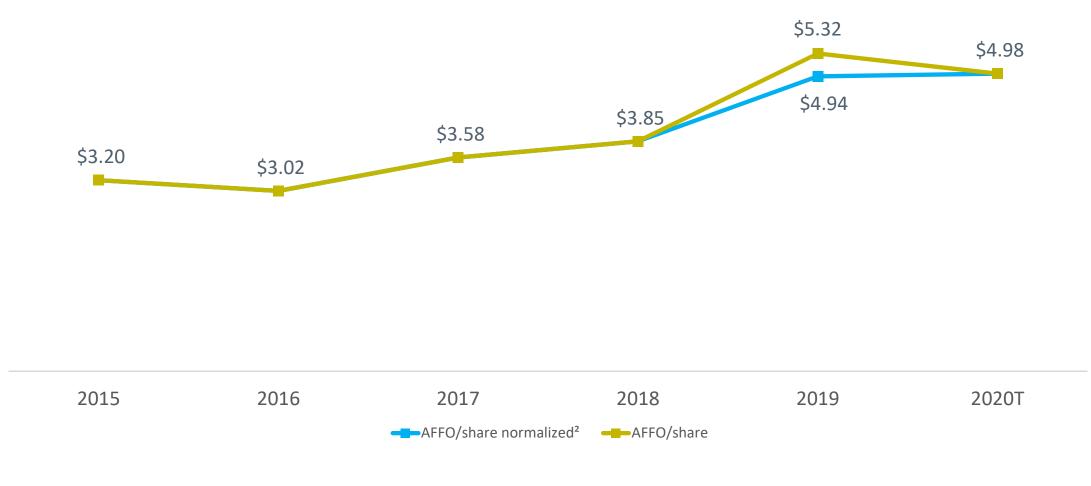

- Completed 150 MW Cardinal Point Wind project on-schedule and onbudget (USD)
- Acquired 101 MW Buckthorn Wind in Texas with 15-year weighted average contract life remaining

Signed agreement with Vestas for 10-year extension of LTSAs

- Covers fleet-wide maintenance for all of our Vestas-equipped wind facilities
- Expanded scope of services, expected 26% cost reduction compared to current service and maintenance agreements
- Expected to increase adjusted EBITDA and AFFO by \$8M and \$6M annually once the new LTSAs take effect between 2021 and 2023
- Mitigates potential operational risks

Reached agreement with Vestas to supply turbines for Whitla Wind 2

Growing AFFO^(1,3) **per share** Forecasting 5-year CAGR of ~9% for 2015-2020

 Represents Adjusted FFO (2018 method), less the portion allocated to the non-controlling interest (calculated consistent with the proportion of income and distributions allocated to the non-controlling interest in each period). Commencing in 2016, there is no longer a non-controlling interest, therefore, for 2016 onward this metric reflects adjusted FFO (2018 method).

9

2) 2019 normalized for non-recurring component of 2019 Arlington Valley toll payment.

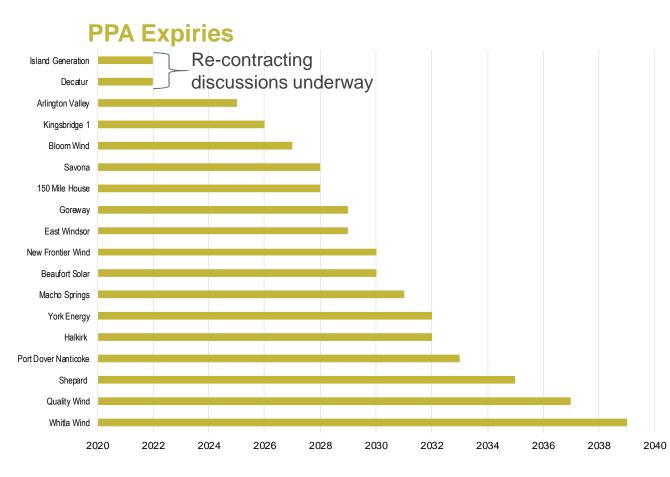

3) 2020 is based on midpoint of \$500M - \$550M guidance range.

