

Company Overview

Capital Power is a growth-oriented North American wholesale power producer with a strategic focus on sustainable energy headquartered in Edmonton, Alberta. We build, own and operate high-quality, utility-scale generation facilities that include renewables and thermal.

We have also made significant investments in carbon capture and utilization to reduce carbon impacts and are committed to be off coal in 2023. Capital Power owns over 6,400 megawatts (MW) of power generation capacity at 26 facilities across North America. Projects in advanced development include 425 MW of owned renewable generation capacity in North Carolina and Alberta and 560 MW of incremental natural gas combined cycle capacity, from the repowering of Genesee 1 and 2 in Alberta.

Attractive Investment Opportunity

- **Young fleet with long asset lives** – Average age of the generation fleet is 14 years.
- **Leverage to Alberta power market** – Ownership interest in the most competitive fleet of assets with a solid track record of value-added portfolio optimization trading.
- **Strong pipeline of growth opportunities** – Potential wind and solar developments in specific targeted markets in Canada and the U.S.
- **Growth in renewables assets** – Approximately 27% of Adjusted EBITDA generated from renewable assets in 2020. Additional growth from seven renewable projects in the 2021-2022 time period.
- **Off-coal** – With the repowering of Genesee 1 and 2, the Company will be off coal in 2023.
- **Dividend growth** – Approximate 6% dividend yield with a 7% annual dividend growth target in 2021 and 5% in 2022.
- **Commitment to investment grade credit rating** – Current ratings of BBB- (S&P) and BBB(low) (DBRS)
