Introduction

In August 2022, Capital Power Corporation (“Capital Power” or “the Company”) (TSX: CPX) released its inaugural Green Financing Framework (“the Framework”) and successfully priced its first green hybrid offering. The Company has allocated the capital from this offering towards transformative clean energy projects that support our sustainability targets and accelerate our efforts to decarbonize power generation as we work towards net zero 2045.

The Framework, which aligns with the components of the Green Bond Principles 2021 and Green Loan Principles 2021, Capital Power committed to publicly report on the use of Green Financing proceeds. This Green Bond Report outlines the allocation of Green Financing proceeds by eligible category and demonstrates positive environmental impacts from renewable energy projects.

As of August 2023, we have fully allocated the proceeds of our 2022 green bond offerings to projects, which meet the eligible green criteria outlined in the Framework.
Company Overview

Capital Power is a growth-oriented North American wholesale power producer, with a corporate purpose to power a sustainable future for people and planet. We build, own, operate and optimize high-quality, utility-scale generation facilities across North America, including wind, solar, waste heat, storage and thermal. Currently, we own approximately 7,500 megawatts ("MW") of power generation capacity at 29 facilities.

We have accelerated and enhanced our key sustainability target to net zero by 2045, a reflection of our commitment to decarbonization. As we accelerate growth across our core technologies, we are acting today to build the net zero energy system for tomorrow. To support our ambition, and upon recognizing that limiting global warming will require a transformation of the energy system, Capital Power has committed to being an industry leader in the transition to a net zero future.

To achieve our targets, we are transitioning off coal, increasing growth in renewable projects and making strategic investments to abate the emissions from our natural gas assets. Natural gas will play an important role in the energy transition, paired with carbon abatement solutions.

We will reach our sustainability targets through purposeful investment in our people, evolution of our core technologies, and collaboration with stakeholders to decarbonize our fleet.
Pathway to net zero 2045

Capital Power’s strategy focuses on the development and operation of our core technologies: wind, solar, natural gas and storage. Our pathway to net zero 2045 also includes the advancement of decarbonization technologies such as carbon capture and storage (CCS), hydrogen and direct air capture (DAC).

Today–2024
- Complete Genesee repowering and off-coal
- Complete Genesee CCS FEED study and commence construction
- Invest in renewables paired with storage
- Invest in strategic natural gas
- Explore DAC solutions
- Advance C2CNT research and development

2024–2030
- Complete Genesee CCS project
- Advance carbon mitigation on key natural gas assets
- Pilot DAC solutions and add to carbon compliance portfolio
- Explore alternative clean generation solutions
- Explore CCU opportunities

2030–2045
- Invest in clean generation solutions
- Advance physical decarbonization on natural gas fleet
- Advance negative abatement solutions
- Invest in strategic CCU opportunities

2045–2070
- Net zero generation
- Physical decarbonization
- Negative abatement
INDEPENDENT AUDITOR’S REPORT

To the Management of Capital Power Corporation

Opinion

We have audited the Allocation of Green Bond Proceeds Schedule of Capital Power Corporation (the Entity) for the period from September 9, 2019 to December 31, 2022, and notes to the report, including a summary of significant accounting policies (Hereinafter referred to as the "schedule").

In our opinion, the accompanying schedule for the period from September 9, 2019 to December 31, 2022 of the Entity is prepared, in all material respects, in accordance with the financial reporting provisions of the Capital Power Corporation Green Financing Framework dated August 15, 2022 (the “Green Financing Framework”).

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the “Auditor’s Responsibilities for the Audit of the Schedule” section of our auditor’s report.

We are independent of the Entity in accordance with the ethical requirements that are relevant to our audit of the schedule in Canada and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Emphasis of Matter – Basis of Accounting

We draw attention to footnote 1 in the schedule, which describes the basis of accounting. The schedule was prepared to assist the Entity in disclosing its use of proceeds allocation activities related to the Green Bond.

As a result, the schedule may not be suitable for another purpose.

Our opinion is not modified in respect of this matter.

Responsibilities of Management and Those Charged with Governance for the Schedule

Management is responsible for the preparation of the schedule in accordance with the financial reporting provisions of the Green Financing Framework, and for such internal control as management determines is necessary to enable the preparation of a schedule that is free from material misstatement, whether due to fraud or error.

Those charged with governance are responsible for overseeing the Entity’s financial reporting process.
Independent Auditor’s Report Continued

**Auditor’s Responsibilities for the Audit of the Schedule**

Our objectives are to obtain reasonable assurance about whether the schedule as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor’s report that includes our opinion.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the schedule.

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit.

We also:

- Identify and assess the risks of material misstatement of the schedule, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion.

  The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Entity’s internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

The engagement partner on the audit resulting in this auditor’s report is Robert Borrelli.

Eligibility Criteria

Capital Power allocated an amount equal to the net proceeds from the Green Financing to finance or re-finance, in part or in full, new and/or existing green investments and expenditures that meet the Eligibility Criteria defined below (“Eligible Investments”).

Eligible Investments may include investments and expenditures made by Capital Power up to 36 months prior to each Green Financing issuance and up to 36 months following each Green Financing.

Renewable Operations

At all our operations, including our wind and solar sites, we give back to where we live and work by supporting local organizations and our employees’ community participation through our corporate giving programs.

Our permanent presence in the communities where we operate contributes significantly to the local economy. Our wind facilities employ one permanent employee and several contractors. We create a new and steady stream of municipal tax revenue, annual lease revenues to landowners, and economic offshoots for local businesses.

At our wind facilities, we are taking important steps to protect bats and migratory birds and curtail turbine operations during higher risk periods (e.g., bat migration) at specific sites.

At our Strathmore Solar site, we host 400-600 sheep from Whispering Cedars Ranch – helping us to sustainably manage the land on site to reduce fire hazards and keep the facility well maintained. The mutually beneficial opportunity maximizes the utility of the solar site by offering local farmers additional land for their animals to graze, grow and thrive.

Wind Allocation

Whitla Wind

Whitla Wind is the largest wind facility in Alberta. Located in the County of Forty Mile, the Whitla Wind facility was completed in December 2021, when the Phases 2 and 3 expansions achieved commercial operations (Phase 1 began commercial operations in December 2019).
