Facility Details

Location: Strathmore, Alberta, Canada

Expected Year Commissioned: 2022

Owned/Operated: 100/100

Fuel Type(s)

Solar

Owned Capacity

40.5 MW

Strathmore Solar is a 40.5 megawatt project located on approximately 320 acres of industrial land in Strathmore, Alberta. The project received its AUC permit on November 27, 2020 and is now in the construction phase. Site mobilization for construction is expected take place in April 2021, with commercial operations expected in January 2022.

In November 2020, Capital Power executed a 25-year PPA with a large national Canadian company for all the energy and renewable energy credits generated by the Strathmore Solar project.

Community Investment

At Capital Power, we contribute to the communities in which we operate with the aim of building a sustainable future for all. We engage our neighbours, consider their interests and build real relationships. We aim to source supplies and services locally for our operations, as well as hire from the community.

We give back where we live and work by supporting local organizations and our employees' community participation through our corporate giving programs.

"We continue to make significant progress on our renewables growth strategy with the execution of a 25-year contract for our Strathmore Solar project in Alberta with a large investment grade Canadian company."
