

Fact Sheet | Hornet Solar

Facility Details

Location: Gaston & Lincoln Counties, North Carolina, USA

Expected Commissioning: 2022

Owned/Operated: 100/100

Fuel Type(s)

Solar

Expected Capacity

75 MW

Hornet Solar is a proposed 75 MW solar project, located in Gaston and Lincoln Counties, North Carolina. Construction of the solar project is expected to begin in late 2021 or early 2022, with commercial operations expected in the fourth quarter of 2022. Hornet Solar will operate under a 20-year power purchase agreement with Duke Energy Carolinas (announced in October 2020).

Consultation and Engagement

We value and consider local community interests and priorities. We engage government, employees, local communities, investors, shareholders, and Indigenous communities. Our goal for every project, every facility and every initiative, internal and external, is to build, operate, and align with the interests and priorities of those closest to, and most impacted by, our operations.

“We are delighted to provide additional renewable energy to the people of North Carolina. Renewable projects like these represent another step toward our goal of being net carbon neutral by 2050, and continue to enhance our expertise in solar development and construction while building our competitiveness for future solar growth opportunities.”