Dividend growth guidance to 2022

Delivering consistent annual dividend growth with 5% dividend guidance for 2022

Optimistic outlook for the re-contracting of near term PPAs

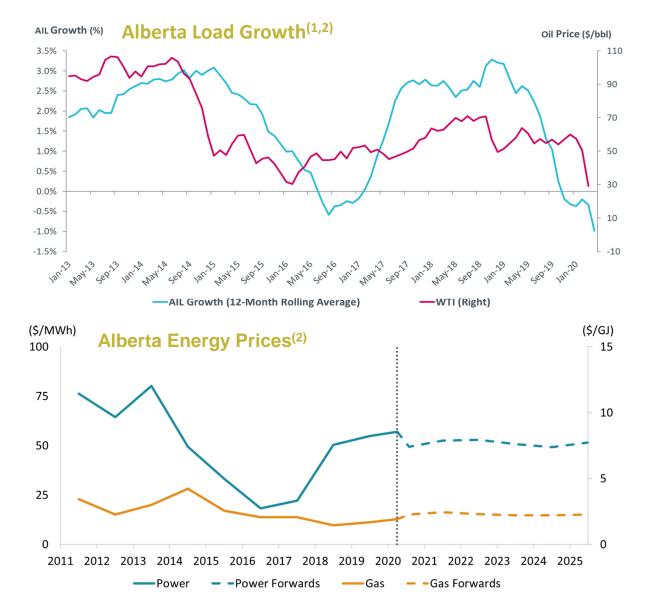

Facility	PPA Expiry / Credit Rating	Re-contracting Outlook
Island Generation (BC)	2022 (A-rated entity)	 Provides critical back-up and reliability services to Vancouver Island
Decatur (Alabama)	2022 (A-rated entity)	 Strong history of re- contracting Need for capacity due to supply retirements and load growth
Arlington Valley (Arizona)	2025 (A-rated entity)	 Well-positioned asset required for transmission Attractive Desert Southwest market with growing demand and low investment risk environment

Alberta Power Market

- COVID-19 pandemic and low oil prices has impacted economy and demand for electricity
- Starting in 2021, all output controlled by commercial market participants
- Positive medium term outlook for power prices with 2-year deferral of Suncor's 800 MW oil sands cogen project to 2025

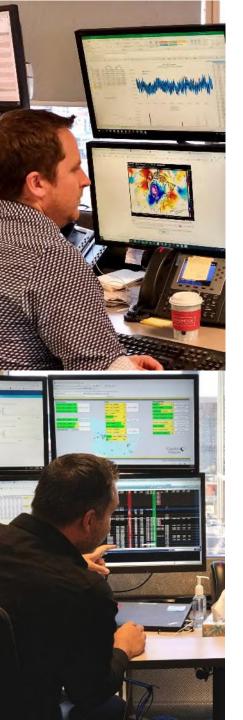

Alberta power market fundamentals

- Electricity demand has declined ~5% due to COVID-19 pandemic and low crude oil prices
- Demand expected to recover within the next 18 months
- Near term power prices expected to soften due to lower demand and addition of renewables to the grid
- Disciplined supply response expected to mitigate impact from reduced demand
- Positive medium term outlook with 2-year deferral of Suncor's 800 MW cogen project to late 2025

Alberta Internal Load normalized for weather. Source: Capital Power, EIA.
 Source: ICE, NGX, AESO, Capital Power.

Portfolio optimization Alberta commercial portfolio positions

	Q2-Q4/20	2021	2022	2023
% sold forward ⁽¹⁾	91%	7%	15%	9%
Contracted prices ⁽¹⁾ (\$/MWh)	Mid-\$50	Low-\$60	Low-\$50	Low-\$50
Current average forward prices ⁽²⁾ (\$/MWh)	\$51	\$51	\$53	\$51

As of March 31, 2020. Based on the Alberta baseload facilities plus a portion of Joffre and the uncontracted portion of Shepard.
 As of June 12, 2020.

