

Company Overview

Capital Power is a growth-oriented North American wholesale power producer with a strategic focus on sustainable energy headquartered in Edmonton, Alberta. We build, own and operate high-quality, utility-scale generation facilities that include renewables and thermal.

We have also made significant investments in carbon capture and utilization to reduce carbon impacts and are committed to be off coal in 2023. Capital Power owns approximately 6,600 megawatts (MW) of power generation capacity at 27 facilities across North America. Projects in advanced development include approximately 385 MW of owned renewable generation capacity in North Carolina and Alberta and 512 MW of incremental natural gas combined cycle capacity, from the repowering of Genesee 1 and 2 in Alberta.

Attractive Investment Opportunity

- **Young fleet with long asset lives** – Average age of the generation fleet is approximately 14 years.
- **Leverage to Alberta power market** – Ownership interest in the most competitive fleet of assets with a solid track record of value-added portfolio optimization trading.
- **Strong pipeline of growth opportunities** – Potential wind and solar developments in specific targeted markets in Canada and the U.S.
- **Growth in renewables assets** – 22% of adjusted EBITDA was generated from renewable assets in 2021. Additional growth from five renewable projects in the 2022-2024 time period.
- **Off-coal** – With the repowering of Genesee 1 and 2, the Company will be off coal in 2023.
- **Dividend growth** – Nine consecutive annual increases with annual dividend guidance of 6% to 2025.
- **Commitment to investment grade credit rating** – Current ratings of BBB- (S&P) and BBB(low) (DBRS)
