

# Cardinal Point Wind

SPRING 2024

Hello everyone,

I'm Joe Glaze, site manager for the Cardinal Point Wind facility and I'm happy to be reaching out to the community. I am responsible for the facility's overall operations and maintenance and working in cooperation with the 135 landowners involved in the project. Cardinal Point Wind spans 20,000 acres and includes 46 wind turbines located in McDonough County and 14 in Warren County.

It's hard to believe that the facility has been operational for 4 years now! It was March of 2020 when the 150-megawatt (MW) project started producing power. Since operations began, the Cardinal Point team has focused on establishing a record of safe and reliable operation, which is a priority for Capital Power. We continue to complete regular inspections of the facility's 180 blades with regular maintenance activities generally taking place in the Spring and Fall.

We have an established community investment program, which I am proud to say has been at work in the local area. In 2023, we launched our Community Sustainability Fund offering grants of up to \$20,000. See page 2 for more information on last year's local recipient and how you can apply for the 2024 grant.

I've lived just outside of Macomb, for 5 years now and my wife and I continue to enjoy being a part of the community. Our family continues to visit different parks in the area and attend the many local events. If you see us out and about, be sure to say hi!

We'll be hosting a landowner and community event on June 11. Stay tuned for details!

On behalf of Capital Power, I would like to wish you health and safety.

**Joe Glaze, Site Manager, Cardinal Point Wind**

## About Us

Capital Power (TSX:CPX) is a growth-oriented power producer committed to net zero by 2045, with approximately 9,300 MW of power generation at 32 facilities across North America.

We prioritize delivering reliable, affordable and decarbonized power that communities can depend on.

Powering Change

## Know what's below. Call before you dig.

It's everyone's responsibility to know where the lines are before you dig. Keep yourself and those around you safe by always contacting 811 before you dig. Underground utility services such as electricity wires and natural gas lines present significant hazards if struck.

At Cardinal Point there are approximately 38 miles of underground high-voltage collector lines that tie the facility's six circuits to the substation. While the collector lines are buried to a depth of at least five feet it's always a good idea to call 811 at least two business days before planning any type of excavation to identify the location of buried infrastructure to prevent potential line strikes. 811 is a national number that connects to an organization called JULIE in Illinois, which is available free of charge. You can also put in an e-request online at [www.Illinois1call.com](http://www.Illinois1call.com)

## Building our community together

We're excited to collaborate with innovative organizations and partners making significant impacts on the vibrancy, wellbeing and overall sustainability of our communities. We aim to source supplies and services locally for our operations, as well as hire from the community.

We give back where we live and work by supporting local organizations and through our employees' community participation with our corporate giving programs.

Recent community support includes:

- Macomb Heritage Days Bob Anstine Memorial Parade
- Local Fire Departments (Blandinsville, Macomb, Monmouth, Colchester)
- McDonough County FOP Lodge #280
- Big Brothers Big Sisters of McDonough and Warren County
- Blandinsville Farmers Picnic
- Good Hope Turkey Trot
- Colchester Lions Club
- Good Food Collaborative
- McDonough County Special Recreation Association
- Tink's Exterior Renovation Campaign (2023)

Joe Glaze (far left) with the Capital Power Renewables team.

We are proud to support the communities where we live and work to help you achieve your climate action goals. Last year, we launched our Community Sustainability Fund (CSF) to support sustainable grassroots projects that benefit our communities. Grants of up to \$20,000 are available!

Last year, United West Elementary School in Monmouth received a \$1,500 grant from the CSF to install a raised garden bed for the school's Garden Club to further facilitate lessons on agriculture, ecology, nutrition and weather.

The deadline to apply for our 2024 Community Sustainability Fund is May 31, 2024.

For more info or to apply, please visit: [www.capitalpower.com/CSF](http://www.capitalpower.com/CSF)

## Request support for your community initiative

Capital Power provides support in the areas of Climate Action, Wellbeing and Equity & Opportunity. If you are a part of a community organization that operates in this area and have events or initiatives that support these impact areas, please consider requesting support through our on-line system on our website: [www.capitalpower.com/support](http://www.capitalpower.com/support)

**Mailing Address**  
22519 E 600th St  
Sciota, IL 61475