Transformation of Genesee

- Genesee Performance Standard (industry-leading carbon reduction program)
 - CO2 intensity reduced 12% by 2021
 - Intensity levels of subcritical Genesee1&2 below that of supercritical units
 - Includes supercritical Genesee 3 turbine upgrade
 - Heat rate/CO2 improvements flow through to gas
- Conversion of all 3 units to 100% dual fuel capability by 2021
 - Maximize real-time fuel mix flexibility and further reduce carbon footprint
 - Total capital cost of converting all three units is \$75M⁽¹⁾
 - All conversions completed during regular maintenance outages
- Increased output at Genesee 3
 - Turbine upgrade increases net output by 7 MW to 473 MW

Capital Power is well-positioned in Alberta Energy-only market supports market-driven power prices

Image: Sector with the sector

- Very high availability
- Competitive fixed and variable costs
- High capture prices due to high availability and strategically located wind assets
- Implementation of dual-fuel capability increases value through optionality
- Potential for good operators to capture more value

Growth Strategy

 Strong renewable pipeline including 1,200 MW of wind development in Alberta and in the U.S.

Potential natural gas plant acquisitions

Growth opportunities

Strong renewable pipeline with over 1,200 MW of wind and solar development

2020 growth targets

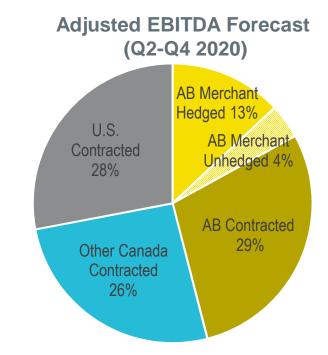

- \$500 million committed capital for growth
- Expect one renewable development project
- Potential for strategically aligned acquisitions

Financial

- Disciplined growth with focus on contracted cash flows
- AFFO growth supports dividend growth
- Ability to fund targeted \$500M growth per year
- Maintain investment grade credit rating

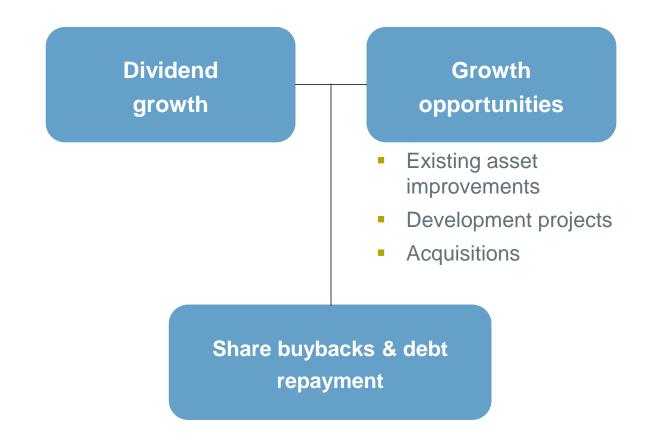

Strong financial position and liquidity

- Strong cash flow generation with majority contracted
 - Expect to generate \$300M+ in discretionary cash flow⁽¹⁾ in 2020
 - Majority of cash flows contracted with an average PPA life remaining of 10 years
 - Contracts with largely investment grade counterparties
 - Loss provision of under \$1M for expected credit losses
- Strong liquidity available
 - \$900M available capacity on \$1.0B of committed credit facilities that mature in 2024
 - Do not anticipate the need to access the capital markets other than to potentially refinance \$250M in debt maturing in Nov/20
 - DBRS confirmed "BBB low" credit rating

Reaffirmed our 2020 financial and dividend growth guidance in Q1/20

Prudent capital allocation

- Balanced focus between dividend growth and growth opportunities
- Dividend growth provides certainty in returns for investors
- Share buybacks are considered during periods of limited growth opportunities
- Purchased 3.4 million shares at a total cost of \$86M in 2019 and Q1/20 under NCIB

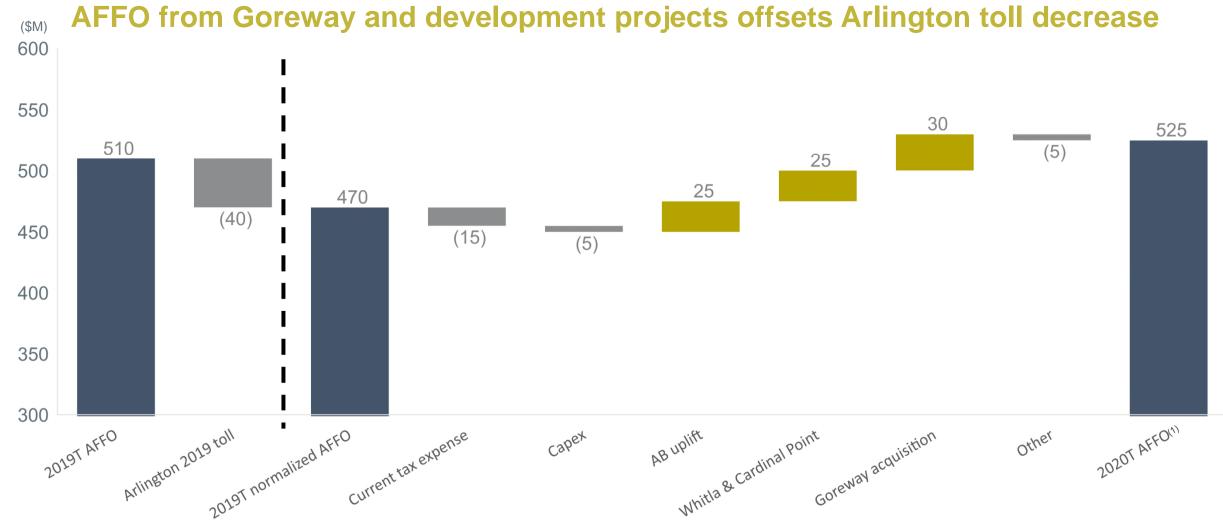

Efficient capital allocation leading to shareholder value

AFFO⁽¹⁾ continues to support dividend growth Discretionary cash flow is forecast to be \$315M in 2020

22

AFFO for 2020

12% year-over-year AFFO growth after normalizing for 2019 Arlington toll

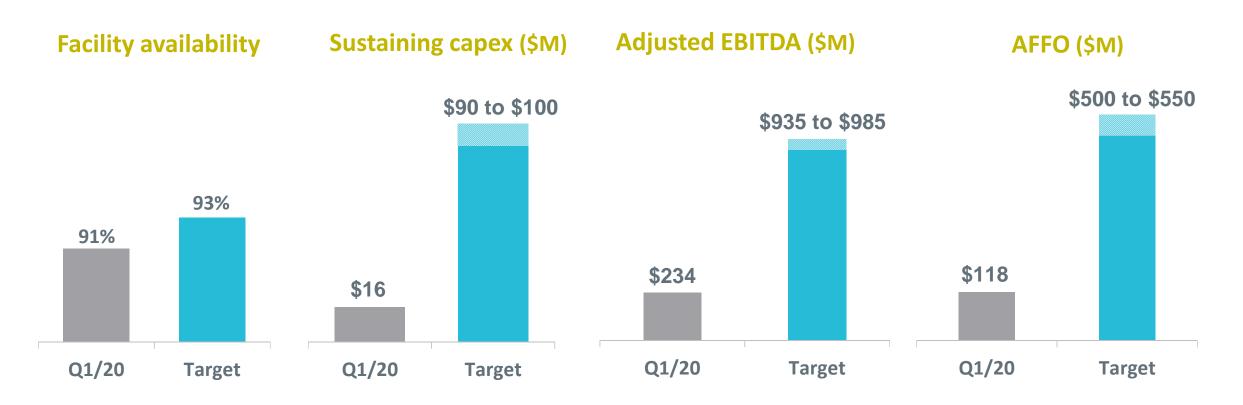

Cash flow and financing outlook Sufficient funding for current growth projects

Courses of each flow	2020T
Sources of cash flow	(\$M)
Funds from operations ⁽¹⁾ + off-coal compensation	\$670
TEI debt issuance	\$221
Bond issuances	\$250
	\$1,141
Uses of cash flow	
Dividends (common & preferred shares)	(\$260)
Debt repayment ⁽²⁾	(\$420)
Buckthorn acquisition	(\$84)
C2CNT equity investment	(\$25)
Enhancement capex	(\$95)
Growth capex	(\$150)
Sustaining and maintenance capex	(\$95)
	(\$1,129)
Additional cash available	\$12

1) Funds from operations (FFO) is a is a non-GAAP financial measure.

2) Excludes debt repayments to tax equity investor & equity accounted investment debt repayments. Includes principal payments on finance lease payables and expected repayments of credit facilities.

Q1/20 performance versus 2020 annual targets

No changes to 2020 financial guidance, AFFO expected to be near the mid-point of guidance range

25

2020 development and construction targets

Targets	Status
Cardinal Point Wind (Illinois, 150 MW) Complete construction within \$289-\$301M (CAD), \$236- \$246M (USD) budget for COD in Mar/20	 ✓ Total USD project cost expected near low end of budget range ✓ Completed on-schedule with COD on Mar 16/20 ✓ Received net tax equity financing of \$221M from two U.S. financial institutions ✓ 12-year PPA with an investment grade U.S. financial institution for 85% of the facility's output
Whitla Wind 2 (Alberta, 97 MW) Complete construction within \$165M budget for COD in 2021	✓ Project currently tracking on-budget and on-schedule
Other growth \$500M of committed capital for growth with a target of one renewable development project	 <u>Buckthorn Wind</u> (Texas, 101 MW) Acquisition purchase price of \$84M cash consideration, assumption of tax equity debt of \$96M, and contingent consideration (maximum \$8M) 15-year weighted average contract life remaining

Sustainability and Investment Opportunity

Sustainability Reporting

Our inaugural *Integrated Annual Report,* combining our financial and environmental, social and governance (ESG) reporting

Our 2019 Climate Change Disclosure Report⁽¹⁾

Strong scoring from CDP on climate change and water management

"A-" for Climate Change Disclosure "B-" for Water Security Assessment

Our Report Features...

- A comprehensive view of our priorities and performance
- An insight into our strategy for creating long-term value
- A third-party limited assurance on key ESG indicators

Sustainability Targets

- Constructing all new natural gas generation units to be carbon capture and/or hydrogen-ready
- Reducing carbon emissions at Genesee by 50% by 2030 from 2005 levels
- Reducing carbon emissions by 10% and our emission intensity by 65%, in 2030 from 2005 levels
- Invest in carbon capture, utilization and storage (CCUS) technology such as C2CNT to eventually decarbonize our natural gas fleet
- Enhance sustainable sourcing plan (2020)
- Building the Genesee Carbon Conversion Centre in 2021
- E water management plan (2021)

Aspiration to be net carbon neutral on or before 2050

Sustainability: Creating Responsible Energy for Tomorrow

Environmental

100% dual-fuel capability at Genesee by 2021 with eventual 100% coal-to-gas conversion

World-leading carbon-reduction program on track to meet target 12% reduction in Genesee GHG emissions by 2021

Plans to build Genesee Carbon Conversion Centre (2021) that will produce 2,500 tonnes of carbon nanotubes, resulting in 2 million tonnes in downstream benefits

Industry leader in financial support for **diverse** offset creation

Social

Governance

One of Canada's 50 Best Corporate Citizens, Top Employer for Young People and one of Alberta's Top 75 Employers in 2019

Exceeding our 30% goal with 44% women on Board and 33% on executive team

Successful stakeholder

engagement program aimed at being "neighbour of choice"

\$1.3 million in community investments made in 2019

Board mandate includes sustainability as a core part of business strategy

CEO/executive short-term incentive targets include 20% ESG KPIs

Committed to Climate-related financial disclosure (TCFD)

One of the World's Most Ethical Companies (Ethisphere) in 2019

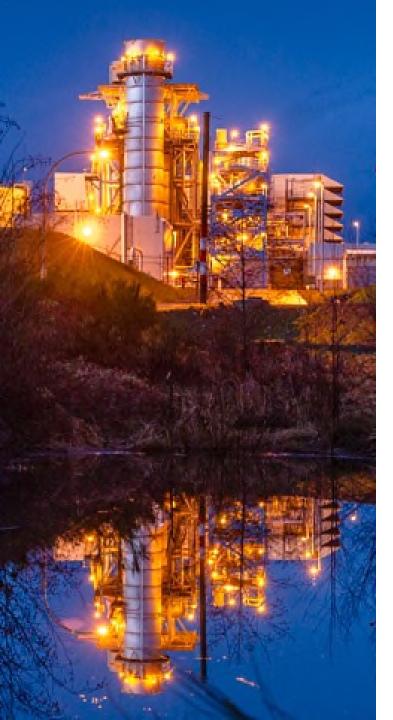

CCGG 2019 Gavel Award Winner for **Best Disclosure** of Corporate Governance and Executive Compensation Practices

Attractive investment opportunity Long-term drivers of our business prove resilient

- Young fleet with long asset lives with a focus on strong operational performance and optimizing assets
- Highly contracted and diversified portfolio by geography and fuel mix
- Strong cash flow generation including \$300M+ in discretionary cash flow⁽¹⁾ in 2020
- Commitment to maintaining investment grade credit rating
- Investing in emission free renewables and critical natural gas generation
- Transitioning Genesee coal generation to natural gas and investing in carbon capture and utilization – aspiration to be net carbon neutral on or before 2050
- Solid ESG performance

Proven track record and guidance for sustainable dividend growth

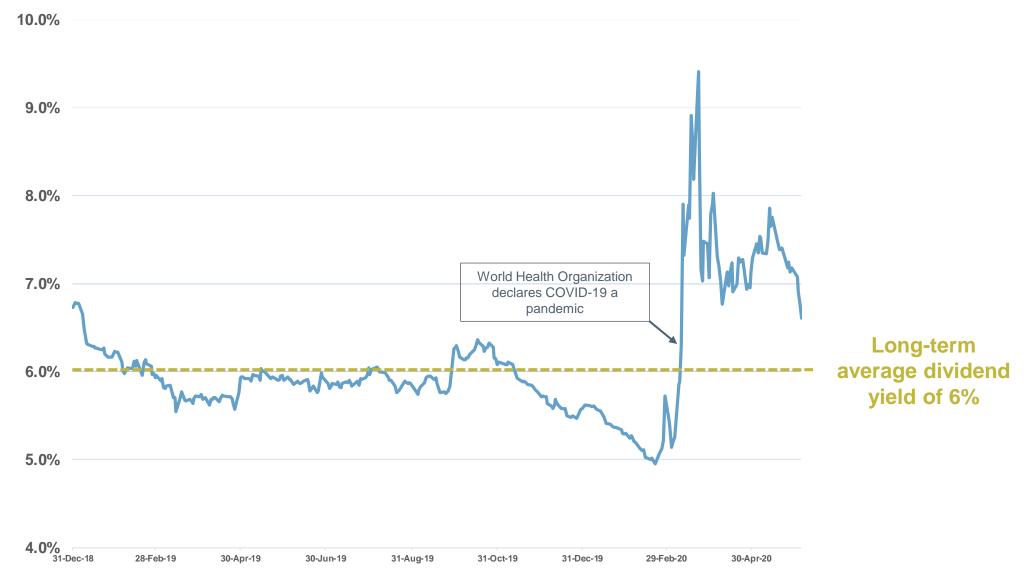

Appendices

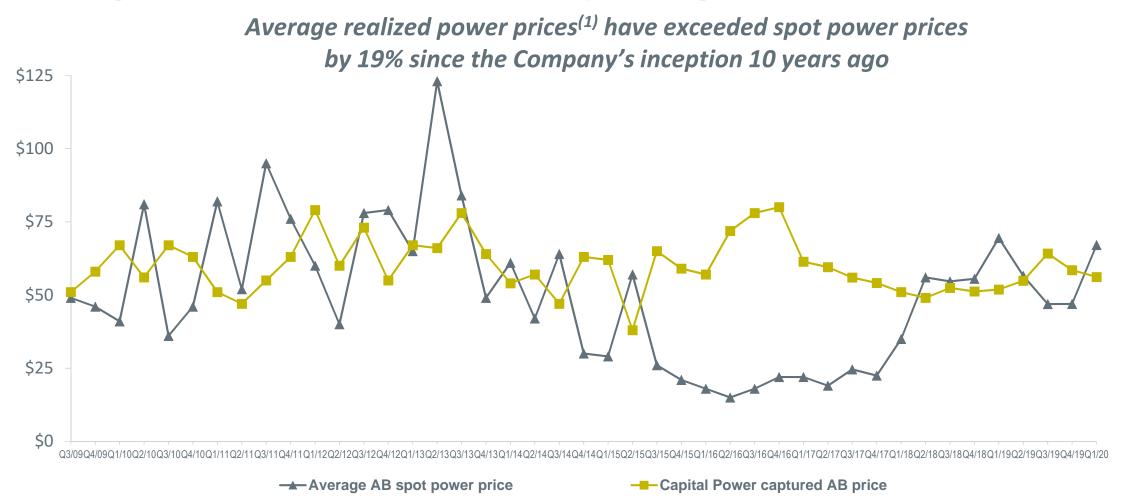

- Dividend Yield
- Alberta portfolio optimization
- Alberta's coal fleet
- Credit rating metrics
- Debt maturity schedule
- Summary of assets / projects under construction

Attractive dividend yield

Dividend yield has averaged 6% since first dividend in 2009

Maximizing the Alberta commodity portfolio Creating incremental value and stability through market expertise

1) Based on the Alberta baseload plants and the acquired Sundance PPA plus the uncontracted portion of Shepard Energy Centre baseload. Effective Mar/16, Sundance PPA is no longer a part of Capital Power's baseload generation due to termination of the Sundance PPA.

Alberta's coal fleet

Retirements under federal / provincial regulations and conversion to gas

Facility	AESO max capacity (MW)	Age in 2020 (yrs)	End of coal life ⁽¹⁾	Current Status	Coal to gas conversion expectation	PPA status

Non-GAAP financial measures

The Company uses (i) earnings before net finance expense, income tax expense, depreciation and amortization, impairments, foreign exchange gains or losses, finance expense and depreciation expense from its joint venture interests, gains or losses on disposals and unrealized changes in fair value of commodity derivatives and emission credits (adjusted EBITDA), (ii) adjusted funds from operations, (iii) adjusted funds from operations per share, (iv) normalized earnings attributable to common shareholders, and (v) normalized earnings per share as financial performance measures.

These terms are not defined financial measures according to GAAP and do not have standardized meanings prescribed by GAAP and, therefore, are unlikely to be comparable to similar measures used by other enterprises. These measures should not be considered alternatives to net income, net income attributable to shareholders of the Company, net cash flows from operating activities or other measures of financial performance calculated in accordance with GAAP. Rather, these measures are provided to complement GAAP measures in the analysis of the Company's results of operations from management's perspective.

Reconciliations of these non-GAAP financial measures are disclosed in the Company's Management's Discussion and Analysis prepared as of May 1, 2020 for the first quarter of 2020, which is available under the Company's profile on SEDAR at SEDAR.com and on the Company's website at capitalpower.com.

Forward-looking information

Forward-looking information or statements included in this presentation are provided to inform the Company's shareholders and potential investors about management's assessment of Capital Power's future plans and operations. This information may not be appropriate for other purposes. The forward-looking information in this presentation is generally identified by words such as will, anticipate, believe, plan, intend, target, and expect or similar words that suggest future outcomes.

Material forward-looking information in this presentation includes expectations regarding:

- future revenues, expenses, earnings, adjusted EBITDA and adjusted funds from operations,
- the future pricing of electricity and market fundamentals in existing and target markets,
- future dividend growth,
- the Company's future cash requirements including interest and principal repayments, capital expenditures, dividends and distributions,
- the Company's sources of funding, adequacy and availability of committed bank credit facilities and future borrowings,
- future growth and emerging opportunities in the Company's target markets including the focus on certain technologies,
- the timing of, funding of, and costs for existing, planned and potential development projects and acquisitions (including phase 2 of the Whitla Wind project),
- facility availability and planned outages,
- capital expenditures for facility maintenance and other (sustaining capital, future growth projects, Genesee dual-fuel capability project),
- the financial impacts of the acquisition of Buckthorn Wind, including the impacts to adjusted EBITDA and adjusted funds from operations,
- the likelihood of meeting the threshold and paying out contingent consideration related to Buckthorn Wind,
- the dates on which the Buckthorn Wind tax equity investor reaches the agreed upon target rate of return,
- the final cost and financial impacts of Cardinal Point Wind in its first full year of operations, including the impacts to adjusted EBITDA and adjusted funds from operations,
- impacts of the Vestas Long-Term Service Agreement (LTSA) extension agreement including cost reductions, impacts on adjusted EBITDA and AFFO and timing of finalizing facility LTSAs as well as the years they will become effective,
- the impact of market designs on the Company's core markets,
- the Line Loss Rule Proceeding including timing of retrospective loss factors being finalized, participation in applicable regulatory processes, and potential impacts to the Company, and
- the impact of the COVID-19 pandemic and the decline in oil prices.

These statements are based on certain assumptions and analyses made by the Company in light of its experience and perception of historical trends, current conditions, expected future developments, and other factors it believes are appropriate including its review of purchased businesses and assets. The material factors and assumptions used to develop these forward-looking statements relate to:

- electricity and other energy prices and carbon prices,
- performance,
- business prospects (including potential re-contracting of facilities) and opportunities including expected growth and capital projects,
- status of and impact of policy, legislation and regulations,
- effective tax rates,
- foreign exchange rates,
- anticipated performance of Buckthorn Wind,
- anticipated performance of Cardinal Point Wind, and
- other matters discussed under the Performance Overview, Outlook and Risks and Risk Management sections.

Whether actual results, performance or achievements will conform to the Company's expectations and predictions is subject to a number of known and unknown risks and uncertainties which could cause actual results and experience to differ materially from the Company's expectations. Such material risks and uncertainties are:

- changes in electricity prices in markets in which the Company operates,
- changes in energy commodity market prices and use of derivatives,
- regulatory and political environments including changes to environmental, financial reporting and tax legislation,
- generation facility availability, wind capacity factor and performance including maintenance expenditures,
- ability to fund current and future capital and working capital needs,
- acquisitions and developments including timing and costs of regulatory approvals and construction,
- · changes in market prices and availability of fuel,
- ability to realize the anticipated benefits of the Buckthorn Wind acquisition,
- limitations inherent in the Company's review of acquired assets,
- changes in general economic and competitive conditions, and
- risks and uncertainties discussed under the Risks and Risk Management section.

See Risks and Risk Management in the Company's December 31, 2019 annual MD&A and Risks and Risk Management, for further discussion of these and other risks.

Readers are cautioned not to place undue reliance on any such forward-looking statements, which speak only as of the specified approval date. The Company does not undertake or accept any obligation or undertaking to release publicly any updates or revisions to any forward-looking statements to reflect any change in the Company's expectations or any change in events, conditions or circumstances on which any such statement is based, except as required by law.
